Training medical professionals creates a higher level of security and skill in dealing with patients and minimises the fear of treatment errors.

You can rely on anatomical models by 3B Scientific!

Before the first actual examinations on patients, the anatomy, physiology and pathology of the human body have to be learned. Anatomical models that are highly realistic can help with this. All structures of the human body can be explored in detail and, therefore, better understood. They form a complement to real clinical cases and the use of medical 3D software. There is something for everyone on the following pages! From an oversized heart for the lecture theatre, via real-life sized anatomical models, through to mini models for the desk. They are all anatomically correct, accurate and painted, with loving attention to detail.

Medical simulators:
Gather clinical experience, practice and hone skills

Simulators enable students to learn the correct skills and procedures, even in difficult conditions, without risk to the patient, during both basic skill and more advanced team training.

The combination of exact replicas of anatomical structures and selected physiological and pathological conditions creates a connection between medical theory and clinical practice. Simulators by 3B Scientific® offer this and much more.

Browse through the following pages and you will find, for example, birth simulators with and without electronic components, suture trainers, resuscitation simulators, catheterisation and wound care. Contact us, and we will be happy to answer your questions and advise you accordingly.

The 3B Scientific Team wishes you a pleasant read.

NEW IN
BASIC LIFE SUPPORT

CPR and Airway Management Training
• Realistic intubation with ventilation feedback

NEW IN
CATHETERISATION

Catheterisation Simulator
• Pliable foreskin and labia
• Complete disassembly in seconds for perfect cleaning
• Male version: urethra narrowing – 3 positions

3B Scientific has been setting quality standards in manufacturing didactic material for medical education since 1948.

Today, the brand is represented in over 120 countries worldwide with local offices in Germany, Hungary, USA, Japan, France, China, Italy, Spain, United Kingdom, Russia, Brazil, Thailand, South Korea and Turkey.

3B Scientific® Human Skull models now come with magnetic connections for easier disassembly. See page 40 for more details. Many more models come with convenient magnets – they are marked throughout the catalog with this icon.
3B Scientific offers you the highest level of service and product quality that you can always depend on. The production of our 3B Scientific® anatomy models, simulators and trainers is backed by the newest findings in medical sciences and educational techniques.

A wide selection of products is available to fit your exact needs:
- All life-size skeletons and some soft tissue models are cast from real specimens
- Made from extremely durable materials for everyday use
- Designed and developed in Germany for medical professionals

Precise anatomical details are hand painted to show intricate structures such as muscle and nerve fibres. These allow for easy identification in our detailed product manuals and learning cards whilst encouraging effective teaching and interactive study.

Only non-toxic material is used to create models for everyday, hands-on education. The casting process, from real specimens, guarantees realistic anatomical features and life-like textures. Our production processes ensure that our exacting standards are always maintained for every single bone, skeleton, model and simulator. This is backed by the 3B Scientific warranty.

3B Scientific is a member of the Worlddidac Quality Charter and its quality management is certified according to the standards of DIN EN ISO 9001.
Magnetic connections for easy, hands-on demonstrations

Stan the Classic Human Skeleton Model
The Classic Skeleton Model Stan has been the standard of quality in hospitals, schools, universities, and laboratories for over 50 years. Stan is the most affordable full-size skeleton of this quality available anywhere, ideal for active use in teaching and demonstrations. This human skeleton model is easy to handle, anatomically correct (cast from real specimen) and economically priced.

*All 3B Scientific human skeleton models offer highest quality in workmanship and materials!*
- Life-size and realistic weight
- Top quality cast from real specimens
- Extremely accurate in every detail, final assembly carried out by hand
- Made from a durable, unbreakable synthetic material
- 3 part assembled skull with magnetic connections
- Limbs can be removed quickly and easily
- Movable joints for demonstration purposes
- On a stable metal stand with 5 wheels for secure transfer from room to room
- Transparent dust cover included
- Developed in Germany

High quality human skeleton models, cast from a real specimen

Stan on Pelvic Mounted Roller Stand
176.5 cm; 9.57 kg
M-1020171

Stan on Hanging Stand (Hanging Stand shown on page 13)
192.5 cm; 8.77 kg
M-1020172

Recommended: Heavy Duty Protective Cover, Black (not shown)
Protect your investment with our heavy-duty protective cover. Suitable for all 3B Scientific full-size skeletons
M-1020761
Max the Classic Skeleton with Muscle Insertions and Origins

This skeleton contains all the standard benefits of a 3B Scientific® Skeleton plus painted muscles, to demonstrate the structural interaction between bones and muscles. It depicts over 600 structures of medical/anatomical significance including muscle origins (red) and insertions (blue) on the left side as well as hand numbered bones, fissures and foramina on the right side.

Max got muscle!

All features exclusive to Max at a glance:
• Shows the structural interaction between bones and muscles
• Depicts over 600 structures of medical significance
• Painted muscle origins in red and insertions in blue
• Hand numbered muscles, bones, fissures and foramina for easy identification

Demonstrate the structural interaction between muscles and bones with Max

Max on Pelvic Mounted Roller Stand
176.5 cm; 9.57 kg
M-1020173

Max on Hanging Stand (Hanging Stand shown on page 13)
192.5 cm; 8.77 kg
M-1020174
Leo the Classic Skeleton with Elasticated Ligaments
This skeleton contains all the standard benefits of a 3B Scientific® Skeleton plus ligaments to represent the structural interaction between bones and ligaments. The elasticated ligaments on the major appendicular joints (shoulder, elbow, hip, and knee) are mounted on the right side.

Leo is all about ligaments!

All features exclusive to Leo at a glance:
• Structural representation of interaction between bones and ligaments
• All ligaments are elasticated to show movement

Leo on Pelvic Mounted Roller Stand
176.5 cm; 10 kg
M-1020175

Demonstrate the interaction between bones and ligaments and realistic movement with Leo
Sam is your all-purpose teaching tool for all levels of student or patient education

Sam the Classic Skeleton with Elasticated Ligaments, Labels, Muscle Insertions and Origins
This skeleton contains all the standard benefits of a 3B Scientific® Skeleton plus a bendable vertebral column, ligaments, painted muscles and over 600 labelled and identified structures. Sam’s fully flexible vertebral column allows you to demonstrate all natural postures, including the movements of the skull and head joints. The unique combination of a flexible vertebral column, muscle origins and insertions, numbered bones, flexible joint ligaments, and a disc prolapsed between the 3rd and 4th lumbar vertebrae allow you to display over 600 structures of medical/anatomical interest with this top of the line model. Comes complete with an identification guide.

Sam the Super Skeleton does it all:
• Over 600 hand-numbered, labelled details, includes detailed guide for easy identification
• Hand-painted muscle origins and insertions
• Flexible spine and ligaments for natural postures (can be removed from stand)
• Slipped disc between the 3rd and 4th lumbar vertebrae
• Protruding spinal nerves and vertebral arteries
• Full flexibility of limbs on left side, right side has full flexibility of knee and hip with limited flexibility of elbow and shoulder

Sam on Pelvic Mounted Roller Stand
176.5 cm; 10 kg
M-1020176

Sam on Hanging Stand (Hanging Stand shown on page 13)
192.5 cm; 10 kg
M-1020177
Phil the Physiological Skeleton with Realistic Joint Mechanisms
Phil is unique in his near life-like realisation of the joint mechanisms. He allows you to demonstrate the inward and outward rotation of the arms and legs and the extension and flexion of the knee and elbow joints. The flexible spine allows for natural movement (lateral inclination, movement and extension, rotation). The bones of the hands are wire mounted to demonstrate their natural positions. The foot bones are mounted flexibly to enable movability. The shoulder blades rotate along when the arms are raised. Even the restricted mobility of the iliosacral joint and the sacrococcygeal joint can be demonstrated.

Fred the Flexible Skeleton with Extremely Bendable Spine
Fred’s spine can be bent to mimic any natural human movement. Once flexed, it remains fixed in position to demonstrate correct and incorrect posture or various pathological conditions. In addition, all skull movements can be demonstrated. Spinal nerve exits and vertebral arteries are shown as well as a dorso-lateral disc prolapse between the 3rd and 4th lumbar vertebrae. Fred has all the standard benefits of a 3B Scientific Skeleton.
Frank the Functional Skeleton for Life-like Movement
This unique functional Skeleton comes on a hanging stand and features a flexible assembly of all joints, allowing you to perform the individual movements in a nearly life-like way. You can even demonstrate the complex motions of the upper extremity. The shoulder blades rotate along when the arms are raised. Graphically demonstrate the position of the radial and ulnar bones during inward and outward rotation of the lower arm. The flexible spine allows for natural movement (lateral inclination, flexion and extension, rotation). Even the restricted mobility of the iliosacral joint and the sacrococcygeal joint can be demonstrated.

Demonstrate life-like movement unseen in any other skeleton model with Frank

Frank’s moves are truly unique. This skeleton contains all the features of the Standard Classic Skeleton Stan, plus:
- The flexible assembly of all joints lets you perform life-like movement
- Complex motions of upper extremities can be demonstrated

Frank on Hanging Stand
192.5 cm; 9.6 kg
M-1020180

Magnetic connections for easy, hands-on demonstrations

Realistic patella movement
DISASSEMBLED SKELETON MODELS FOR DETAILED STUDY OF INDIVIDUAL BONES

Disarticulated Full Skeleton, Numbered with Muscle Origins and Insertions
This disarticulated 3B Scientific® Skeleton is hand-painted and numbered to show muscle origins in red and muscle insertions in blue on the left side. The disarticulated skeleton’s bones and bony structures such as fissures, foramina and processes are hand-numbered on the right side. The skull is detachable into 3 parts for detailed anatomical study. Consists of 179 pieces.
• One hand and foot on wire
• Vertebral column strung on thin, nylon wire
• Multilingual product manual to identify over 600 numbered anatomical structures
• Supplied in a sturdy partitioned cardboard storage box
48.5 x 27 x 42.5 cm; 6 kg
M-1020158

Disarticulated Half Skeleton, with Loose Hand/Foot
Complete with 3-part skull, sternum, hyoid and spinal column.
48.5 x 27 x 42.5 cm; 4 kg
M-1020156

Disarticulated Half Skeleton, with Wire Mounted Hand/Foot
Complete with 3-part skull, sternum, hyoid and spinal column.
49 x 43 x 26.5 cm; 4 kg
M-1020155

This high quality skeleton replica is great for any in-depth study of the human skeleton and scientific anatomy studies.
**Shorty the Mini Skeleton**
- Top of the range miniature human skeleton models.
- 3-part removable skull (skullcap, base of skull, mandible)
- Removable arms and legs
- Specially mounted hip joints to demonstrate natural rotation of the hips
- Made from durable, unbreakable plastic, hand assembled
- Can be taken off of the base when required

**A. Shorty the Mini Skeleton, Pelvic Mounted**
88 cm, 1.5 kg  
M-1000039

**Shorty the Mini Skeleton, Hanging Stand (not shown)**
On hanging stand that can be placed on the floor or hung on the wall.  
94 cm; 1.5 kg  
M-1000040

**B. Shorty with Painted Muscles, Pelvic Mounted**
Muscle origins (red) and insertions (blue) on the left half.  
88 cm; 1.7 kg  
M-1000044

**Shorty with Painted Muscles, Hanging Stand (not shown)**
On hanging stand that can be placed on the floor or hung on the wall.  
94 cm; 1.7 kg  
M-1000045

**Mini Skeletons: Incredible detail and fully articulating joints!**

---

**Cancellous Bone**
The model shows the spongy bone inside the bone. Its filigree architecture is determined by influences such as pressure, bending and torsion. Using innovative micro CT technology, we have managed to reconstruct an exact 3-dimensional copy of a piece of cancellous bone from an original and enlarge it 100 times.  
17 x 17 x 23 cm; 0.29 kg  
M-1009698

**MICROanatomy® Bone Structure Model, enlarged 80 times**
This model depicts a section of lamellar bone, showing the typical structure of tubular bone. Planes are shown in cross and longitudinal section through all levels of the bone and bone marrow. Typical elements are easily identified and help in understanding the structure and function of the Haversian systems. This representation graphically illustrates the individual bone components including spongy and compact substance, endosteum, cortical substance, osteocytes, Volkmann and Haversian canals.  
26 x 19 x 14.5 cm; 0.8 kg  
M-1000154

INDIVIDUAL BONE MODELS

Benefits of flexibly mounted bone models:
The flexible bungee mounting enables the individual bones to be pulled back into their natural positioning after having been pulled apart for close up studies. The entire model will remain in its natural anatomical positioning when not pulled apart.

Loose Foot and Ankle Skeleton (elastic bungee mounted)*
This loose foot and ankle skeleton comes mounted with elastic bungey for a flexible effect. The foot skeleton includes portions of the tibia and fibula with incredible detail cast from a real specimen.
M-1019358

Loose Hand Skeleton with Ulna and Radius*
Loosely mounted on bungee string, Ulna and radius wire mounted.
M-1019369

*Please note that you will receive either a left or right version by default
**Benefits of nylon mounted bone models:**
The individual bones hold together in their anatomically correct location, but are loosely enough mounted for individual studies.

Loose Hand Skeleton (nylon mounted)*
M-1019368

Loose Foot Skeleton (nylon mounted)*
M-1019356

* Please note that you will receive either a left or right version by default
Benefits of wire mounted bone models:
Once flexed, the joints stay in the position you choose for demonstration purposes. The individual bones will always remain in a natural anatomical position.

*Please note that you will receive either a left or right version by default

Structural Anatomy of the Hand, 3-part
Right down to the fingerprints, this full-size model shows amazing detail. The superficial and internal structures of the hand including bones, muscles, tendons, ligaments, nerves, veins, and arteries (superficial and deep palmar arches) are all present. The palmar aponeurosis and plate of the superficial flexor tendons are removable.

Analyse the palmar surface through three increasingly deeper levels:
• 1st level: palmar aponeurosis.
• 2nd level: exposes the flexor retinaculum, superficial palmar arch, tendons of the flexor digitorum, and lumbricales muscles.
• 3rd level: uncovers the deep palmar arch, and deep layer of muscles, nerves, tendons, and ligaments.
28.5 x 13 x 6.5 cm; 1.2 kg
M-1000349

Hand Skeleton Model with Ligaments and Muscles, 4-part
This high quality anatomically correct hand model with ligaments and muscles is great for detailed study of the hand and lower forearm.

All bones, muscles, tendons, ligaments, nerves, arteries, and veins are featured:
• Dorsal side: extensor muscles and portions of the tendons at the wrist passing under the extensor retinaculum
• Palmar face is represented in three layers, removable for detailed study of the deeper anatomical layer (median nerve, superficial palmar arch)
• Deepest anatomical layer shows the intrinsic muscles and deep palmar arterial arch
33 x 12 x 12 cm; 0.4 kg
M-1000358

HIGH QUALITY, DURABLE, AND AFFORDABLE!
Hand Skeleton Model with Elastic Ligaments
This single-part model shows the anatomy of the ligaments in the hand in detail. The elastic ligaments allow for the demonstration of the flexibility of wrist and fingers. The carpals (ossa carpi), the metacarpals (ossa metacarpi) and finger bones (ossa digitorum manus) are shown as osseous structures. In the distal area of the forearm, the radius and the ulna are represented.
14 x 10 x 28 cm; 0.24 kg
M-1013683

Hand Skeleton Model with Ligaments and Carpal Tunnel, 3-part
This 3 part hand skeleton model shows the anatomical detail of the ligaments and tendons found in the hand, wrist, and lower forearm. The interosseous membrane between the radius and ulna is shown along with the bones of the hand.

Removable parts:
- Palmar side of the hand: flexor retinaculum
- Structures of the carpal tunnel: flexor retinaculum, median nerve, and tendons
30 x 14 x 10 cm; 0.3 kg
M-1000357

Internal Finger Structure Model
This full-size model shows the bones, muscles and tendons of the human index finger. Delivered on wire support stand.
19.5 x 13 x 19 cm; 0.5 kg
M-1000350
REMovable Ligaments and Muscles

Foot Skeleton Model with Ligaments and Muscles, 6-part
This anatomically detailed model of the foot and lower leg can be disassembled into 6 parts for detailed study of the following structures: bones, muscles, tendons, ligaments, nerves, arteries, and veins.
The frontal view of the foot model features the extensor muscles of the lower leg. The tendons can be followed on their passage under the transverse and crucial crural ligaments all the way to their insertion points. In addition all tendon sheaths of the foot area are visible.

On the dorsal portion of the foot the gastrocnemius muscle is removable to reveal deeper anatomical elements. The sole of the foot is represented in three layers:
• The first removable layer displays the flexor digitorum brevis
• The second removable layer consists of the quadratus plantae, the tendon of the flexor digitorum longus, and the flexor hallucis muscle
• The third layer reveals even deeper anatomical details of the foot
23 x 26 x 19 cm; 1.1 kg  
M-1019421

3 layers reveal the internal anatomy of the foot!

Foot Skeleton Model with Ligaments
High quality anatomical replica of the human foot and ankle, showing all important ligaments and tendons including the Achilles and peroneous longus tendons of the ankle. The foot skeleton consists of the foot bone and lower portions of the tibia and fibula, including the intracapsular membrane found between them.
23 x 18 x 30 cm; 0.6 kg  
M-1000359
Single Foot Models
Superficial structures, as well as internal bones, muscles, ligaments and nerves of the human foot are shown in these high quality models.

A. Hollow Foot (Pes Cavus)
13 x 23 x 10 cm; 0.5 kg
M-1000356

B. Normal Foot (Pes Normal)
13 x 24 x 9 cm; 0.4 kg
M-1000354

C. Flat Foot (Pes Planus)
12 x 24 x 10 cm; 0.4 kg
M-1000355

JOINT MODELS

KNEE JOINT
with Removable Muscles

› Being part of the high quality series of deluxe joint models, the knee joint model is extremely durable and made of non-hazardous material.

Knee Joint
The 12 parts can quickly be removed for easy demonstrations both in medical training and patient education. The muscles and muscle portions can be taken off for detailed study of the deeper anatomical layers. Colour-coded and raised areas indicate the muscle origin and insertion points on the femur, tibia, and fibula. Additionally, the model shows parts of the fibular and tibial collateral ligaments.
33 x 17 x 17 cm; 0.9 kg
M-1000178

Realistic details!
Elbow Joint with Removable Muscles, 8-part
Right elbow of a male with individual muscles plus muscular origins and insertions on the humerus, radius, and ulna. The muscles can easily be attached to and removed from the corresponding areas of origin and insertion.
25 x 41 x 25 cm
M-1000179

Shoulder Joint with Rotator Cuff, 5-part
This model comprises the upper half of the humerus, the clavicle and the shoulder blade. The muscles of the rotator cuff (subscapularis muscle, supraspinatus muscle, infraspinatus muscle, teres minor muscle) are displayed. By removing the four individual muscles, all movements of the shoulder joint can be performed:
• Abduction  • Inward rotation
• Adduction  • Outward rotation
18 x 18 x 24 cm; 0.85 kg
M-1000176

Hip Joint with Removable Muscles, 7-part
The model shows the right hip joint of an adult male with the individual muscles as well as the muscle origins and insertions on the femur and the hip bone. The hip muscles have been mounted on their corresponding regions of origin and insertion and are removable. The relationship of the muscular system and skeletal system are represented clearly with this human hip joint model.
18 x 32 x 18 cm; 1.9 kg
M-1000177

Removable muscles for advanced anatomical studies:
+ Muscles can be taken off to study origins and insertions
+ All muscles can be studied individually
+ Muscle positioning can be trained
+ Highly realistic colouring of bone and muscles
+ Muscular origins and insertions are raised and colour-coded
+ Removable parts for the study of the deeper anatomy
+ High quality, non-hazardous material for long lasting models

Joint Models | HUMAN ANATOMY
**DEMONSTRATE MOVEMENT AND IMPACT ON CARTILAGE**

**Deluxe Functional Joint Models**
You can use these high-quality, functional joint models to demonstrate physiological movements. Thanks to the attached ligaments you can perform the following movements: abduction, anteversion, retroversion, internal and external rotation. The colour of the natural-cast bones is extremely realistic thanks to a special colouring process. The cartilage on the joint surfaces is marked in blue. All Deluxe Functional joint models are mounted on a base for easy display.

- **A. Functional Shoulder**
  - 22 cm; 0.41 kg
  - M-1000160

- **B. Functional Hip**
  - 32 cm; 0.56 kg
  - M-1000162

**Sectional Knee Joint Model, 3-part**

Demonstrate disorders of the knee joint with this full size model. Shows a healthy right knee joint with parts of femur, tibia and fibula, as well as the ligament system and the patella with parts of the femoral tendon. Can be disassembled to reveal internal structures. Mounted on base.

12 x 12 x 24 cm; 0.5 kg

**Femoral Fracture and Hip Osteoarthritis**

At half natural-size, this model shows the right hip joint of an elderly person. Shown are the femoral fractures that occur most commonly as well as typical wear and tear and osteoarthritis of the hip joint. Additionally, a frontal section through the femoral neck is shown in relief on the base.

14 x 10 x 22 cm; 0.3 kg

**ENHANCE PATIENT EDUCATION WITH DETAILED PATHOLOGICAL MODELS**
3B Scientific® vertebrae models are:
+ Cast from real specimens
+ Anatomically correct
+ Highly detailed
+ Made of extremely durable material

5-Stages of Vertebral Degeneration
The model illustrates degenerative changes to the vertebral bodies and intervertebral discs of the lumbar spine in various degrees. Based on the original cast of a human lumbar spine, even finest bone structures are accurately depicted. From top to bottom, the model shows the stages of degeneration starting with the healthy Lumbar vertebra (L1), stages of prolapsed discs, all the way to strong degenerative changes and bony constriction in L5. The model can be disassembled easily into vertebrae and intervertebral discs. Supplied on base.
22 cm; 0.5 kg
M-1000158

Osteoporosis Model (3 Vertebrae)
Consists of three medially divided lumbar vertebrae with intervertebral discs.
Top: healthy bone structure
Middle: osteoporotic bone structure
Bottom: advanced osteoporotic bone structure with flattened plates, deformation and decreased mass.
For detailed study the vertebrae can easily be removed from the stand.
16 cm; 0.25 kg
M-1000153

4-Stage Degenerative Lumbar Set
These life-size models show 4 stages of lumbar degeneration of L4 and L5:
1. Normal disc and bone
2. Facet Syndrome and a herniated disc
3. Thinning disc and the beginning of bone spurring
4. Seriously degenerated disc with bone fusing
Mounted on wooden base.
8.5 cm; 0.5 kg
M-1005866

Magnetic Osteoporosis Model
Compare osteoporotic to normal thoracic vertebrae. Shows reproductions of osteoporotic 11th and 12th thoracic vertebrae with narrower intervertebral disc located on the left of the stand. Two corresponding healthy vertebrae with intervertebral disc are provided on the right side. The upper vertebra is divided in the middle and can easily be opened thanks to magnetic connections to show the cut surfaces to demonstrate sintering and osteophytes. A detailed illustration on the base depicts two 3D micro CT images obtained from biopsies of both a healthy and an osteoporotic bone.
14 x 9 x 10 cm; 0.2 kg
M-1000182
### A. 6 Mounted Vertebrae
Consists of atlas, axis, cervical vertebra, two thoracic vertebrae with intervertebral discs and one lumbar vertebra.
On stand, removable.
M-1000147

### B. Cervical Section
Real life replica consisting of occipital plate, the 7 vertebrae with discs, cervical nerves, vertebral arteries and spinal cord.
Flexibly mounted on stand.
19 cm; 0.3 kg
M-1000144

### C. Thoracic Section
Consisting of the 12 thoracic vertebrae with discs, thoracic nerves and spinal cord.
Flexibly mounted on stand.
32 cm; 0.5 kg
M-1000145

### D. Lumbar Section
High quality model of the 5 lumbar vertebrae with discs, sacrum with flap, coccyx, spinal nerves and spinal cord.
On removable stand.
34 cm; 0.6 kg
M-1000146

### E. 2 Lumbar Vertebrae with Prolapsed Disc
With Prolapsed Disc. Flexibly mounted with spinal nerves and spinal cord.
9 x 11 x 9 cm; 0.15 kg
M-1000152

### F. Lumbar Section
The lumbar model includes a prolapsed intervertebral disc between the 3rd and 4th lumbar vertebrae. On removable stand.
34 cm; 0.55 kg
M-1000150

### Anatomical Lifting Manikin
This functional figure provides a graphic demonstration of how the human spinal column reacts when heavy objects are lifted correctly and incorrectly. If the correct posture is used, the spine is undistorted. Incorrect posture exhibits obvious stress and distortion to the lumbar spine. Anatomical illustrations of the spine are featured on the base. Includes booklet with detailed information.
28 x 21 x 21.5 cm; 1.4 kg
M-1005101
Set of 24 3B BONElike™ Vertebrae Models
This set is a worldwide unique original anatomical replica of human vertebrae with the most precise illustration of even the finest anatomical structures, exhibiting excellent quality. The vertebrae set includes the 7 cervical, 12 thoracic and 5 lumbar vertebrae.

• Made of 3B BONElike™ material, feels and looks like real bones
• Realistic weight
• Excellent as a substitute for real bones for medical teaching purposes and patient consultation
• Each vertebra is labeled for identification purposes
• Supplied in transport and storage case with individual compartments for all 24 vertebrae
41 x 40 x 12 cm; 2.4 kg
M-1000156

What is 3B BONElike™?
3B Scientific® BONElike™ material looks and feels like real bone. Each bone is a unique original cast of natural human bone with realistic weight, feel and appearance.
• Represents even the finest anatomical structures with realistic texture, colour, and the porous characteristics of real human bone
• Makes an excellent alternative to real bone
• Great for use in medical teaching settings and in patient education

3B BONElike™ Vertebrae Sets
These realistic, high quality casts of original bones show even the finest anatomical structures in great detail. Supplied on a base.
30 x 21 x 6 cm; 0.2 kg

A. 3B BONElike™ Cervical Vertebrae – Set of 7
M-1000021

B. 3B BONElike™ Lumbar Vertebrae – Set of 5
M-1000155

An excellent way to study the detail of the anatomy of the human spine!
3B Bone™ Vertebral Column Model
This anatomical replica of the human spine is a flexible, mounted, true-to-life model of the human vertebral column in excellent 3B Bone™ quality. The spine is an original reproduction of all anatomical details with realistic weight. It consists of the male pelvis and occipital bone. Occipital bone and atlas can be detached individually from the spine for detailed study. Stand is sold separately, please see M-1000132 on page 38 to add to your order.
85 cm; 1.5 kg
M-1000157

3B Bone™ Child’s Vertebral Column Model
This true-to-life anatomical replica of the vertebral column of a child around 5 years of age is especially interesting for those working in the areas of anatomy, paediatrics, orthopaedics and paediatric radiology. The unique material of the spine model makes it almost visually indistinguishable from a real vertebral column.

It is particularly useful in studying the phases of bone growth:
• Vertebrae – partially incomplete development of vertebral bodies and vertebral arches
• Sacrum – as yet incomplete fusion of individual sacral vertebrae. This commences at around the age of 15
• Pelvis – still open Y cartilage as main growth plate of the acetabulum. The hip, pubic and ischial bone parts are not yet connected (didactically fixed with brackets in the model). These fuse around the age of 14-16.
M-1000118

› Excellent substitute for a real human spine!

**Classic Spines**

› Fully flexible spine models for hands-on demonstrations!

All models of the classic series are of the highest quality, made of an extremely durable material for everyday use. They are anatomically correct and precisely detailed, and show even the finest structures. Flexibly mounted for more realistic demonstrations.

Other features of all spines in the Classic Series include:
- Full pelvis and occipital plate
- Fully flexible mounting
- L3-L4 disc prolapsed
- Spinal nerve exits
- Cervical vertebral artery

**FLEXIBLE POSITIONING**

Highly Bendable Spine with Soft Intervertebral Discs
This high quality spine model shows how the discs deform during normal and abnormal positioning. It is a valuable tool to demonstrate pathological conditions such as scoliosis, lordosis, kyphosis, or subluxations. Herniation of the vertebral column can also be demonstrated with compression. The model comes complete with spinal cord and spinal nerves. The special mounting allows a clear view during demonstration and display of the spine. Delivered on removable stand.

26 x 25 x 90 cm; 3 kg
M-1008545

› Complete comparison guide for all spine models on page 38. Choose the right model for your individual needs.
Didactic Spines

Coloured for simplified education – visible even from a distance in the classroom!

Didactic Spine Model
The 5 different sections of the spinal column are differentiated by colour on these models:
- 7 cervical vertebrae
- 12 thoracic vertebrae
- 5 lumbar vertebrae
- Sacrum
- Coccyx
Didactic colours help to easily follow explanation about the human spine, even from a distance. They are extremely durable models of high quality.

Other great features of all spines in the Didactic Series include:
- Full pelvis and occipital plate
- Fully flexible mounting throughout spine
- L3-L4 disc prolapsed on spine
- Spinal nerve exits
- Cervical vertebral artery
- Didactic colouring
- Male pelvis

*Stands sold separately. Please see page 38 for details.
Advanced Spines

In addition to all features of the Classic Series, the Deluxe Series has a sacral opening and exposed brain stem for advanced studies of the anatomy of the human spine.

Other features of all spines in the Deluxe Series include:
- Sacral opening and exposed brain stem
- Extremely durable material for everyday use
- Full pelvis and occipital plate
- Fully flexible mounting throughout spine
- L3-L4 disc prolapsed on spinal column
- Spinal nerve exits
- Cervical vertebral artery
- Male pelvis

Deluxe Flexible Spine Model with Femur Heads*
Male pelvis with femur heads
83 cm; 2.1 kg
M-1000126

Deluxe Flexible Spine Model (not shown)*
Male pelvis
74 cm; 1.8 kg
M-1000125

Highly Flexible Spines

The spine models in the Highly Flexible Series are specially mounted on a flexible core, adding extra stability. This makes them ideal for active, hands-on use and demonstrations of movement, great for medical and patient education. These spines are extremely durable.

More features of spines in the Highly Flexible Series include:
- Complete pelvis and occipital plate
- Full flexible mounting throughout spine with added core for more stability
- L3-L4 disc prolapsed on spinal column
- Spinal nerve exits
- Cervical vertebral artery
- Male pelvis

Highly Bendable Spine Model with Femur Heads*
Male pelvis with femur heads
83 cm; 2.3 kg
M-1000131

Highly Bendable Spine Model (not shown)*
Male pelvis
74 cm; 1.4 kg
M-1000130
Classic Spine with Ribcage

Demonstrate the connection and interaction of the spine with individual ribs!

Classic Flexible Spine Model with Ribs and Femur Heads*
Flexible spine model with ribs show the interaction of individual ribs with the spine and associated structures.

This model includes the following features:
• Movable mounted femur heads
• Complete ribcage with individual mounted ribs
• Full pelvis and occipital plate
• Fully flexible mounting
• L3-L4 disc prolapsed
• Spinal nerve exits
• Cervical vertebral artery
• Male pelvis
83 cm; 3 kg
M-1000120

Easily demonstrate the relationship between bones and muscles

Muscled Spine Model
This Muscled Spine Model was designed by internationally acclaimed anatomy sculptor John Mitchell. Use it to quickly and easily demonstrate the relationship between bones and muscles in the spine. The muscles are made of soft polyurethane rubber and are attached with a sturdy elastic cord to the spine with anatomically correct positioning. Stand shown sold separately, please see page 38.
M-1018411

*Stands sold separately. Please see page 38 for details.
## Miniature Models

> Anatomically correct and flexible at a fraction of the size. Perfect for your desk or as a gift!

### Mini Human Spinal Column
The miniature model includes occipital plate of the skull, intervertebral discs, and pelvis. It is mounted flexibly to demonstrate natural movements and pathological changes.

Delivered without stand. 40 cm  
**M-1000042**

Delivered with stand. 44 cm

### Multifunctional Stand for Spinal Columns, 3 part
The stand can be placed on the floor or desk, or mounted on a wall. Measures 86 cm tall on a 24 cm square base. 0.75 kg  
**M-1000132**
Spinal Column Chart
The anatomy of the human spine is illustrated beautifully in this informative poster. The spinal column is depicted in detail and common pathologies are outlined, including osteoporosis, scoliosis, and disc herniation.
Laminated, 50 x 67 cm
M-1001480

Please go online to 3bscientific.com to browse the large selection of medical charts, or see pages 236 – 237.
All 3B Scientific® human skull models have been cast from real specimens, guaranteeing life-like detail and anatomical precision. You will see even the finest structures in these durable models made for everyday use!
+ Anatomical detail and precision
+ Realistically cast dentition
+ Durable, non-toxic material
+ Manufactured for everyday use

Other features of all skull models of the classic series include:
- Highly accurate representation of the fissures, foramina, processes, sutures etc.
- Mandible is mounted on a spring to easily demonstrate natural movement
- High quality original human skull cast
- Handmade from hard, unbreakable plastic

LIFE-LIKE DETAIL!

Classic Skull, 3-part
The 3-part standard version skull is an excellent choice for basic anatomical studies or an attractive medical gift. It can be disassembled easily into the skull cap, the base of skull and the mandible.
20 x 13.5 x 15.5 cm; 0.6 kg
M-1020159

Magnetic connections for easy, hands-on demonstrations

Classic Skull with Numbered Details, 3-part
In addition to the features of the classic skull, this version comes with hand-painted, numbered details: the different bones and features like the suture lines of the bony plates are highlighted for ease in identifying all important anatomical structures. This skull comes complete with a guide naming all numbered parts.
20 x 13.5 x 15.5 cm; 0.7 kg
M-1020165

Classic Skull with Painted Muscle, 3-part
In addition to all features of the classic skull, this version is didactically hand-painted to show the insertions and origins of the muscles on the left side of the skull. The cranial bones and structures are numbered on the right side. Altogether, over 140 anatomical details can be identified utilising this top quality model. The jaw hinges with a spring to simulate realistic movement. The detail and precision make it a great anatomy teaching tool!
20 x 13.4 x 15 cm; 0.7 kg
M-1020168
**Classic Skull with 5-part Brain**
The 5-part brain is midsagittally divided and is cast from an original specimen for anatomical accuracy and detail.

*The left side of the brain can be disassembled into the following parts:*
- Frontal and parietal lobe
- Temporal and occipital lobe
- Encephalic trunk
- Cerebellum
20 x 13.5 x 15.5 cm; 1.1 kg
M-1020162

**Classic Skull with Opened Lower Jaw, 3-part**
In addition to all features of the classic skull, this version includes an opened lower skull, making it perfect for teaching dental anatomy. The cranial bones, bone components, fissures, foramina and other structures are numbered for educational purposes. The cranial sutures are shown in colour, as are the meningeal vessels and venous sinuses. Over 100 features are identified in the accompanying product guide.
20 x 13.5 x 15.5 cm; 0.7 kg
M-1020166

**Classic TMJ Skull with Masticatory Muscles, 2-part**
Ideally suited for patient education, allied health instruction, anatomy studies, and as a medical-legal visual aid. In addition to all features of the classic skull model, this version includes the masticatory muscles (masseter, temporal, medial and lateral pterygoid muscles). They are made of durable, elastic bands for functional demonstrations of movement of the jaw: jaw occlusion, the initial stage of jaw opening, and the movements of the mandible to the side and front. This makes the skull a valuable tool for demonstrations about temporomandibular joint disorders both for patients and students. The skullcap is removable and the model is cast from an original specimen, guaranteeing a highly accurate anatomical representation.
20 x 13.5 x 15.5 cm; 0.7 kg
M-1020169

**Classic Skull, Painted, with Opened Lower Jaw, 3-part**
This deluxe version of the classic skull series combines the different features all in one! It is an extensive educational tool concerning the anatomy of the skull and includes the following features:
- Hand-painted muscle origins and insertions
- Opened lower jaw exposing dental roots, vessels and nerves
- Numbered parts for easy identification
- Highlighted suture lines of bony plates
- 3-part skull can easily be disassembled
- High quality, durable material for everyday use
- Movable lower jaw
20 x 13.5 x 15.5 cm; 0.7 kg
M-1020167

To see additional images and to zoom in on details, visit 3bscientific.com!
Human Skull Models on Cervical Spine, 4 part
Flexibly Mounted on the Cervical Spine
(C1, C2 and C7 are coloured in the didactic version) to better show their relation. To complete this demonstration, the models also exhibit the hindbrain, spinal cord, spinal nerves of the cervical spine, vertebral arteries, basilar artery as well as the rear cerebral arteries.

Manufactured to the highest quality standards:
• Anatomically precise cast from original human skull
• Handmade from extremely durable, non-toxic plastic
• Highly accurate representation of the fissures, foramina, processes, and sutures
• Magnetic connections: can easily be disassembled into skullcap, base of skull and mandible

Beauchene Adult Human Skull Models, 22 part
The human skull consists of many individual bones that gradually grow together as the development proceeds. This human skull kit is a natural cast that makes the complex anatomical structures of the skull easy to understand. The skulls can be taken apart into the following 22 bones:
• Parietal bone (left and right)
• Occipital bone
• Frontal bone
• Temporal bone (left and right)
• Sphenoid bone
• Ethmoid bone
• Vomer bone
• Zygomatic bone (left and right)
• Upper jaw (maxilla) with teeth (left and right)
• Palatine bone (left and right)
• Nasal concha (left and right)
• Lacrimal bone (left and right)
• Nasal bone (left and right)
• Lower jaw (mandible) with teeth

A. Didactic Human Skull Model on Cervical Spine, 4 part
This didactic skull model utilises 19 distinctive colours to represent the shapes and relationships of the various bone plates of the skull.
Mounted on stand.
17.5 x 17.5 x 30 cm; 0.6 kg
M-1020161

B. Human Skull Model on Cervical Spine, 4 part, naturally coloured in bone like shades
Mounted on stand.
20 x 13.5 x 15.5 cm; 0.6 kg
M-1020160

C. Beauchene Adult Human Skull Model – Didactically Coloured, 22 part
The 22 bones are depicted in 9 different didactic colours so that the individual skull bones are easy to distinguish.
21 x 14 x 16 cm; 0.7 kg
M-1000069

D. Beauchene Adult Human Skull Model – Bone Coloured, 22 part
This version of the 22-part Beauchene skull has the same features as the didactic version, but is coloured like natural bone.
21 x 14 x 16 cm; 0.7 kg
M-1000068
Deluxe Human Demonstration Dental Skull Model, 10 part

Exceptional quality and anatomical detail!
The skullcap is removable and the base of the skull is mid-sagitally divided.
The anatomy of the human skull is easy to learn and teach using this model.

The model features the following details fitted with flaps that can be opened to view internal structures:
- Frontal sinus, perpendicular lamina and vomer can be opened to view the lateral nose wall and sphenoidal sinus
- Left side temporal bone can be removed and folded up in the area of the tympanic membrane
- Maxilla and mandible of the skull are opened to reveal the alveolar nerves
- Right side the temporal bone is opened to reveal the sigmoid sinus, the facial nerve canal and the semicircular ducts
- Right side flap at maxillary sinus and the right half of the mandible, so that the dental roots of the premolars and molars of the lower jaw can also be viewed

The natural occlusion and the individual removal and replacement of each tooth also make this skull especially interesting for dentists. This is a spectacular model whether you use it as a dental skull or for other purposes.
28 x 22.5 x 18.5 cm; 1.5 kg
M-1000059

Skull with Facial Muscles
Easily demonstrate causes of temporo-mandibular disorders and other dysfunctional disturbances of the masticatory muscles with this high quality skull model. It is anatomically precise and manufactured specifically to withstand wear and tear from educational use. The right half features the face and mastication muscles. They can easily be differentiated by colour. Cranium and m. masseter are easily detachable to reveal the structures underneath. The left side shows hand-painted muscle origins and insertions to further clarify the structural interaction of muscles and skull bones. The jaw is movable and due to the flexible musculature the rudimentary chewing motion can be demonstrated. Made in Germany and cast from an original human skull, using our highest quality material.
18 x 18 x 25 cm; 1.08 kg
M-1020181

Neurovascular Skull Model
This life size human adult skull comes on seven cervical vertebrae and is mounted on a sturdy stand. It is a valuable tool to demonstrate the anatomy and positioning of the arteries and the nerves on the skull. The skull cap is removable and reveals the main nerves and arteries on the floor of the cranium. With this skull, you can demonstrate the 12 cranial nerves (and their branches) that arise directly from the brain and pass through separate apertures in the skull.
17 x 16 x 30 cm; 1.3 kg
M-1005108
3B BONElike™ Half Transparent Human Skull Model, 7-part
This worldwide unique and high quality didactic skull is a great tool to understand the anatomy of all structures inside the skull.

The possibility to transfer the visible parts in the transparent half to the bony half gives this skull an additional didactic value:
• Transparent side helps understand the internal anatomy of the skull
• Sinuses and arteries are marked in colour for easy identification
• Can easily be disassembled into 7 parts for close up study
• 3B BONElike™ material looks and feels real

Through the transparent right half of the skull, you can easily locate the paranasal and the cranial sinuses, as well as the neck and face arteries, as all of these are colour-coded. Through the skull-cap, the position of the brain and the course of the sinuses can be visualised. The periodontal pockets and tooth roots can be viewed through the transparent side of the jaw, which is mounted flexibly to demonstrate the masticatory movements of the human skull. The skull is mounted on a cervical spine and can be disassembled into both halves of the skullcap, the left half of the base of skull, the nasal septum, the complete mandible and a brain half.

18 x 18 x 34 cm; 0.86 kg
M-1000064

3B BONElike™ Half transparent Human Skull Model, 8-part
One half of this skull is transparent and the other is bony. It offers a topographic comparison of structures that are not visible in other skull models. The teeth can be taken out and the outer masticatory muscles are represented on the bony half. Can be disassembled into both halves of the skullcap and base of skull, the nasal septum, the complete mandible and both masticator muscles.

16 x 14 x 20.5 cm; 0.54 kg
M-1000063

3B BONElike™ Human Bony Skull Model, 6-part
This version shows a complete skull in median-sagittal section.

It can be disassembled into two halves consisting of:
1) the calvarium and the base of the skull
2) the nasal septum and complete mandible
For a demonstration of masticatory motion, the mandible is mounted flexibly.

16 x 13.5 x 20.5 cm; 0.5 kg
M-1000062
**Foetal Skull Model**
Natural cast of a foetal head in the 30th week of pregnancy showing the characteristics of prenatal development. The fontanelles, which become bone over time, are clearly visible on the skull. Sutures will form along the bony plates helping fuse the skull as the individual ages. Delivered on stand.
18.5 x 14.5 x 14 cm; 0.2 kg
M-1000058

**Foetal Skull Model, without stand (not shown)**
14 x 9 x 9 cm; 0.15 kg
M-1000057

**Skull with Cleft Jaw and Palate**
This skull model depicts a male with a severe malformation of the left skull half with a cleft jaw and palate. The one-part skull has 29 teeth and is natural cast.
28 x 23 x 19.5 cm; 0.8 kg
M-1000067

**Glow in the Dark Skull Model**
All anatomical details are not only true to life, but also glow in the dark!
Great as a gift for those students or friends needing a flash of inspiration.
20 x 13.5 x 15.5 cm; 0.6 kg
M-1020163

**Mini Human Skull Model, 3 part**
It precisely depicts the anatomical structures of the human skull in a manner that is true to detail and can be disassembled into skullcap, base of skull and mandible.
10 x 8 x 8 cm; 0.1 kg
M-1000041

**Transparent Classic Human Skull Model, 3 part**
A great addition to any educational collection! Use this unique transparent replica of the human skull to study internal structures!
• High-quality original casts
• Skull is handmade of hard, unbreakable plastic
• Highly accurate representation of the fissures, foramina, processes, sutures
• Can be disassembled into Skull Cap, Base of Skull and Mandible
• A 5-part classic brain can be inserted into the skull. See page 66 for details.
20 x 13.5 x 15.5 cm; 0.6 kg
M-1020164

**Magnetic connections for easy, hands-on demonstrations**
Life-Size Male Muscle Figure, 37-part

This life-size human muscular model shows the deep and superficial musculature of the entire body in great detail. The extraordinary accuracy of the human muscular system makes this masterpiece a unique tool for instructions even in large lecture halls. It is manufactured to precise anatomical detail, is made from a durable, non-toxic plastic and painted in didactic colours. Comes on a sturdy base, slightly raised for better visibility.

The following parts can be removed for close up study:

- Skull cap
- 6-part brain
- Eyeball
- Breast and abdominal wall
- Both arms
- 2-part larynx
- 2 lungs
- Diaphragm
- 2-part stomach
- Liver with gall bladder
- Kidney
- Whole intestine system
- Bladder half
- 2-part penis
- 10 muscles (Three arm and leg muscles, 2 thoracic muscles, sternocleidomastoid muscles and gluteus maximus)

180 x 110 x 50 cm; 53 kg
M-1001235
3/4 Life-Size Dual Sex Muscle Figure, 45-part
This muscle figure is the finest teaching tool available! Standing over 4 1/2 feet tall, this 3/4 life-size human replica depicts deep and superficial musculature in amazing detail and realistic colour in addition to the body’s major nerves, vessels, tissues and organs in exquisite detail. The internal organs are removable (45 parts in total) to reveal the fundamental interrelationships of human morphology. This dual sex muscle figure has interchangeable genital inserts and a female mammary gland as well as a detailed multilingual product manual identifying over 600 numbered structures, explained in the included guide. Hand-painted and mounted on a stable metal stand.

Includes the following features:
• 5 arm/shoulder muscles
• 8 leg/hip muscles
• 2-part removable heart
• 5-part head with removable brain
• 2-part removable lungs
• 2-part stomach
Removable 4-part male and 2-part female genital inserts
Detachable arms, leg, head, and abdominal wall for detailed study

Hands-on anatomy education at its best: Easily remove the calvarium to view the 3-part removable brain. Look beneath the liver to reveal the gallbladder and bile duct. Peer inside the appendix, stomach lungs, heart or kidney. Remove and view the details of 13 different muscles of the arms and legs. 138 x 50 x 32 cm; 12.4 kg
M-1013881

3/4 Life-Size Female Muscle Figure, 23-part (not shown)
This Female Muscle Figure provides the same quality characteristics as the dual sex model above but is delivered without internal organs, brain, and male genitalia providing for unobstructed study of the human musculature.

The female muscle figure includes the following features:
• 5 arm/shoulder muscles
• 8 leg/hip muscles
• Detachable arms, leg, head and abdominal wall for detailed study
138 x 45 x 32 cm; 11.2 kg
M-1013882

3/4 LIFE-SIZE MODEL
A space saving alternative with amazing detail at half life-size!

1/2 Life-Size Complete Dual Sex Muscle Figure, 33-part
This convenient and complete human musculature model is the perfect choice for thorough demonstrations of human musculature and internal organs where space is a concern. Exquisitely hand-detailed and complete with 33 removable parts, this human muscular figure represents the finest quality at an affordable price. Painted by hand in realistic colours, this human anatomy model comes complete with stand and detailed multilingual product manual.

Includes the following removable parts:
- 5 arm/shoulder muscles
- 8 leg/hip muscles
- 2-part heart
- 2-part brain
- 2 lungs
- 2-part male and 2-part female genital inserts
- 2-part intestine system
- Detachable breast/belly covering and arms for detailed study
- Almost 400 numbered structures identified in the manual
84 x 30 x 30 cm; 4.95 kg
M-1000210

1/2 Life-Size Complete Female Muscle Figure, 21-part (not shown)
Offering the same exceptional value as the dual sex version above, this version is delivered without internal organs, brain and male genitalia.
84 x 30 x 30 cm; 4.1 kg
M-1000211
Musculature Models | HUMAN ANATOMY

Life-Size Dual Sex Human Figure, 39-part
This life-size, dual sex model facilitates an understanding of human anatomy like no other human anatomy model in the world! One half exposes the musculature, while the other shows the skin for a more realistic effect that puts the human touch back in. The figure can be disassembled easily to show the inner structures and organs in amazing detail.

Altogether, 39 component parts can be removed:
- 2-part head
- Brain half
- M. Sternocleidomastoid
- M. Deltoideus
- M. Biceps brachii
- M. Triceps brachii
- M. Palmaris longus with m. Flexor carpi radialis
- M. Brachioradialis with m. Extensor carpi radialis
- Skin of the left arm
- Muscled leg, upper part
- Muscled leg, lower part
- Skin of the left leg
- Abdominal cover
- Mammary gland
- 2 removable lungs
- 2-part removable heart
- Removable Liver
- 2-part removable stomach
- Removable kidney half
- 4-part removable intestines
- 3-part female genital insert with embryo
- 4-part male genital
- M. Sartorius
- M. Gluteus maximus
- M. Rectus femoris
- M. Gastrocnemius
- M. Biceps femoris cap. L. with m. semitendinosus

Life-Size Dual Sex Asian Human Figure, 39-part
Same features as M-1000209 above, but with Asian appearance.
174 cm; 40.7 kg
M-1000208

1/3 Life-Size Muscle Figure, 2-part
The ⅓ life-size mini muscle figure shows the superficial musculature. It is accurately reproduced and detailed in life-like. The chest plate is removable from the muscular figure to reveal the internal organs and the right side contains a female mammary gland. 125 numbered and identified structures of the human anatomy on base.
57 x 25 x 18 cm; 2.1 kg
M-1000212
**Life-Size Lower Muscle Leg with Detachable Knee, 3-part**
Life-size replica of lower leg, ankle, and foot. On removable base for close up study.

**Features of the lower muscular leg:**
- Detachable knee cross section to expose the articular surfaces
- Detachable gastrocnemius muscle

58 cm; 2.6 kg

M-1000353

---

**Life-Size Deluxe Muscle Leg, 7-part**
Extremely detailed model, shows even the finest structures. This life-size muscular leg model can be disassembled into upper and lower leg.

**The following muscles can be detached from the leg:**
- Long head of biceps femoris muscle with semitendinous muscle
- Sartorius muscle
- Gluteus maximus muscle
- Rectus femoris muscle
- Gastrocnemius muscle

This high quality muscular leg model is supplied on a base.
100 cm; 7 kg
M-1000352

---

**3/4 Life-Size Muscle Leg, 9-part**
The muscular leg model illustrates both the superficial and deeper muscles, eight of which are removable. Tendons, vessels, nerves and bone components of the left leg and foot are shown in great detail. All parts are **numbered for easy identification.**
Delivered on removable stand.
77 x 26 x 26 cm; 4 kg

M-1000351
Life-Size Deluxe Muscle Arm, 6-part

The following muscles can be detached in this life-size muscular arm model:
- Deltoid muscles
- Biceps muscle of arm
- Triceps muscle of arm
- Long palmar muscle with radial flexor muscle of wrist
- Brachioradial muscle with radial extensor muscle of wrist

Supplied on base. 70 cm; 3 kg
M-1000347

Illustrates both the superficial and deeper muscles in amazing detail!

3/4 Life-Size Muscle Arm, 6-part
This ¾ life-size muscled arm model illustrates both the superficial and deeper muscles, five of which are removable. Tendons, vessels, nerves and bone components of the left arm and shoulder are shown in great detail on this high quality muscle model. Over 70 numbered parts for easy identification, named in the accompanying product manual. Delivered on removable stand.
60 x 18 x 18 cm; 1.9 kg
M-1000015

3B MICROanatomy™ Muscle fibre 10,000 times magnified
Illustrates a section of a skeletal muscle fibre and its neuromuscular end plate. The muscle fibre is the basic element of the diagonally striped skeletal muscle. This high quality muscle fibre replica brings a hands-on understanding of the human muscle to any classroom.
23.5 x 26 x 18.5 cm; 1.1 kg
M-1000213

3B MUSCLEtrainer™
Includes 248 high quality digital images, 241 muscles and more than 200 associated anatomical structures. Languages: English, French, Spanish, Portuguese, German, (Latin). Please see 3bscientific.com for system requirements.
M-1002489
High quality models at great prices! 3B Scientific® torso models are:
• Non-toxic, extremely durable material for hands-on demonstrations
• Hand-painted to show every detail in realistic colours
• Anatomical precision for medical education on every level

Choose from a variety of torsos with different features depending on your needs:
• Male
• Female
• Dual sex
• Different ethnicities
• Focusing on varying aspects of anatomy

Please visit 3bscientific.com for additional images and to zoom in on more detail.

See pages 58 and 59 for a detailed feature comparison of all torso models.

Life-Size Muscle Torso, 27-part
This life-size muscle torso shows the deep and superficial muscles in great anatomical detail. Its anatomical precision and realism make it an outstanding tool for demonstration even in large lecture halls.

For detailed study and to reveal inner structures, the following pieces can be removed easily:
• Skull cap
• 6-part brain
• Eyeball with optic nerve
• Chest/abdominal wall
• 2-part larynx
• 2 lungs
• 2-part heart
• Diaphragm
• 2-part stomach
• Liver with gallbladder
• Complete intestinal tract with appendix
• Front half of kidney
• Half urinary bladder
• 4 muscles

Delivered on sturdy base.
95 x 60 x 35 cm; 14 kg
M-1001236
**Dual Sex Torso, 24-part**

This life-size human torso model offers impressive detail with 24 removable parts. Use it to answer all questions regarding internal human anatomy. Manufactured for everyday use, extremely durable material for a long lasting demonstration model.

For close-up study the following parts and organs can be removed:

- 3-part head
- 2-part stomach
- 4-part intestinal tract
- Female chest wall
- 2 lungs
- 2-part heart
- Liver with gall bladder
- Front half of kidney
- 4-part male genital insert
- 3-part female genital insert with foetus

Hand painted in realistic colours, delivered complete with the 3B Scientific® Torso Guide and mounted on sturdy base. Light skin.

87 x 38 x 25 cm; 7.5 kg  
M-1000196

**Dual Sex Torso, Dark Skin, 24-part**

This life-size, deluxe human torso model comes with all features of the Dual Sex Torso, 24-part (M-1000196) but with dark skin.

87 x 38 x 25 cm; 7.3 kg  
M-1000197

**Dual Sex Torso, 20-part**

Detailed demonstration model for human anatomy focussing on inner organs. All parts are easy to remove and the torso can be switched from male to female easily!

This life-size, high quality human torso contains these removable parts and organs:

- 2-part head
- Female chest wall
- 2 lungs
- 2-part heart
- Stomach
- Liver with gallbladder
- 2-part intestinal tract
- Front half of kidney
- 4-part male genital insert
- 3-part female genital insert with foetus

All organs are hand painted for a quality product with realistic colours. Delivered on sturdy base and complete with the 3B Scientific® Torso Guide. Light skin.

87 x 38 x 25 cm; 7.3 kg  
M-1000197

**Asian appearance, 18-part**

Delivered with 1-part head and without female chest wall, all other features like the Dual Sex Torso, 20-part. M-1000197.  
M-1000199
**Dual Sex Torso with Opened Back, 28-part**

This life-size human torso model comes complete with removable male and female genital inserts, **opened neck and back section to study vertebrae, intervertebral discs, spinal cord, spinal nerves and vertebral arteries**, and a deluxe head with a 4-part brain.

**The following parts and organs can be removed for detailed study:**
- 7th thoracic vertebra
- Female chest wall
- 6-part head (incl. 4-part brain)
- Female breast covering
- 2 lungs
- 2-part heart
- 2-part stomach
- Liver with gallbladder
- 4-part intestinal tract
- Front half of kidney
- 4-part male genital insert
- 3-part female genital insert with foetus

Comes complete with the 3B Scientific® Torso Guide, delivered on sturdy base. Light skin.

87 x 38 x 25 cm; 7.6 kg

M-1000200

---

**Dual Sex Muscle Torso, 31-part**

This life-size torso depicts both the superficial and deep muscles in great detail. The two main muscles, the deltoid and gluteus maximus can easily be removed for closer studies. You can also study the vertebrae, the spinal cord, spinal nerves and vertebral arteries, exchange the male and female genital inserts, discover the internal structures of the brain and much more.

**The following parts can be removed:**
- 6-part head
- Chest and abdominal wall with muscles
- 7th thoracic vertebra
- Female mammary gland
- Gluteus maximus and deltoid muscle
- 2 lungs
- 2-part heart
- 2-part stomach
- Liver with gallbladder
- 4-part intestinal tract
- Front half of kidney
- 3-part female genital insert with foetus
- 4-part male genital insert

87 x 38 x 25 cm; 8.5 kg

M-1000203
Dual Sex Torso with Muscle Arm, 33-part

A worldwide unique feature of this life-size torso is the removable 6-part muscle arm. This top of the line model fully represents the anatomy of the complete human upper body. Its great detail makes it especially suitable for the high levels of medical education. The right half shows the skin, the left half the superficial and deeper muscles with nerves, vessels and bony structures. The versatility of this aesthetically designed model is rounded off by the exact representation of the internal organs.

The following parts can easily be removed for closer study:

- 2-part head
- Brain half
- Sternocleidomastoideus muscle
- 6-part muscle arm (removable Muscles: deltoid, biceps brachii, triceps brachii, palmaris longus with flexor carpi radialis, brachioradialis with extensor carpi radialis)
- Upper leg stump
- Chest/abdominal wall with detachable mammary gland
- Torso body
- 2 lungs
- 2-part heart
- Liver with gallbladder
- 2-part stomach
- Kidney half
- 4-part intestinal tract
- 3-part female genital insert with foetus
- 4-part male genital insert

Hand-painted for great detail and realistic colours, delivered on sturdy base. Includes the 3B Scientific® Torso Guide. Light skin.

90 cm; 22.8 kg
M-1000205

Asian Dual Sex Torso with muscular arm, 33-part

This life-size human torso models comes with all features of the M-1000205 Dual Sex Torso with Muscle Arm (see right), but in Asian appearance.

90 cm; 22.8 kg
M-1000204
Classic Gender Neutral Torso, 12-part
This gender neutral, life-size torso is hand-painted, true to detail, and made of high-quality plastic.

The following components are removable and reveal the inner anatomy:
- 2-part head
- 2-part removable heart
- 2 lungs
- Stomach
- Liver with gallbladder
- 2-part intestinal tract
- Front half of kidney
87 x 38 x 25 cm; 4.6 kg
M-1000186

Classic Gender Neutral Torso, 14-part
This 14 part anatomically correct human torso model is an educational tool of true quality. The gender neutral torso is hand-painted in true to life detail and made of high-quality plastic for hands-on education. It is mounted on a sturdy base so students can safely disassemble it.

The following parts can be removed:
- 3-part head
- 2 lungs
- 2-part heart
- Stomach
- Liver with gallbladder
- 2-part intestinal tract
- Front half of kidney
- Front half of urinary bladder
Includes 3B Scientific® Torso Guide. Light skin.
87 x 38 x 25 cm; 5.9 kg
M-1000190

Classic Gender Neutral Torso, 16-part
This life-size human torso model comes with 16 removable parts, each hand-painted for amazingly realistic details.
- Hand-painted for realistic colours and amazing detail
- Made of durable, high quality plastic
- 16 removable parts for closer study

The torso model contains the following removable parts:
- 3-part head
- 2 lungs with sternum and rib attachments
- 2-part heart
- Stomach
- Liver with gallbladder
- 4-part intestinal tract
- Front half of kidney
- Front half of urinary bladder
Includes 3B Scientific® Torso Guide. Mounted on sturdy base for hands-on education. Light skin.
87 x 38 x 25 cm; 6.8 kg
M-1000188
Classic Gender Neutral Torso with Opened Neck and Back, 18-part
This human gender neutral torso model has the unique feature of an open neck and back section going from the cerebellum to the coccyx (see image on page 54). Vertebrae, intervertebral discs, spinal cord, spinal nerves, vertebral arteries, and many other features are represented in detail in this hand-painted and highly detailed model.

Includes the following removable parts and organs:
- 7th thoracic vertebra removable
- 6-part head
- 2 lungs
- 2-part heart
- Stomach
- Liver with gallbladder
- 2-part intestinal tract
- Front half of kidney
- Front half of urinary bladder

Includes 3B Scientific® Torso Guide. Mounted on sturdy base for hands-on education. Light skin.
87 x 38 x 25 cm; 5.8 kg
M-1000193

Classic Gender Neutral Torso with Open Back, 21-part
This top of the line gender neutral torso comes with additional removable parts and an opened back section going from the cerebellum to the coccyx. Vertebrae, intervertebral discs, spinal cord, spinal nerves, vertebral arteries, and many other features are represented in detail in this detailed replica of the human anatomy. It is mounted on a sturdy base for safe anatomical demonstrations.

The following parts and organs can easily be removed:
- 7th thoracic vertebra removable
- 6-part head
- 2-part stomach
- Lungs
- 2-part heart
- Liver with gallbladder
- 4-part intestinal tract
- Kidney half
- Bladder half
- Open back
- Brain

Includes 3B Scientific® Torso Guide. Light skin.
87 x 38 x 25 cm; 6.5 kg
M-1000192
MRI Torso, 15 Transverse Sections
This unique MRI torso is horizontally sectioned into 15 slices, giving a distinctive view of human anatomy. The topographical relationships of the torso are represented as coloured reliefs on the individual sectional planes. For a closer study of the internal anatomy of the torso, each disc can be shifted horizontally and rotated around its sagittal axis. Each disc within the MRI torso can be individually removed. The results are a brand new understanding of human anatomy that is both interesting and engaging for students. This MRI torso is a great addition to any medical classroom!
130 x 40 x 35 cm; 19 kg
M-1001237

Heavy Duty Protective Cover for Torsos
Protect your investment with this heavy duty protective cover for your torso models. Suitable for all full-size torsos. Zippered with reinforced easy-carry handle. Black.
M-1020762

You will find a learning card for every disc inside the product manual.

Looking for a smaller alternative for your desk?

**Mini-Torso, 12-part**
At approximately half life-size, this mini human torso model still shows great detail!

*The following parts can be removed:*
- 2-head halves
- Brain half
- 2 lungs
- 2-part heart
- Stomach
- Liver with gallbladder
- 2-part intestinal tract

If you want quality on a budget this mini torso model is for you! All parts are numbered and identified on the included product manual.

54 x 24 x 18 cm; 1.89 kg

**M-1000195**

**3B Scientific® Torso Guide (not shown)**
Already included with most torso model purchases.
- Brilliantly coloured pictures of each part of the torso, explaining even the smallest structures
- Includes teaching tips to create even more interesting lessons
- Complete in 7 different languages (Latin, English, German, Spanish, Portuguese, French, Japanese)
- Includes CD-ROM in pdf-format to assist in creating tests or preparing lessons

**M-1000183**

**3B Scientific® Torso-Classroom Set (not shown)**
Includes 33 brilliant overhead-foils with coloured pictures of each part of the torso.

**M-1000184**

See website for more details.
Skin Model, 3-part
The skin is shown 80 times magnified, so even the smallest structures can be seen in detail. It can be taken apart easily thanks to magnetic connections for better demonstration, and represents the three most important sections of skin:
- Palm of the hand
- Back of the hand
- Scalp
34 x 39 x 15.5 cm; 2.05 kg
M-1000294

Skin Model, 70 times Full-Size
This distinctive model shows a section of human skin in three dimensional form. Individual skin layers are differentiated and important structures such as hair, sebaceous and sweat glands, receptors, nerves, erector pili muscles and vessels are shown in great detail.
Mounted on baseboard.
44 x 24 x 23 cm; 3.6 kg
M-1000291
Skin, Hair and Nail Microscopic Structures
This model shows the microscopic structure of the skin in great detail. Both hairless and hairy skin structure are shown as well as the different cell layers of the skin, embedded sweat glands, touch receptors, blood vessels, nerves, erector pili muscle, and a hair follicle. Additionally, it includes a section of nail depicting the nail plate, bed, and root, as well as a representation of a hair root with all of its cellular layers. 10 x 12.5 x 14 cm; 0.35 kg M-1000292

Skin Section, 40 times Full-Size
The two halves of this relief model show the three layers of hairy and hairless skin in order to make the differences clear. Detailed with hair follicles, sebaceous glands, sweat glands, receptor, nerves, erector pili muscles and vessels. Mounted on a base. 24 x 15 x 3.5 cm; 0.2 kg M-1000290

Skin Section, 70 times Life-Size
This relief model shows a section through the three layers of the hair-covered skin of the head:
- Sweat glands
- Vessels
- Receptors
- Nerves
- Representation of hair follicles with sebaceous glands
Delivered on base. 10.2 x 13.0 x 2.0 in; 1 kg M-1000289

Skin Cancer Model
In the top view of the skin cancer model, the individual stages of externally visible skin changes are shown, allowing for an assessment according to the ABCDE criteria. The sides of the skin cancer model show the various levels of invasion into the skin layers according to Clark (I-V) and the tumour thickness according to Breslow (in mm). Five original colour illustrations on the base of the skin cancer model show various types of malignant melanomas. Comes mounted on a base. 14 x 10 x 11.5 cm; 0.2 kg M-1000293

The Skin
The anatomy of the human skin, including all skin layers, as well as some common skin pathologies are displayed. Laminated. 50 x 67 cm M-1001512

3B Scientific® Chart – Skin
The poster displays the microscopic of the skin in such a colorful and large way that it is easy to understand and study. Mounted. 84 x 200 cm M-1001177
HEAD & BRAIN MODELS

You can depend on 3B Scientific® anatomical models:
+ Carefully cast and hand-painted by skilled craftsmen
+ Manufactured to precise anatomical details
+ Extremely durable thanks to high quality material
+ Non-toxic for everyday, hands-on use

Head with Neck, 4-part
This life-size and detailed head model is midsagittally sectioned, and while the right size shows a realistic looking face, the left side reveals the muscles, nerves, vessels, and bony structures of the head. For in depth study, the model contains a removable brain half. The neck detachable and sectioned both horizontally and diagonally. Caucasian appearance, supplied on baseboard.
26 cm; 2.2 kg
M-1000216

Asian Head with Neck, 4-part
Same features and details like the M-1000216 but with Asian appearance. Supplied on baseboard.
26 cm; 2.2 kg
M-1000215
Head and Neck Musculature, 5-part
This model shows a realistic representation of the superficial musculature and deep muscles, nerves and vessels of a human head and neck in life-size. It can easily be disassembled into skull cap and 3-part brain. Anatomical details are painted on the model for easy identification with the help of the product manual. On base. 36 x 18 x 18 cm; 1.8 kg
M-1000214

Half Head with Musculature
This high quality model represents the outer, superficial and the internal (median section) structures of head and neck. The half head with musculature is delivered on removable stand for easy display in a classroom or doctor’s office. Presents the important anatomical structures. 22 x 18 x 46 cm; 1.1 kg
M-1000221

A. Median Section of the Head
Relief median section of the head shows all relevant structures of the human head in great detail. Delivered on a baseboard. 26 x 33 x 5 cm; 1 kg
M-1000219

B. Head Section Model
Frontal section through the human para-nasal sinuses covered with mucous membrane. Signs of sinusitis (paranasal sinus inflammation) on the right, with normal ventilation of the left side. Delivered on baseboard. 41 x 31 x 5 cm; 1.45 kg
M-1012789

C. Median and Frontal Section of the Head
The two relief models show the median and frontal section of the head. The two views of this high quality model show all important anatomical structures of the head in full detail. They include cross sections of the brain, spinal cord, and sinuses of the human head. Delivered on baseboard. 41 x 31 x 5 cm; 1.45 kg
M-1000220

Includes 3-part brain and numbered details!
Head Musculature
This head model represents the superficial musculature of head and neck, showing:
- Parotid gland
- Submandibular gland
- Deep musculature
- Lower jaw partially exposed
Mounted on base.
24 x 18 x 24 cm; 1.2 kg
M-1001239

Head Musculature with Blood Vessels
In addition to the features of the classic head musculature model, this version also shows the blood vessels on the head. Mounted on base.
24 x 18 x 24 cm; 1.2 kg
M-1001240

Head Musculature with Nerves
In addition to the classic head musculature model, this version also shows the nerves on the head. Mounted on base.
24 x 18 x 24 cm; 1.2 kg
M-1008543

Great tools for education on the human nervous system and anatomy of the brain!
**A. Brain with Arteries on Base of Head, 8-part**
This deluxe brain comes with an opened head to allow detailed study of the brain’s position in the skull. The head is horizontally divided above the skull base. The brain is divided medially, with a removable basilar artery.

*Both halves can be divided into:*
- Frontal parietal lobes
- Temporal with occipital lobes
- Half of brain stem
- Half of cerebellum
On base.

15 x 15 x 23 cm; 1.6 kg
M-1017869

**B. Brain with Arteries, 9-part**
This brain model is a great tool for education on the human nervous system and anatomy of the brain. Delivered on a removable base for easy display in the classroom.

15 x 14 x 16 cm; 0.9 kg
M-1017868

**C. Head Model, 6-part**
This head model meets the highest standard requirements of medical education!
It is life-size, comes with 6 removable parts and is mounted on a base. Included is a removable 4-part brain half with arteries. The eyeball with optic nerve is also removable for detailed study. One side exposes the nose, mouth cavity, pharynx, occiput, and skull base.

19 x 23 x 22 cm; 1 kg
M-1000217

**D. Head and Neck, 5-part**
This model shows a medially divided representation of the head. The skin and facial muscles of the right outer half are removed to show the deeper structures. The eyeball, the bone cover over the sinus maxillaries and the right tongue half are removable for detailed study. The parts are differentiated in colour.

38 x 36 x 25 cm; 3 kg
M-1005536
3B Scientific® brain models have been cast from real specimens and accurately represent even the finest structural details.
+ Magnetic connections for easy demonstrations
+ Highest quality material for long lasting models
+ Hand-painted and manufactured to precise anatomical detail

To see additional images and to zoom in on details, please visit 3bscientific.com.

Classic Brain, 5-part
This midsagittally sectioned model is an original anatomical cast of a real human brain.

The components of the brain’s left half are:
• Frontal and parietal lobe
• Temporal and occipital lobe
• Encephalic trunk
• Cerebellum
Delivered on removable stand.
13 x 14 x 17.5 cm; 0.9 kg
M-1000226

Compatible with the following skull models:
M-1020159, M-1020163, M-1020164, M-1020165, M-1020166, M-1020167, M-1020168, M-1020169
(see pages 40, 41, 45)
**Introductory Brain Model, 2-part**
This basic brain is medially divided, anatomically accurate, and life-size! The structures of the brain are shown in one colour, providing an introduction to the human nervous system and anatomy of the brain. Structures of the brain are not labelled or numbered. This introductory brain is delivered on removable base.

15 x 14 x 17.5 cm; 0.7 kg

M-1000223

---

**Brain Model, 2-part**
Contrasting colours are used to indicate various anatomic structures in this medially divided human brain, making this high quality model perfect for beginning anatomy studies of the human brain. On removable base.

15 x 14 x 17.5 cm; 0.7 kg

M-1000222

---

**Brain Model, 4-part**
This 4-part brain is medially divided. All structures of the brain are hand-painted, numbered and identified in a product manual.

The brain’s right half can be disassembled into:
- Frontal with parietal lobes
- Brain stem with temporal and occipital lobes
- Half of cerebellum

Delivered on a removable base.
14 x 14 x 17.5 cm; 0.9 kg

M-1000224

---

**Brain Model, 8-part**
A very detailed model of the human brain which is medially divided.

Both halves of this brain can be disassembled into:
- Frontal with parietal lobes
- Temporal with occipital lobes
- Half of brain stem
- Half of cerebellum

Delivered on a removable base.
14 x 14 x 17.5 cm; 0.9 kg

M-1000225
Neuro-Anatomical Brain, 8-part
This deluxe brain is medially divided. On the right half of this brain, you will find a systematically coloured grouping and representation of the cerebral lobe.

The left half of the brain shows:
• Pre- and post-central region
• Broca and Wernicke areas
• Heschl’s gyrus
• Brain nerves
• Ventricles

Both halves of this brain can easily be disassembled into:
• Frontal with parietal lobes
• Temporal with occipital lobes
• Half of brain stem
• Half of cerebellum
Delivered on a removable base.
14 x 14 x 17.5 cm; 0.95 kg
M-1000228

Brain Section Model
An enlarged and very detailed section through the right half of the brain, including a portion of the skull. The pia mater has been removed. This model is double sided and finely coloured. One surface is on the median line, including a section of the falx cerebri. A sagittal cut on the reverse side exposes the lateral ventricle. There are 49 references on the model, identified in English on an accompanying product manual. Mounted on a stand.
25 x 18 x 12 cm; 0.9 kg
M-1005113

Cerebrospinal Fluid Circulation
Enlarged, detailed model of a section through the right half of the brain showing the cut pia mater, arachnoid and dura mater. The model has the cerebrospinal fluid areas clearly identified and the direction of flow indicated by arrows. Bright colours distinguish important features; identified in English in an accompanying product manual. Mounted on stand.
25 x 18 x 12 cm; 0.9 kg
M-1005114

Brain Ventricle
This model shows both side ventricles of the brain, the 3rd and 4th ventricle and the Aquaeductus cerebri (Sylvius). The brain ventricles are life-size and the model is delivered on stand.
14 x 11 x 14 cm; 0.6 kg
M-1001262
Rat Brain Comparative Anatomy
Enlarged roughly six times, and medially sectioned, the rat brain model can be disassembled into two halves. The right half of the colour-coded model shows the structures of the cerebral, cerebellum, and brainstem. The left half is mostly transparent to reveal the left lateral ventricle and hippocampus in the median section. For comparison, a natural cast of a rat brain and a didactic, small-scale illustration of a human brain in median section are shown on the base. Each has the same colour coding used for the various regions.
14 x 10 x 16 cm; 0.24 kg
M-1000230

Giant Brain, 2.5 times Full-Size, 14-part
At 2.5 times life-size this comprehensive brain model is a very useful teaching aid, especially for large groups of students. All structures of the brain and the ventricles are visible through median, frontal, and horizontal divisions. Delivered with a removable base.
• Unbreakable – Natural cast made from durable vinyl
• 14 removable segments secured with pins
• Ideal for 3D study of brain structures
• Includes removable base and detailed product manual
34 x 30 x 37 cm; 5.6 kg
M-1001261

Giant Functional-Centre Brain, 4-part
This popular brain model reproduces the brain of a right-handed person. It employs contrasting colours and hand-painted captions to identify motor and sensory functional centres. In addition to focusing on the intellectual role of the dominant left brain, and the creative role of the right, the model highlights the emotional, sexual, memory, and learning functions of the limbic system.
• Distinguishment of sensory regions and centres receptive to 20 specific body regions
• Distinguishment of motor centres controlling 19 body regions
• More than 120 hand-numbered features identified in accompanying manual
Delivered on base.
23 x 20 x 30 cm; 2.38 kg
M-1005555
NERVOUS SYSTEM MODELS

Spinal Cord Model, 5 times Life-Size
The model illustrates the composition of the spinal cord with nerve endings. For easier study, the model is 5 times life-size. The spinal cord is formed by a central channel surrounded by “grey matter” with an outer layer of “white matter”. The base of the model features illustrations of the various cross-sections of the spinal cord through the white and grey matter at the neck, torso and lumbar and sacral regions. Supplied on a base. 26 x 19 x 13 cm; 0.4 kg  
M-1000238

Spinal Cord Model
This spinal cord model shows a segment of the upper thoracic spinal cord and is laterally and longitudinally divided showing spinal nerve roots. It is approximately 6 times life-size and comes on a baseboard. 35.5 x 27 x 27 cm; 0.75 kg  
M-1005530

Nervous System, 1/2 Life-Size
An excellent model to study the structure of the human nervous system. This 3D relief model shows schematic representation of the central and peripheral nervous system, numbered and identified in the accompanying manual. Delivered on baseboard. 80 x 33 x 6 cm; 3.5 kg  
M-1000231
Physiology of Nerves Series
Unique five model series for education about the human nervous system. Interchangeable sections can be assembled to illustrate the features of typical neurons found in vertebrates. All sections depict the neural components in vivid colours and attach magnetically to the illustrated metal base.

The set contains the following sections, which are also available individually:
- Neuron Cell Body
- Myelin Sheaths of the CNS
- Schwann Cells of the PNS
- Motor End Plate
- Synapse

68 x 51 x 3 cm; 4.2 kg
M-1000232

INDIVIDUAL SECTIONS:

Neuron Cell Body
Typical neuron body with cell organelles.
12.2 x 11.7 x 6.2 cm; 0.2 kg
M-1000233

Myelin Sheaths of the CNS
Glial cells which build the insulating layer around the axons of the central nervous system.
12.2 x 11.7 x 3.6 cm; 0.2 kg
M-1000234

Schwann Cells of the PNS
Schwann cell with sectioned core.
12.2 x 11.7 x 6.2 cm; 0.2 kg
M-1000235

Motor End Plate
Depicts the neuromuscular junction with striated muscle fibre.
12.2 x 11.7 x 6.2 cm; 0.2 kg
M-1000236

Synapse
Features the endoplasmic reticulum, mitochondria and the membranes of the synaptic gap.
12.2 x 11.7 x 6.2 cm; 0.2 kg
M-1000237

Motor Neuron Diorama
This colour-coded, 3D reproduction shows a motor nerve cell situated within a milieu of interacting neurons and a skeletal muscle fibre. The membranous envelope is cut away from the neuron to expose the cytological ultrastructure, organelles, and inclusions within the cell body. A section of the axon lifts off to let you view the tightly wound layers of the enveloping myelin sheath and neurolemma, as well as the Schwann cell which formed them. Via a cutaway view, you can observe synaptic vesicles, carrying neurotransmitters, about to stimulate the muscle fibre to action. Mounted on a wooden base.
43 x 20 x 28 cm; 3 kg
M-1005553

MAGNIFIED OVER 2,500 TIMES!
EYE MODELS

Eye in Orbit, 3 times Life-Size, 7-part
This large anatomical human eye model shows the optic nerve in its natural position in the bony orbit of the eye (floor and medial wall).

For closer study, it can be disassembled into:
• Includes the extraocular muscles
• Both halves of the choroid with iris and retina
• Eye lens
• Vitreous humour
• Bony orbit
18 x 26 x 19 cm; 1.1 kg
M-1000258

A. Eye, 3 times Life-Size, 6-part
Can be disassembled into the following parts:
• Both halves of the sclera with cornea and eye muscle attachments
• Both halves of the choroid with iris and retina
• Eye lens
• Vitreous humour
9 x 9 x 15 cm; 0.1 kg
M-1000259

B. Eye, 5 times Life-Size, 6-part
This advanced eye model comes on a base, the following parts are removable:
• Upper half of the sclera with cornea and eye muscle attachments
• Both halves of the choroid with iris and retina
• Lens
• Vitreous humour
13 x 14 x 21 cm; 0.6 kg
M-1000255

C. Eye in Orbit, 5 times Life-Size, 7-part
• Upper half of the sclera with cornea and eye muscle attachments
• Both halves of choroid with iris and retina
• Lens
• Vitreous humour
• Shown in bony orbit
18 x 18 x 20 cm; 1 kg
M-1000256
**Eye Models | HUMAN ANATOMY**

**3B MICROanatomy® Eye**
The model illustrates the microscopic structure of the retina with choroid and sclera:
- Left block: 850-times enlarged view of retina including supplying vascular layer and parts of the sclera
- Right block: 3800-times enlarged view of photoreceptors and cells of the pigmented layer
25 x 23 x 18.5 cm; 1.2 kg
M-1000260

**Eye with Eyelid, 5 times Life-Size, 8-part**
This larger than life eye model is great for studying the anatomy of the human eye!

**Features:**
- Upper half of the sclera with cornea and eye muscle attachments
- Both halves of choroid with iris and retina
- Eye lens
- Vitreous humour
- Eyelid
- Lachrymal system
- Anatomical features around the eyeball
20 x 18 x 21 cm; 1.2 kg
M-1000257

**Eye with Partial Face, 5 times Life-Size, 12-part**
This 3B Scientific eye model shows the eyeball with optic nerve in its natural position in the bony orbit (floor and medial wall). Additionally, this eye model shows the relation between eye, bones, muscles, and outer structures of the eye.

**Dissects into:**
- Two halves of the sclera
- Optic nerve
- M. rectus superior
- M. rectus lateralis
- Cornea half
- Eye lens
- Vitreous humour
- Tear gland
- Associated structures
33 x 30 x 38 cm; 4.9 kg
M-1001264
Pathological Eye, 5 times Life-Size

The easy to use switchable and didactically simplified representations of the retina and lens make it possible to clearly explain the typical changes that occur in a healthy eye due to the following diseases:

- Subcapsular cataract
- Cortical cataract
- Nuclear cataract
- Diabetic retinopathy
- Hypertensive retinopathy
- Papillary changes of glaucoma
- Age-related macular degeneration
- Papilloedema
- Central retinal arterial occlusion
- Central retinal venous occlusion
- Rhegmatogenous retinal detachment

26 x 26 x 21 cm; 0.73 kg
M-1017230

Physical Eye Model

Use to demonstrate the optical functions of the eye, e.g. representation of an object on the retina, accommodation, short-sightedness and far-sightedness.

- Half eyeball with adjustable iris diaphragm, lens holder and 2 convex lenses (f = 65 mm and 80 mm), on a rod
- Half eyeball with retina (transparent screen), on a rod
- Lens holder with one concave and one convex corrective lens, on a rod
- Candle holder with 2 candles, on a rod
- Aluminium rail, 50 cm long, with 4 clamp slides
- Includes case

49 x 5.5 x 18 cm; 2 kg
M-1003806
**Ear Model, 5 times Life-Size, 3-part**
This high quality human ear model represents outer, middle and inner ear.
- Removable eardrum with hammer, anvil and stirrup
- 2-part labyrinth with cochlea and auditory / balance nerve
Includes detail of two removable bone sections to close the middle and inner ear.
On base.
25 x 41 x 25 cm; 3 kg
M-1008553

---

**Ear Model, 3 times Life-Size, 5-part**
At approximately 3 times life-size, the model represents the outer, middle, and inner ear. Removable eardrum with hammer, anvil, and stirrup, as well as 2-part labyrinth with cochlea, and auditory / balance nerve. On base.
34 x 16 x 19 cm; 1.25 kg
M-1000250

---

**Removable parts for detailed study of the anatomy of the human ear**

---

**Ear Model, 3 times Life-Size, 6-part**
This high quality human ear model represents outer, middle and inner ear.
Includes:
- Removable eardrum with hammer, anvil and stirrup
- 2-part labyrinth with cochlea and auditory / balance nerve
The detail of two removable bone sections to close the middle and inner ear.
On base.
34 x 16 x 19 cm; 1.55 kg
M-1000251

---

**Functional Ear Model**
This highly detailed model shows how the tympanic membrane, ossicles, the complex internal ear with the cochlea, and the oscillations of the Basilar hearing membrane operate and interact. The enclosed mirror enables operation of the model while studying various ear-functions from different angles. Includes a color explanatory chart.
1 kg
M-1005052

---

**Desktop Ear Model, 1.5 times Life-Size**
Specifically designed for those on a budget, the model shows the outer, middle, and inner ear with no compromise in quality.
On base.
14 x 10 x 14.7 cm; 0.35 kg
M-1000252
World’s Largest Ear Model, 15 times Life-Size, 3-part
The giant ear model is suitable for museums and special collections as well as large lecture halls and conferences. Representation of outer, middle and inner ear. The auditory ossicles and the labyrinth with cochlea and vestibulocochlear nerve can be removed and studied in detail.
On base.
130 x 120 x 60 cm; 72 kg
M-1001266

Organ of Corti
The model shows a three dimensional section through the organ of Corti, the site of the sense of hearing in the inner ear in humans. Special attention has been given to the detailed representation of the individual cellular components and membranes. The overview model in the foreground also shows the exact location of the organ in the cochlea.
26 x 19 x 26 cm
M-1010005

LIFE-SIZE

Ossicle Model – Life-Size
Cast from natural specimen, these human auditory ossicles are presented in their natural position and embedded in transparent acrylic.
M-1000253

Ossicle Model, 20 times Life-Size
3B BONElike™
The three smallest bones that are joined to each other in the human body are located in the middle ear and are referred to as the auditory ossicles: malleus (hammer), incus (anvil) and stapes (stirrup). Using a micro CT technique, an original cast was used to build this 20 times life-size model. In 3B BONElike™ quality.
17 x 12 x 21 cm; 0.39 kg
M-1009697

Ossicle Model – 20 times Life-Size (not shown)
17 x 12 x 21 cm; 0.29 kg
M-1012786
Nose Model with Paranasal Sinuses, 5-part
The upper right half of the face is enlarged 1.5 times to illustrate the structure of the nose with paranasal sinuses.

The following structures are differentiated by colour and visible through the transparent removable skin:
• Outer nasal cartilages
• Nasal, maxillary, frontal, and sphenoidal sinuses
• Opened maxillary sinus when the zygomatic arch is removed

The following structures are shown in median section:
• Nasal cavity, lined with mucosa, with the (removable) nasal conchae
• Arteries of the mucous membrane
• Olfactory nerves
• Innervation of the lateral wall of the nasal cavity, the nasal conchae and the palate

26 x 19 x 24 cm; 0.8 kg
M-1000254

Functional Larynx Model, 4 times Full-Size
Functional replica of the human larynx, hyoid bone and epiglottis. The right half of the larynx model shows cartilaginous structures, the left half the musculature. Vocal cords, arytenoid cartilage and epiglottis are movable from the functional larynx. On base.
41 x 18 x 18 cm; 1.6 kg
M-1005528

Functional Larynx Model, 3 times Full-Size
The functional model is a great tool for speech therapy! This functional larynx depicts the epiglottis, vocal cords and arytenoid cartilage. These parts are movable for demonstration purposes.
32 x 13 x 15 cm; 0.97 kg
M-1001242

Larynx Model, 2 times Life-Size, 2-part
This detailed larynx model is divided into two halves. It is medially sectioned and shows:
• Larynx
• Hyoid bone
• Windpipe
• Ligaments
• Muscles
• Vessels
• Nerves
• Thyroid gland

14 x 14 x 28 cm; 0.29 kg
M-1000273

Functional Larynx Model, 2.5 times Full-Size
The epiglottis, vocal cords and arytenoid cartilage are movable in the functional larynx. Additionally the following structures of the human larynx are represented:
• Hyoid bone
• Cricoid cartilage
• Thyroid cartilage
• Thyroid
• Parathyroid glands

9 x 9 x 14 cm; 0.66 kg
M-1013870

Larynx Model, 2 times Life-Size, 7-part
This medially sectioned model shows:
• Larynx
• Hyoid bone
• Windpipe
• Ligaments
• Muscles
• Vessels
• Nerves
• Thyroid cartilage, 2 muscles and 2 thyroid gland halves are removable from larynx. On stand.
12 x 12 x 23 cm; 0.87 kg
M-1000272

Functional Larynx Model, 2 times Full-Size
This detailed larynx model is medially sectioned and shows:
• Larynx
• Hyoid bone
• Windpipe
• Ligaments
• Muscles
• Vessels
• Nerves
• Thyroid gland

9 x 9 x 14 cm; 0.66 kg
M-1013870

Larynx Model, 2 times Life-Size, 7-part
This medially sectioned model shows:
• Larynx
• Hyoid bone
• Windpipe
• Ligaments
• Muscles
• Vessels
• Nerves
• Thyroid cartilage, 2 muscles and 2 thyroid gland halves are removable from larynx. On stand.
12 x 12 x 23 cm; 0.87 kg
M-1000272
Dentition Models

Dental Disease, magnified 2 times, 21-parts
Magnified for easier demonstrations!
The model is based on a lower jaw with soft gums and 16 removable teeth. One half shows eight healthy teeth and healthy gums for comparison.

The other half shows the following dental diseases:
- Dental plaque
- Dental calculus (tartar)
- Periodontitis
- Inflammation of the root
- Fissure, approximal and smooth surface cavities

One part of the front bone section can be removed from the dental disease model to view the roots, vessels and nerves. Two molars are sectioned along the length to show the inside of the tooth.
Delivered on a base.
17.5 x 26 x 18.5 cm; 0.6 kg
M-1000016

Dental Morphology Series, 10 times Life-Size, 7-part – English
At ten times life-size, this dental morphology series has removable lateral incisor, canine, first premolar, a bridge made of artificial first molar with gold coloured crown and second molar. All relevant dental morphology structures are labeled. Dental morphology on transparent, jaw-shaped stand. Key card included.
70 x 25.5 x 15 cm; 2.1 kg
M-1005540

Giant Dental Care Model, 3 times Life-Size
Teach proper teeth cleaning techniques with this giant dental care model! At 3 times life-size, it shows the upper and lower half of an adult’s dentition. A flexible joint between the jaws allows easy movement. 35.5 cm toothbrush included.
18 x 23 x 12 cm; 1.5 kg
M-1000246
A. Half Lower Jaw, 3 times Life-Size, 6-part
The model represents half of the left lower jaw of a young person. One section of bone is removable from the half lower jaw to expose the tooth roots, spongiosa, vessels and nerves. The canine and first molar are removable from the half lower jaw and are longitudinally sectioned.
35 x 18 x 36 cm; 1.2 kg
M-1000249

B. Advanced Half Lower Jaw with 8 Diseased Teeth, 19-part
These diseased teeth show various stages of cavities from a small and easy-to-treat example on an incisor, through to an advanced degradation of a molar, showing the exposed root. The front section of the bone and all the teeth are removable from the half lower jaw, one incisor is longitudinally sectioned. Nerves, blood vessels, the sublingual and submandibular glands are shown.
22 x 32 x 9 cm; 1.1 kg
M-1001250

C. Dentition Development
Cast from natural specimens, these four upper and lower jaw halves show four different stages of development:
• Newborn
• Approx. 5-year old child
• Approx. 9-year old child
• Young adult
33 x 10 x 20 cm; 0.5 kg
M-1000248

D. Adult Dentures
Tooth roots, spongiosa, vessels, and nerves are exposed for detailed study. The lower jaw is movable. On base.
16 x 12 x 13 cm; 0.9 kg
M-1001247

E. Milk Dentures
Upper and lower jaw are opened to show the arrangement of the remaining teeth. On base.
13 x 12 x 13 cm; 0.6 kg
M-1001248
Giant Molar with Dental Cavities, 15 times Life-Size, 5 part
This giant molar model depicts an upper triple-root molar and separates into 5 parts. The molar features a longitudinal section through the crown, two roots and the pulp cavity. The giant molar contains removable pulp and three tooth inserts with different stages of advanced cavities. Delivered on stand.
24 x 12 x 13 cm; 1.5 kg
M-1013215

Easily switched between 3 stages of cavities

Classic Tooth Models
This classic tooth series shows 5 representative types of adult dentition individually mounted on removable stands:
• 2-part lower incisor with longitudinal section
• 2-part lower canine with longitudinal section
• Lower single-root pre-molar
• 2-part lower twin-root molar with longitudinal section showing caries attack
• 3-part upper triple-root molar with longitudinal section and caries insert
The series ranges from 23-29 cm high.
Each tooth delivered on a base.
M-1017588

› Each tooth model in this set is also available individually

Lower Incisor, 2-part
M-1000240

Lower Canine, 2-part
M-1000241

Lower Single-Root Pre-Molar
M-1000242

Lower Twin-Root Molar, 2-part
M-1000243

Upper Triple-Root Molar, 3-part
M-1017580
Tongue Model, 2.5 times Life-Size, 4-part
This model shows the lower jaw up to the second molar, the tongue with mouth floor musculature in median section and the right sublingual and submandibular gland. On removable base. 23 x 17 x 16 cm; 0.8 kg
M-1002502

Skull Model with Teeth for Extraction, 4-part
This anatomical human skull is a great tool for students. The teeth of the upper and lower jaw can be extracted from the skull and replaced individually with their fully formed roots. A bone flap on the right mandible of the skull can be opened to view the dental roots, spongiosa, nerve canal and an impacted wisdom tooth. • Features individual teeth with roots • Practise extraction time and again • Naturally articulating jaw 22 x 13.5 x 17 cm; 0.8 kg
M-1003625

3B MICROanatomy™ Tongue
This highly detailed model comprises a macroscopic view of the tongue (dorsal view) and microscopic views of the various papillae of the tongue (10-20x life-size) and of a taste bud (approx. 450x life-size). All views are mounted on a base that also features an overview of the sensory and sensitive innervations of the tongue. 14.5 x 32.5 x 20 cm; 0.8 kg
M-1000247
Magnetic Heart Model, Life-Size, 5-part with Diastole and Systole

Now, in one detailed model, the study of diastole and systole is finally made straightforward and convenient. This unique dissection makes the viewing of the cardiac valves during diastole with closed pulmonary aortic valves and opened mitral tricuspid valves easier than ever before. In addition to this, the closed mitral tricuspid valves and opened pulmonary aortic valves during systole are represented in a second model located on the base.

- Easy to open, magnetic connections
- Extremely detailed, life-size model
- Cast from real specimen
- Shows both diastolic and systolic state
25 x 21 x 13 cm; 1.52 kg
M-1010006

Didactically Painted Heart Model, Magnetic, Life-Size, 5-part

Invest in quality with this uniquely sectioned 5-part heart model by 3B Scientific. Cast from a real human heart and didactically prepared to facilitate a better understanding of the anatomy and blood flow of the heart. A dissection through the median plane makes an easy demonstration possible. Colour scheme and disassembly of the heart model in a didactical manner. The chambers of the heart and vessels (including coronary vessels) in which oxygen-rich blood is transported have been displayed in red. Heart chambers and vessels which contain blood low in oxygen have been reproduced in blue.
13 x 19 cm; 0.6 kg
M-1010007
**Classic Heart Model Series**

- Removable parts for closer study
- Ideal for student and patient education
- Durable and virtually unbreakable material

---

**Classic Heart, 2-part**

The 2-part classic heart is highly detailed and at a price you will love. Just slightly smaller than life-size with exquisite detail throughout including ventricles, atria, valves, veins, and the aorta. The front heart wall is detachable to reveal the chambers and valves inside. On removable stand.

- 19 x 12 x 12 cm; 0.3 kg
- M-1017800

---

**Classic Heart with Conducting System, 2-part**

This unique transparent model shows the anatomy of the heart complete with its conducting system represented in colour. The front heart wall is removable and the entire heart can be removed from the stand.

- 19 x 12 x 12 cm; 0.2 kg
- M-1019311

---

**Heart, 1.5 times Life-Size, 7-part**

This high quality model clearly shows over 30 different anatomical regions in the heart. Comes with product manual for easy identification of anatomical features. The model is horizontally sectioned at the level of the valve plane.

*The following parts can be removed for detailed study:*
- Oesophagus
- Trachea
- Superior vena cava
- Aorta
- Front heart wall
- Upper half of the heart

On base.

- 20 x 15 x 17 cm; 1.1 kg
- M-1008548

---

**Conducting system inside**
Magnified models for easy identification of all anatomical structures in the human heart

Heart, 2 times Life-Size, 4 part
This 2 times life-size heart model allows very easy identification of all structures and is a perfect aid for lessons in big classrooms or lecture halls. The anatomy of the human heart is shown in great detail with ventricles, atria, valves, veins, and the aorta. The front heart wall can be removed to reveal the chambers and valves inside. Comes with a removable base and a multilingual product manual.
32 x 18 x 18 cm; 1.3 kg
M-1000268

Removable parts for detailed study!

Heart on Diaphragm, 3 times Life-Size, 10-part
This unique model depicts the structures of the heart while depicting how the heart relates to the thoracic diaphragm at 3 times life-size. Easily show how the diaphragm separates the thoracic cavity from the abdominal cavity.

The following parts of the heart can be removed for detailed study:
- Oesophagus
- Trachea
- Superior vena cava
- Aorta Pulmonary artery stem
- Both atrium walls
- Both ventricle walls
Non-removable base, includes multilingual product manual.
41 x 33 x 28 cm; 3.6 kg
M-1008547
Heart with Oesophagus and Trachea, 2 times Life-Size, 5-part
This 2-times life-size heart model allows a very easy identification of all structures in the human heart. The atrium walls and the front heart wall are removable to reveal the inside. Additionally, the upper section of the oesophagus, the upper bronchi and the ascending aorta and the front heart wall and the atrium walls can be removed.
Hand-painted in life-like colours!
On removable stand.
32 x 18 x 18 cm; 1.3 kg
M-1000269

Giant Heart, 8 times Life-Size
This gigantic heart is one of a kind!
See every detail of the heart with this giant 8 times life-size model. Constructed by hand, it is of great quality. The atria and ventricles of the heart are open to give a view of the interior, and show the accurately modelled bicuspid and major vessels adjacent to the heart. The coronary heart vessels are also shown in amazing detail. On stand.
100 x 90 x 70 cm; 35 kg
M-1001244

Accurately modelled bicuspid and major vessels
### Classic Heart with Left Ventricular Hypertrophy (LVH), 2-part
In addition to all the features of the 2-part classic heart, this unique model shows the long-term effects of increased heart activity due to high blood pressure. The muscular wall of the left heart ventricle is considerably thickened and the tip of the heart is visibly rounded off. The front heart wall is detachable to reveal the chambers and valves inside. On removable stand.

12 x 12 x 14 cm; 0.45 kg

M-1000261

### Classic Heart with Thymus, 3-part
In addition to the features of the 2-part classic heart, this model also shows the location and relative size of the thymus.

20 x 12 x 12 cm; 0.3 kg

M-1000265

### Classic Heart with Bypass, 2-part
With all the features of the 2-part classic heart, but also includes venal bypasses to the right coronary artery, to the ramus interventricularis anterior, and also to the ramus circumflexus of the left coronary artery, which are shown in colour.

This model is a great aid in explaining coronary heart disease. On removable stand.

19 x 12 x 12 cm; 0.35 kg

M-1017837

### Heart with Bypass, 2 times Life-Size, 4-part
This 2 times life-size heart is great for large lecture halls or classrooms. The front heart wall can be removed to view the inner chambers. In addition, this model shows a venous bypass to the ramus postero-lateralis of the right coronary artery, to the ramus interventricularis ant. of the left coronary artery with branching to the ramus diagonalis as well as a bypass to the ramus circumflexus of the left coronary artery. On removable stand.

32 x 18 x 18 cm; 1.1 kg

M-1000263
3B MICROanatomy® Artery and Vein, 14 times Life-Size
This model, enlarged 14 times, shows a mediadized muscular artery with two adjacent veins from the antebrachial area with adjoining fat tissue and muscle.
- Illustrates reciprocal anatomical relationship of artery and vein and basic functional techniques of venous valves
- Left vein and middle artery are fenestrated in upper anterior segment, revealing various layers of wall structure in cross and longitudinal section and top view
- Right vein is opened throughout in anterior segment, revealing orifice of a feeder vein and two venous valves formed by a duplication of the tunica intima
On the back of the model, a relief of two veins illustrates the functional aspect of the venous valves. Supplied on base.
26 x 19 x 18.5 cm; 0.9 kg
M-1000279

Accurate teaching aids of the circulatory system

Circulatory System, 1/2 Life-Size
This half life-size relief model of the human circulatory system details the following anatomical structures:
- The arterial/venous system
- Heart
- Lung
- Liver
- Spleen
- Kidneys
- Partial skeleton
A colourful and anatomically accurate teaching aid of the human circulatory system. Delivered on baseboard for easy display in a classroom or doctor’s office.
80 x 30 x 6 cm; 3.6 kg
M-1000276

Arteriosclerosis Model, with Cross Section of Artery, 2-part
With the help of this artery model doctors can explain changes in the blood vessels due to arteriosclerosis. A horizontally dissected artery fork is depicted with arteriosclerotic changes in four different stages, from slightly sedimented to a completely clogged blood vessel. On stand.
14 x 10 x 7 cm; 0.2 kg
M-1000278
LUNG MODELS

Segmented Lung, Magnetic, 20-part
This high quality lung model is detachable into two lobes and single segments. The segments are colour-coded and their position can be easily identified in the bronchial tree. The bronchial tree contains the lobar bronchi and segmental bronchi. All segments are connected by magnets which allow a safe and easy handling.
25 x 25 x 35 cm; 4.1 kg
M-1008494

Lung Model with Larynx, 5-part
This high quality lung model comes on a baseboard and can be disassembled into 5 parts, lung and heart are removable.
12 x 28 x 37 cm; 1.25 kg
M-1001243

Lung Model with Larynx, 7-part
The lung model with larynx comes on a baseboard for easy display. It is of highest quality, and contains removable parts.
31 x 41 x 12 cm; 2.2 kg
M-1000270
CT Bronchial Tree with Larynx and Transparent Lungs
This unique model was created on the basis of computer tomography data of a human male. The larynx is detachable at the level of the second tracheal cartilage and divisible in the median plane. The epiglottis is mounted flexibly. The various segmental bronchi are made of elastic material and depicted in various transparent colours so that they are easier to distinguish visually. The transparent lungs are detachable.
22 x 18 x 37 cm; 1.23 kg
M-1000275

CT Bronchial Tree without Lungs
22 x 18 x 37 cm; 0.43 kg
M-1000274

Pulmonary Lobule with Surrounding Blood Vessels
The model shows an external pulmonary lobule at 130 times life-size. A graphic image on the stand of the model shows the structure of the airway in the lungs up to the alveolus.
26 x 33 x 19 cm; 1.35 kg
M-1008493

COPD Model
Shows changes to the bronchial tissue from normal to permanent damage and after administration of medication.
15 x 11 x 8 cm; 0.18 kg
M-1012788
**DIGESTIVE & URINARY SYSTEM MODELS**

**3B MICROanatomy™** Digestive System – 20 times magnified
This model illustrates the structure of the fine tissues of four characteristic sections of the digestive system 20 times magnified:
- Oesophagus
- Stomach
- Small intestine
- Large intestine
The front of the model, from top to bottom, shows a magnified view, in histological section, of the individual sections of the digestive system and their fine tissue structures. The back of the model has highly magnified views of didactically interesting areas of each section shown on the front. 29.5 x 26 x 18.5 cm; 1.5 kg
M-1000311

Digestive System, 3-part
This life-size model demonstrates the entire digestive system in graphic relief.

The following parts are shown, painted in realistic colours:
- Nose
- Mouth cavity and Pharynx
- Oesophagus
- GI tract
- Liver with gallbladder
- Pancreas
- Spleen
The duodenum, caecum and rectum of the digestive system are opened. The transverse colon and front stomach wall are removable from the digestive system for detailed study of the anatomy. The liver, stomach, and transverse colon are removable. Mounted on baseboard. 81 x 33 x 10 cm; 4.4 kg
M-1000307

Digestive System, 2-part (not shown)
Same features as the 3-part model, but without the removable stomach half.
M-1000306

Chart – The Gastrointestinal System

M-1001542
Paper
M-4006688

Please go online to 3bscientific.com to browse the large selection of medical charts, or see pages 236-237.
Gastric Band Model
This model was developed based on the two-part stomach model with the addition of an SAGB Quick Close® gastric band. A gastric band is inserted surgically to treat morbid obesity if conservative treatments are unsuccessful. This model is highly suitable as a tool for explaining the device to patients. 3 x 3 x 4 cm; 0.5 kg
M-1012787

Stomach, 3-part
Shows the layers of the stomach wall from cardia to pylorus. The front stomach half and the opened duodenum with pancreas are removable.

**Shown are:**
- The lower oesophagus
- Vessels
- Duodenum
- Pancreas
- Nerves
Delivered on removable stand.
25 x 22 x 12 cm; 0.8 kg
M-1000303

Stomach, 2-part (not shown)
Like the one above but the Duodenum and Pancreas are not present. The front half of the stomach is removable for detailed study. It shows the lower oesophagus, vessels, and nerves. Delivered on stand.
25 x 22 x 12 cm; 0.6 kg
M-1000302

Stomach with Ulcers
The ½ life-size stomach pathology model demonstrates various stages of gastritis from a light gastric ulcer to a perforation. Correspondingly, the base shows an enlarged stomach wall to further demonstrate these changes.
14 x 10 x 17 cm; 0.3 kg
M-1000304
Diseases of the Oesophagus
Reaching from the lower part of the oesophagus to the upper part of the stomach, this vivid, life-size frontal section shows many common conditions like ulcer, reflux oesophagus, and hiatal hernia.
14 x 10 x 19 cm; 0.194 kg
M-1000305

Intestinal Villi, 100 times Life-Size
This intestinal villi model consists of one entire villus, one longitudinally sectioned villus showing the arterioles and venules, and one sectioned villus to show the lymphatic vessels. Also includes a longitudinal section of Lieberkühn’s crypt. On base.
43 x 28 x 10 cm
M-1005532

Gallstone Model
The anatomy of the biliary system and its surroundings are shown at 1/2 natural size in this graphic model for education. Both acute inflammation and the tissue changes caused by chronic inflammation can be identified in the gallbladder wall. Mounted on base.
14 x 10 x 19 cm; 0.2 kg
M-1000314

Haemorrhoid Model
The model is a life-size frontal section of the rectum as well as a smaller relief on a pedestal. In addition to the anatomical structures of the rectum (sphincter, mucous membrane, venous plexus), the model shows internal haemorrhoids during stage I and II as well as external haemorrhoids. The relief exhibit shows haemorrhoids during stage III and IV. Mounted on base.
14 x 10 x 14 cm; 0.2 kg
M-1000315

Intestinal diseases
This model shows the usual benign and malignant changes in the colon and rectum. These include diverticula, polyps, haemorrhoids, fistulae, fissures, chronic inflammatory diseases (Crohn’s disease and ulcerative colitis), as well as intestinal cancer in various stages.
21 x 17 x 27 cm; 0.957 kg
M-1008496

MAGNIFIED 100 TIMES!

Intestinal Villi, 100 times Life-Size
This intestinal villi model consists of one entire villus, one longitudinally sectioned villus showing the arterioles and venules, and one sectioned villus to show the lymphatic vessels. Also includes a longitudinal section of Lieberkühn’s crypt. On base.
43 x 28 x 10 cm
M-1005532
3B MICROanatomy™ Liver
This 2-part model shows a highly magnified view of a section of the liver. It illustrates the **functional and structural components** with two different enlargements. The left part shows a section of the liver that comprises several liver lobules. The right part of the model is a highly magnified view of the sectioned liver lobule on the left.  
15 x 26 x 18.5 cm; 0.7 kg  
M-1000312

Kidneys with Vessels – 2-part
Life-size model presenting the kidneys with suprarenal glands, the outgoing ureters, the renal vessels, and the large vessels situated close to the kidneys. The front half of the right kidney can be removed to reveal the renal pelvis, the renal calices, the renal cortex, and the renal medulla. Comes on stand.  
21 x 18 x 28 cm; 1 kg  
M-1000308

Liver with Gallbladder
This realistic model shows the anatomy of the liver and gallbladder.  
**It shows:**  
- 4 lobes with gallbladder  
- Extrahepatic ducts  
- Hilus vessels  
On removable stand.  
18 x 18 x 12 cm; 0.5 kg  
M-1014209

Rear Organs of the Upper Abdomen
Representing the duodenum, which is partially opened, along with opened gallbladder and bile ducts. The model also includes the pancreas, revealing large ducts, the spleen, and the surrounding vessels, all in natural size. Comes on stand.  
23 x 12 x 20 cm; 0.55 kg  
M-1000309

Kidneys with Rear Organs of the Upper Abdomen – 3-part
This model combines the rear organs of the upper abdomen and the kidneys with vessels in one. The upper abdominal organs are attached in their natural positions and are removable from the kidneys. Comes on stand.  
24 x 18 x 29 cm; 1.4 kg  
M-1000310

Liver with Gallbladder, Pancreas and Duodenum
This highly-detailed relief model provides a detailed look at the liver with:  
- Ducts  
- Gallbladder  
- Pancreas  
- Duodenum  
- Vessels  
- Extrahepatic ducts with gallbladder  
- Main pancreatic duct and their orifices  
Delivered on baseboard.  
4 x 20 x 18 cm; 0.8 kg  
M-1008550
Kidney Section, Nephrons, Blood Vessels and Renal Corpuscle
These 3 kidney models create a complete series to study the anatomy of the kidney and the different structures of the kidney in great detail. All important structures are numbered and identified in the product guide.

Together the human kidney models show:
• A longitudinal section of the right kidney, 3 times life-size
• A kidney nephron depicting a section through renal cortex and medulla. Nephron features the renal corpuscles with proximal and distal convoluted tubules, loops of Henle, collecting tubules and blood vessels, 120 times full-size
• The third kidney section shows an opened Malpighian corpuscle with glomerulus and Bowman’s capsule, 700 times life-size of the human kidney
Mounted on one baseboard.
29 x 52 x 9 cm; 2.8 kg
M-1000299

Individual models:
Kidney
M-1000296
Nephrons and Blood Vessels
M-1000297
Malpighian Corpuscle of Kidney
M-1000298

3B MICROanatomy® Kidney
This extremely detailed model shows the functional units of the kidney greatly magnified.

Six model zones illustrate the following fine-tissue structures:
• Longitudinal section of a kidney
• Section of renal cortex and renal medulla of the kidney
• Wedge-shaped section of a kidney lobe with a diagrammatic depiction of three nephrons with varying lengths of loop of Henle and diagrammatic depiction of the vascular supply
• Diagrammatic illustration of a kidney nephron with a short of loop of Henle and didactic/diagrammatic illustration of the vascular supply
• Diagrammatic illustration of an opened kidney renal corpuscle with nephron and light-microscopic transverse sections of the proximal, attenuated and distal segments of a renal tubule
• Diagrammatic/didactic illustration of an opened kidney renal corpuscle
Mounted on a base.
23.5 x 25.5 x 19 cm; 1.3 kg
M-1000301

Kidney Stone Model
A great tool to inform patients about kidney stones and urinary stones. The model shows an opened right kidney in natural size.
The renal calices, the renal pelvis, and the ureter are opened as well enabling concretions or stones to be identified in typical positions.
14 x 10 x 16.5 cm; 0.18 kg
M-1000316

Kidney with Adrenal Gland, 2-part
The front half of the kidney is removable to enable demonstration of cortex medulla and vessels. The renal pelvis of the kidney is also displayed. 20 important structures are included in the anatomy key
• Kidney with adrenal gland
• Renal and adrenal vessels of the kidney
• Upper portion of ureter for the human kidney
On stand.
8.5 x 19 x 26 cm; 0.9 kg
M-1014211
Urinary System – Male – 3/4 Life-Size
This urinary system model shows the structures of the retroperitoneal cavity in high detail.

The right kidney of the model is opened, other details represented are:
• Inferior vena cava
• Renal veins
• Aorta with its branches
• Iliac vessels
• Ureter
• Urinary bladder
• Prostate
• Adrenal gland
• Rectum
• Musculature
Urinary system model is not delivered on base.
10 x 18 x 26 cm; 1 kg
M-1008551

Dual Sex Urinary System, 6-part
All-in-one model of the human urinary system. One front half kidney is removable; easy to change male insert (bladder and prostate, front and rear half) and female insert (bladder, womb and ovaries, 2 lateral halves).

For detailed study, the following is shown:
• Structures of retroperitoneal cavity
• Large and small pelvis with bones and muscles
• Inferior vena cava
• Aorta with its branches including iliac vessels
• Upper urinary tract
• Rectum
• Kidney with adrenal gland
On baseboard.
41 x 31 x 15 cm; 2.3 kg
M-1000317

Prostate Model, 1/2 Life-Size
This prostate model provides a cross section of the male genital organs showing a healthy prostate with bladder, urethra, testicle, symphysis and rectum. The narrowing of the urethra due to the change of the prostate is made clear via the 4 cross sectional views on the base of the prostate model.
13.5 x 10 x 14 cm; 0.24 kg
M-1000319

Basic Kidney Section, 3 times Life-Size
This colourful and anatomically accurate model depicts a longitudinal section of the human right kidney. All important structures of the human kidney are shown. No baseboard included.
20 x 12 x 12 cm; 0.3 kg
M-1000295
IDEAL FOR THE CLASSROOM OR DOCTOR’S OFFICE!

Life-Size Male Pelvis, 2-part
The male pelvis anatomy model is shown in median section. One half of male genital organs with bladder, shown at the normal position in the male pelvis. The rectum is removable for a more detailed study of the male pelvic anatomy. Delivered on baseboard offering the possibility to be mounted to the wall.
41 x 31 x 17 cm; 2.5 kg
M-1000282

Life-Size Female Pelvis, 2-part
This female pelvis is in median section. It shows one half of the female genital organs with bladder and removable rectum. The female pelvis is delivered on baseboard offering the possibility to be mounted to the wall for easy display.
41 x 31 x 20 cm; 2.2 kg
M-1000281

Male Pelvis with Ligaments, Vessels, Nerves, Pelvic Floor and Organs, 7-part
Extensive educational tool for a better understanding of the comprehensive anatomy of the male pelvis. For close up study, the pelvis splits into two halves and the following parts can be removed: Left half of the fifth lumbar vertebra, rectum, bladder, prostate and penis.
• Includes bones, ligaments, vessels, nerves, pelvic floor muscles, and external sex organs
• All structures are anatomically accurate in every detail
• Can easily be taken apart using magnetic connections
• Extremely durable material, comes on sturdy base
21 x 28 x 31 cm; 3.12 kg
M-1013282
**Male Pelvis & Pelvic Skeleton Models**

- **Male Pelvic Skeleton**
  Consisting of hip bone, sacrum with coccyx and two lumbar vertebrae.  
  18 x 28 x 23 cm; 0.8 kg  
  M-1000133

- **Female Pelvic Skeleton**
  Consisting of hip bone, sacrum with coccyx and two lumbar vertebrae; including movable symphysis.  
  19 x 25 x 10 cm; 0.9 kg  
  M-1000134

- **Female Pelvic Skeleton with Movable Femur Heads**
  This realistic pelvic skeleton model consists of hip bone, sacrum with coccyx and 2 lumbar vertebrae as well as movable symphysis.  
  30 x 30 x 20 cm; 1.2 kg  
  M-1000135

---

**Male Pelvis with Ligaments, 2-part**

This 2-part model is a natural cast of a male, bone pelvis with ligaments. It shows the following structures in great detail: both hip bones, pubic symphysis, sacrum and coccyx, and the fifth lumbar vertebra with intervertebral disc. Part of the cauda equina is visible in the vertebral canal. A median section has been placed through the fifth lumbar vertebra, the sacrum and the coccyx, so that the pelvis, which is connected by practical magnets, can be split easily into two halves.  
19 x 28 x 24.5 cm; 1.66 kg  
M-1013281

---

**Male Pelvis, 3-part**

Like M-1013281 but without the ligaments. The left half of the fifth lumbar vertebra is held together by magnets and can also be removed.  
19 x 28 x 24.5 cm; 1.35 kg  
M-1013026

---

**PELVIC SKELETON MODELS**

+ Natural casts  
+ Extremely detailed  
+ Made of virtually unbreakable plastic
Female Pelvis Skeleton with Genital Organs, 3-part
This model is especially suitable for studying the position of female genital organs in the pelvis. It consists of a natural cast female pelvis with a movable symphysis, hip bone, sacrum, coccyx, 4th and 5th lumbar vertebrae, and a female genital insert with rectum. The bladder and a portion of the uterus with one fallopian tube and ovary can be removed. The soft tissues are moulded from durable, soft vinyl. Delivered on base.
33 x 26 x 18 cm; 2 kg
M-1000335

Female Pelvis with Ligaments, 3-part
This life-size model represents an original cast of a bony female pelvis with all major ligaments on the right side and shows all the details of the hip bones, the pubic symphysis, the sacrum and the coccyx, and the fifth lumbar vertebra with intervertebral disc. A mid-sagittal section through the fifth lumbar vertebra, sacrum and coccyx, allow both halves of the pelvis to be disassembled revealing a part of the cauda equina in the vertebral canal. The left half of the fifth lumbar vertebra is removable.
19 x 27 x 19 cm; 1 kg
M-1000286

Female Pelvis, 3-part
Like M-1000286 but without ligaments.
19 x 27 x 19 cm; 0.9 kg
M-1000285
Female Pelvis with Ligaments, Vessels, Nerves, Pelvic Floor, Organs, 6-part
This original cast of a female pelvis shows the topography of bones, ligaments, vessels, nerves, pelvic muscles and female genital organs in life-size. For close up study, the following parts can be removed and disassembled into two halves: rectum, uterus with fallopian tubes, ovaries and vagina. The pelvic floor includes partially removable external anal sphincter, external urethral sphincter, deep and superficial transverse perineal and bulbospongiosus. The pelvis can be disassembled through a midsagittal section (fifth lumbar vertebra, sacrum and coccyx) to reveal a part of the cauda equina in the vertebral canal.
- Magnetic connections for fast demonstrations
- Study of complex anatomical areas made easy
19 x 27 x 19 cm; 1.6 kg
M-1000288

Female Pelvis with Ligaments, Muscles and Organs, 4-part
This life-size model of a female pelvis represents detailed information about the topography of bones, ligaments, pelvic floor muscles and female pelvic organs. The right half shows the bones with pelvic ligaments and left half of the pelvis contains the muscles of the pelvic floor. A partially removable bulbospongiosus demonstrates the vestibular bulb and Bartholin gland. The removable, midsagittally sectioned female pelvic organs (urinary bladder, vagina, uterus and rectum) demonstrate the relationship to the muscles of the pelvic floor within its openings for urethra, vagina and rectum.
19 x 27 x 19 cm; 1.3 kg
M-1000287
SECTRA – YOUR INTERACTIVE SOLUTION

Medical Education and Clinical Training. Now at your fingertips!

SECTRA Interactive Medical Education offers two different types of multi-touch screen designed for interactive learning and teaching. The software includes a 3D Anatomy Atlas and a library of real clinical cases. You can easily expand the library from your own DICOM data to add your own teaching cases.

Through a simple subscription system users can connect to SECTRA Education Portal, a cloud based portal, where teachers and students have access to an extensive library of cases, providing a wide variety of clinical content from across the globe. Through SECTRA’s collaborative network, institutions can share cases and knowledge with other SECTRA users from around the world online or just use your own cases offline without sharing.

SECTRA 3D ORTHO is an additional module available for the planning Orthopedic Surgery and can also be used for patient demonstrations.

➢ First year Educational Portal Membership included free with each purchase of SECTRA Table or Board!
Virtual Dissection from Anatomy to Histology

SECTRA is a great addition to dissection courses or to supplement other clinical based approaches to teaching. Virtual dissection with SECTRA allows teaching institutions to increase the exposure to anatomy problem based learning and hands-on practice for all students and allows them to perform dissections repeatedly without damaging a cadaver or needing supervision. Both the SECTRA Table and SECTRA Board provide great platforms for both teaching and collaborative learning. Connected to the education portal, the user can easily view a broad spectrum of images, CT or MRI stacks or real-time generated 3D volume models, ultrasound, radiology or very high resolution histology images. Using the Table and Board is intuitive and fun, something we should not lose sight of in today’s high pressure learning environments.

SECTRA Hardware:
SECTRA Board or SECTRA Table – Your Choice!

The SECTRA Table with its 55” multi touch screen is particularly suited to collaborative teaching & learning but can also be tilted at various angles to accommodate groups of varying sizes and configurations. It is also freely movable on wheels. The SECTRA Board is designed to facilitate larger audiences with an impressive 84” screen and additional whiteboard functionality. The board can be mounted on a wall or on a stand for free standing applications. Both, the table and the board, can be attached to further outputs for display on other devices.

MEDICAL SIMULATION | Interactive Medical Education

**SECTRA EDUCATION PORTAL AND MEMBERSHIP**

SECTRA Education Portal is the software delivered with the SECTRA Table or Board. To run the software, you need SECTRA Portal Membership, a cloud-based growing library of cases. A free one-year membership subscription is included with each purchase of the SECTRA Table or Board.

This software allows you to store and share real patient cases and DICOM compatible images for educational purposes with your students and medical staff. This software is specially designed for the SECTRA Table and the SECTRA Board and is developed out of the SECTRA PACS software already used in hospitals worldwide for managing radiology and other DICOM data. It provides the possibility to share data with other hospitals and universities around the globe or amongst other departments within your own institutions.

Note: The software can only be purchased in combination with SECTRA Table or SECTRA Board.

Advantages of the Education Portal Membership
- First year membership included free with each purchase of the SECTRA Table and Board
- Private Data Storage in the cloud for own private cases and data
- Cloud Service to share cases across departments and locations
- Growing database of shared real-life anatomical cases contains over 180 cases from across the globe
- Automatic and secure daily backups of your content
- Automatic upgrades to the latest software release
- Access, create, and edit Education Portal content on other devices
- Student accounts available for Education Portal access

Interactive Medical Education | MEDICAL SIMULATION

Since 2012, students at Philipps-University in Marburg, Germany have been using SECTRA in lectures, seminars and preparation courses. Professor Weihe, head of the Institute of Anatomy and Cell Biology was immediately convinced that SECTRA could improve anatomical training. Through virtual preparation, the students get important theoretical and practical insights in preparation before their first real body autopsy.

According to Professor Kinscherf, Deputy Head of the Anatomical Institute, SECTRA would become an integral part of the anatomy courses for students of all medical and human biology disciplines. He further affirms that the comprehensive 3D View makes it possible to visually recognize and understand injuries. The interaction with virtual bodies promotes anatomical and physiological understanding and results in a better trained staff for a long-term increase in efficiency and safety in the health care system.

Other reference Customers:

OPTIONAL available on request:
SECTRA 3DORTHO ORTHOPEDIC SURGERY PLANNING TOOL

SECTRA Table provides an optional add-on for 3D pre-operative planning. The planning system offers a set of tools aimed at clinical training and pre-operative planning of trauma cases. These tools allow users to interactively evaluate and discuss different cases and strategies, making the table ideal for surgical training.

Features:
• Hide – Hide anatomical structures irrelevant to the damaged area that may obscure the trauma site.
• Reposition – Align fragments automatically by placing landmarks
• Explode – Separate fragments in order to study them separately
• Template – Import 3D templates from CAD drawings
• Distances – Measure distances in 3D space

Please contact the 3B Scientific Customer Service Team for more information and to schedule a personal product demonstration! Phone: +49 (0)40 73966-0 e-mail: info@3bscientific.com
3B ORTHObones

3B Scientific® ORTHObones are artificial workshop bones and test material specifically developed for teaching orthopedic and surgical procedures, for surgery workshops, and medical engineers. They offer a cost-effective alternative to real human bones for the training of orthopedic techniques in fracture repair like plate osteosynthesis or screw fixation, and for implant training and demonstrations.

- High quality, economical workshop bones
- Bio-mechanically accurate
- Anatomically realistic surfaces
- Ready for imaging procedures without pre-processing
- Short delivery times
3B ORTHObones STANDARD LINE

3B ORTHObones Standard Line
+ Economically priced, hands-on workshop bones
+ Realistically simulated characteristics of human bone with defined cortical shell and spongiosa
+ Train surgical manipulations on anatomically correct workshop bones

The multilayered construction simulates the hard cortical and the softer cancellous bone. Mechanical manipulations (i.e. with screws, plates, or implants) can be practised on these highly realistic workshop bones.

The elbow allows for realistic movement while mechanically manipulating the bone.
Elbow, Ulna, Radius, Humerus, flexibly mounted

Flexibly mounted elbow, comprised of the humerus, ulna, and radius. Thanks to latex bands, the joint is flexible and can be moved. Latex band is glued so it does not interfere with imaging procedures. M-1018335

Latex bands simulate joint movement and leave no trace on the X-ray

3B ORTHObones Premium Line

- Biomechanical characteristics of the bones of a young adult (20-30 yrs.)
- Realistic bone surface structure and weight
- For advanced training of surgical manipulations
- Especially suited for high contrast X-ray results without extra preparations

High contrast X-ray taken with 3B ORTHObones
Bone density: 10 – 30 PCF (Pounds per Cubic Foot)
The solid rigid polyurethane foam is available in 4 different densities: 10, 15, 20 and 30 PCF.

Cortical thickness: 1 – 3 mm
The cortical shell is simulated by a dense plate on top of each block. Its density is 30 PCF and three different thicknesses (1, 2 or 3 mm) are available for each foam density option.

Dimensions:
CP1: 1 mm cortical thickness: 9.5 x 4.5 x 3.1 cm
CP2: 2 mm cortical thickness: 9.5 x 4.5 x 3.2 cm
CP3: 3 mm cortical thickness: 9.5 x 4.5 x 3.3 cm

3B Biomechanical Test Blocks are used to:
+ Test implants and devices
+ Train the evaluation of bone density
+ Simulate different sets of characteristics, i.e. bone density and cortical thickness

### CPR

**Lilly AIR™ for CPR and Airway Management Training**

Train both cardio-pulmonary resuscitation (CPR) and airway management through the use of interchangeable heads. The simulator offers all the necessary features for learning about the life-saving algorithm comprising heart massage and artificial respiration for adults.

**Ideal for skill training in:**

- CPR training
- Mouth to mouth resuscitation
- Double naso-tracheal intubation
- Bag and mask ventilation techniques
- Full range of supraglottic devices
- Direct laryngoscopy
- Endotracheal tube insertion
- Awake fibre optic examination
- Combi tube insertion
- Direct feedback for immediate improvements via included tablet

Comes with 1 CPR LillyPRO™ training manikin, 1 Trucorp® advanced airway head, 1 Android tablet PC with plug adaptor for charger, 5 lower face masks (including teeth), 25 throat bags. Carrying case, tracksuit top and 1 bottle of lubrication also included.

26 x 39 x 78 cm; 9 kg

M-1020137

---

The heads are easy to install and can quickly be interchanged when switching between CPR and airway management training scenarios.

**NEW!**

**CPR LillyAIR™ for CPR and Airway Management Training**

26 x 39 x 78 cm; 9 kg

M-1020137

---

The heads are easy to install and can quickly be interchanged when switching between CPR and airway management training scenarios.

**Advanced Airway Management Head for CPR LillyPRO™**

The intubation head is also available as an option to be added to your existing CPR LillyPRO (see next page).

M-1019711
Qualified CPR Training with CPR LillyPro™
CPR LillyPro™ – The best choice for your professional CPR training courses. All relevant CPR training parameters can be monitored comfortably and easily via the tablet provided. Trainers and trainees will very quickly attain the chosen training target via the direct feedback feature.

Displayed training parameters:
- Compression depth
- Compression frequency
- Hand position
- Head tilt
- Respiration volume/speed (combined)
- Respiration pressure

The face masks can be changed, and are easy to clean. The software can control the carotid pulse and the eye movements. CPR LillyPro™ can react by opening the eyes when spoken to by the trainee.

The correct head tilt, individual carotid pulse, and the moveable jaw to demonstrate the jaw thrust manoeuvre, provide realistic scenarios. CPR training with the CPR LillyPro™ complies with the latest AHA and ERC guidelines. Comes with carrying bag, 5 lower face masks (including teeth), 25 throat bags, 1 tracksuit top, 1 Android tablet PC, charger and plug adaptor.

78 x 39 x 26 cm; 9 kg

Light Skin M-1017773
Dark Skin M-1017775

Advanced Airway Management Head for CPR LillyPro™
Add the intubation head to your existing CPR LillyPro™ and also train advanced life saving techniques.
M-1019711

Fast and effective CPR training:
- Track and analyse CPR performance with the included tablet
- Easy to set up with magnetic connections – no extra tools necessary
- Very hygienic as it uses a separate air chamber system
- Extremely durable material that is easy to clean
- Fast cleaning process for efficient time management
- Includes tablet and software for measuring training success with PDF view

No tools are necessary as it has strong magnetic connections.
CPR Lilly™
CPR Lilly™ is the basic version for all CPR training courses. This training manikin is hygienic, and will operate economically for a long time as it uses disposable airbags and has a separate air chamber system.

The face masks can be changed, and are easy to clean. The carotid pulse and the eye movements can be controlled separately by hand. When the correct compression depth is reached, a tone will sound. CPR Lilly™ can react by opening the eyes, this is controlled manually. The correct head tilt, individual carotid pulse, and the moveable jaw to demonstrate the jaw thrust manoeuvre, provide realistic scenarios.

CPR training with CPR Lilly™ complies with the latest AHA and ERC guidelines. Comes with carrying bag, 5 lower face masks (including teeth), 25 throat bags and 1 tracksuit top.

Basic Life Support Manikin BASIC Billy™ was developed utilising the results of extensive studies focussing on the depth and force of compression during cardiopulmonary resuscitation (CPR). It fulfills the latest guidelines from the AHA (American Heart Association) and ERC (European Resuscitation Council) on CPR and was designed with optimal force and compression values in mind.

2 in 1
BASIC Billy™ is actually two manikins in one as it can be used as either an adult or a child (approx. 12 yrs.) CPR trainer. Just use the easy and interchangeable springs located in the back of the trainer to switch between the realistic depth feedback of either the adult (5cm) or child (4.5cm).

Included:
• 1 BLS simulator (torso) with spring for cardiac massage of adults
• 1 additional spring for cardiac massage of children (approximate age of 12)
• 5 lung bags, adult
• 5 lung bags, child
• 2 telescopic guides
• 1 additional face mask and inner head for hygienic artificial respiration
• 1 disinfectant solution
• 1 carrying bag
60.5 x 35.5 x 19 cm; 2.36 kg

Features of BASIC Billy™:
+ Anatomically correct for realistic training
+ Hygienic to use with low priced disposable airways
+ Head is easy to tilt to prepare for mouth-to-mouth or mouth-to-nose resuscitation
+ Thorax raises as the lungs are ventilated
+ Developed and manufactured in Germany

RELIABLE AND ECONOMICAL!

Basic Life Support Manikin BASIC Billy™ was developed utilising the results of extensive studies focussing on the depth and force of compression during cardiopulmonary resuscitation (CPR). It fulfills the latest guidelines from the AHA (American Heart Association) and ERC (European Resuscitation Council) on CPR and was designed with optimal force and compression values in mind.

2 in 1
BASIC Billy™ is actually two manikins in one as it can be used as either an adult or a child (approx. 12 yrs.) CPR trainer. Just use the easy and interchangeable springs located in the back of the trainer to switch between the realistic depth feedback of either the adult (5cm) or child (4.5cm).

Included:
• 1 BLS simulator (torso) with spring for cardiac massage of adults
• 1 additional spring for cardiac massage of children (approximate age of 12)
• 5 lung bags, adult
• 5 lung bags, child
• 2 telescopic guides
• 1 additional face mask and inner head for hygienic artificial respiration
• 1 disinfectant solution
• 1 carrying bag
60.5 x 35.5 x 19 cm; 2.36 kg

Easy to switch between adult and child CPR setup
CPR Simon BLS Full Body Simulator with OMNI® Code Blue® Pack
Quality CPR simulator designed to operate for years! Strong, sturdy construction with full-size, realistic landmarks and one piece disposable airways. Prewired for CPRLink™ for a first class BLS program.
• Disposable airways to practise hygienic mouth-to-mouth ventilation
• Fully articulating head, neck, and jaw permitting head tilt, chin lift, jaw thrust, and neck extension into the “sniffing” position
• Airway blocked when head is forward
• Easily accessible chest cavity with ribcage, lungs, and heart for realism and practice of the Heimlich manoeuvre
• Realistic chest rise during ventilation
• Carotid, femoral arterial pulse sites
• Femoral venous site
• Intramuscular (IM) Injection Sites on the deltoids, quadriceps and left gluteus medius
• Jointed elbows, wrists, knees and ankles
• Eyes open and close; one pupil is dilated

Included:
OMNI® Code Blue® pack monitors and logs the cadence and depth of cardiac compression and airway ventilation. Comes with carrying bag, instruction manual and 10 disposable airways.
M-1009220

CPR Simon BLS Full Body Simulator with Venous Sites (not shown)
This life size adult manikin is designed to provide the fundamentals of CPR instruction as well as numerous patient care exercises. All features of M-1009220 but without the OMNI® Code Blue® pack monitor and not prewired for CPRLink™. Comes with instruction manual and carrying bag.
M-1017559

CPR Simon BLS Torso Simulator (not shown)
All features of M-1009220 related to the torso, but does not include the OMNI® Code Blue® pack.
M-1005819

Replacement parts:
Left Arm Assembly M-1020120
Right Arm Assembly M-1020121
Carrying Bag M-1020124

CPR Susie Advanced Emergency Care
This life size adult manikin is designed to provide the fundamentals of CPR instruction as well as numerous patient care exercises such as intramuscular and subcutaneous injections, male and female catheterisation, intubation, enema administration, decubitus treatment and palpation of right and left carotids. Other features include:
• Neck brace
• Amputation stump
• Electronic CPR monitor
• Interchangeable male and female breasts (left female breast contains malignancy)
• Interchangeable male organ
• Movable jaw with removable upper and lower dentures
• Oral, nasal, otic, tracheotomy, and gastrostomy openings for instruction in nasogastric lavage and gavage
• Removable internal tanks
• Sculpted stomas for transverse colostomy, ileostomy, and suprapubic stoma, each connected to an internal, removable tank

Comes with instruction manual.
M-1017543
Code Blue® I – Multipurpose Simulator with Intubatable Airway

Provides practice in a wide range of CPR and patient care skills like:
- General care
- Gynaecological examination
- Airway management
- Breast examination
- Injection and infusion
- Colostomy and decubitus care

Features:
- Interchangeable external genital organs that allow both male and female catheterization
- Interchangeable male and female breasts
- Left female breast contains malignancy.
- It has fully a movable neck, arms and legs, and the skin of face, vagina and cervix is soft for added realism. With anatomically accurate and intubatable airway.
- Supplied with Omni® Code Blue® Pack, 10 training masks, Code Blue® Life Monitoring System, neck brace and carrying bag.

M-1017533

Code Blue® I – Multipurpose Simulator with Non-intubatable Disposable Airway

All features of M-1017533 but airway not intubatable. Supplied with Omni® Code Blue® Pack, 10 disposable one-piece airways, neck brace, and carrying bag.

M-1005782

Replacement parts:
- 10 Airways M-1005783
- Lungs M-1020591
- BP Training Arm M-1018870
- Smash Arm M-1019645

CPR+D Trainer

Advanced feedback, reporting and control
Stores the energy generated by chest compressions for power. Without the use of batteries or power cords, the trainer is capable of recording CPR quality and performance metrics, presenting realistic chest rise and palpable pulses after resuscitation, and more. Take your training to more places and reach more people with the convenience of truly tetherless technology.

Features:
- Intubatable airway with tongue, vocal cords, and trachea
- Realistic head tilt/chin lift and jaw thrust
- Realistic chest cavity allows students to experience the correct force needed to perform proper chest compressions
- Anatomically correct landmarks for proper hand placement
- Proper chest compressions
- Defibrillation: Attach real AED pads directly to the conductive skin. Shock the conductive skin using your defibrillator just like a real patient. Your AED will display the simulator’s ECG.
- Automatic pulses and breathing with realistic chest rise
- Comes with handheld controller with 4.5 m cable, carrying bag and operating guide.

M-1018867

CPR SIMULATOR WITH DEFIBRILLATION FEATURES!
Adult CPR Manikin with Memory and Printer
This full-size manikin allows the practice of adult CPR techniques. The printer unit allows evaluation and the performance of each skill is displayed separately while averages are stored in the memory. Compression and ventilation waveforms are plotted in a time sequence. Averages are shown on the display and printed on paper.

Features:
- Palpable anatomical landmarks (xiphoid, navel, nipples and ribcage)
- Enhanced student motivation through use of the optional SkillGuide indicator that allows real-time CPR performance feedback during training
- Adult CPR training with optional child springs
- Fully articulated head, neck and jaw
- Palpable carotid pulse
- Individual student face masks provide maximum protection against cross contamination

91.5 x 53.5 x 33 cm; 24 kg
M-1005617

Replacement parts:
- 25 Sanitary Face Masks M-1005600
- 10 Tracheal Airways M-1005601
- 10 Lower Airways M-1005602
- Electronic Monitoring, Memory, and Printer Unit M-1019633

CPR Torso with Light Controller
This easy to transport torso allows the practice of adult CPR techniques. Optionally, child CPR can also be practised by changing the supplied springs inside the torso. Individual student face masks with a one-way non-rebreathing valve and disposable airways provide maximum protection against cross-contamination. The light controller allows for immediate CPR evaluation.

Features:
- Palpable anatomical landmarks (xiphoid, navel, nipples and rib cage)
- Adult CPR training with optional child springs
- Fully articulated head, neck and jaw
- Palpable carotid pulse
- 48.5 x 30.5 x 80 cm
M-1005618

Replacement parts:
- 25 Sanitary Face Masks M-1005600
- 10 Tracheal Airways M-1005601
- 10 Lower Airways M-1005602

Adult CPR Manikin with Electronics
This full-size manikin allows the training of BLS rescue techniques and CPR. The resiliency and weight of the body contribute to a realistic training experience:

165 cm; 24 kg

Features:
- Natural resistance to chest compression
- Palpable carotid pulse
- Anatomical landmarks such as sternum, ribcage and sub-sternal notch
- Airway ball valve which allows the lungs to inflate only if the head is extended and accurately positioned
- Light controller which confirms correct hand placement, ventilation volume and compression depth

M-1005738

Replacement parts:
- 10 Mouth/Nose Pieces M-1005741
- 10 Adult Airway Systems M-1005747
- Carrying Bag M-1005748
CPR Torso with Electronics

This lightweight and easy to transport torso features:

- Airway ball valve which allows the lungs to inflate only if the head is extended and accurately positioned
- Life-like anatomical landmarks such as carotid pulse, sternum, ribcage and substernal notch
- Light controller confirms correct hand placement, ventilation volume and compression
- Easy to replace mouth/nose pieces
- Soft carrying case with kneeling pads

70 cm; 8.4 kg
M-1005726

Replacement parts:
- 10 Mouth/Nose Pieces M-1005741
- 10 Airway Systems M-1005742

Brad™ Compact CPR Training Manikin with Electronics

This economical CPR manikin is constructed of soft, realistic vinyl plastic over polyurethane foam for a “human” feel. Comes with an exterior console box that indicates proper hand position, adequate chest compressions, and adequate air volume.

Features include:

- Long torso for realistic abdominal thrusts
- Realistic head tilt and chin lift for opening airway
- Can easily be manipulated to realistically simulate airway obstruction or choking situations
- User-friendly, low maintenance lung/airway design

Includes 3 mouth/nose pieces, 3 disposable lung/airway systems, nylon carry bag and kneeling pads.
M-1009004

Replacement parts:
- Ribcage M-1013247
- 24 Adult Airway Systems M-1005740
- 10 Mouth/Nose Pieces M-1005741

CPR-Torso Brad™ Junior with Electronics

Brad Jr.’s realistic appearance, accurate anatomical landmarks, and individual-use mouth/nosepieces with disposable airway/lung system and non-rebreathing valve combine for function, durability, and ease of use. Includes a carrying bag. Approximate age: 7 years.
M-1018850

Life/form® AED Trainer with Brad™ CPR Manikin

Prepare students for emergency situations with the Life/form® Universal AED Trainer complete with Brad™ the CPR Manikin. Simply push a button to set the sequence of events that will help students learn the appropriate steps to follow in both “shock” and “no shock” situations. The instructor can select from four training scenarios for manual and hands-free training. Train for AHA scenarios with both audio and written prompts in English.

Comes with reusable pads, electrode sets and operating instructions. Includes Brad™ CPR Manikin with 3 mouth/nose pieces, 3 disposable lung/airway systems, nylon carrying bag and kneeling pads.
M-1018858
Full-Body CPR Manikin
This full-body CPR manikin with additional trauma options features life-like positioning, a carotid pulse, and anatomical landmarks that include the sternum, ribcage, and substernal notch. Caucasian appearance. Add trauma options in the table to the right as needed for additional training features. The manikin comes ready to go with a sweat suit, five mouthpieces and five airway systems with lungs.
M-1018871

ZOLL AED Trainer Package with CPR Brad™
This unit allows students to practice realistic device operation using AHA recommended training scenarios. An identical graphical operator interface and complete audio and visual prompts mimic the AED Plus in its look and operation. Screen messages, audible tones, and voice prompts guide the user through all aspects of the rescue. The convenient handheld remote control for instructor use is pre-programmed with the eight AHA Heartsaver AED training scenarios and offers a manual scenario function, plus attach pads, low battery, and call-for-service simulations. Powered by six "C" cell batteries (not included) or an AC adaptor. Supplied with training electrode kit, training remote control, AC adapter, handheld cord, operator manual, administration guide.
M-1018859

Zoll AED Trainer Plus 2
Provides a variety of simulations to help responders become familiar with an AED device. The simulated shock delivery has no high-voltage capabilities, ensuring safety during training. It is pre-configured with 10 training scenarios that simulate realistic sudden cardiac arrest episodes and can be used with appropriate manikins. Software and manual are only available in English.
M-1018143

Add any of these trauma options to the CPR manikin for extended training possibilities:

Jaw Thrust Brad
Utilises simple moving-parts technology for the instruction of the jaw thrust manoeuvre. Unique to the industry is the function of ventilating the patient when the proper manoeuvre is done without tilting the head.

Features:
- Moveable jaw
- Individual mouth piece
- Sanitary one-way bag allows multiple users while requiring a single replacement at end of day
- Removable chest plate for adolescent and adult CPR
- Rugged vinyl skin and long-lasting foam filling

Includes kneeling pads and carry bag.

71 x 46 x 25 cm
M-1013162

Life/form® Overweight Fred Manikin
This unique manikin helps to prepare students to respond to a more typical cardiac arrest situation with a victim who is elderly and overweight. The airway can be setup to simulate airway obstruction or choking situations.

Features:
- Elderly physical appearance
- Large body type with extra “fat” layer
- Realistic head tilt and chin lift for opening the airway
- Palpable and visual anatomical landmarks including the sternum
- Ribcage substernal notch

Included are 3 mouth/nose pieces, 3 disposable lung/airway systems, and a convenient carrying bag.

M-1005685

Replacement parts:
- Replacement Sternum M-1018479
- Replacement Foam M-1018481
- Lung/Airway Systems M-1005686
- Mouth/Nose Pieces M-1005687

Brad™ Compact CPR Training Torso
This economical CPR manikin is constructed of soft, vinyl plastic over polyurethane foam for a “human” feel. Includes 3 mouth/nose pieces, 3 disposable lung/airway systems, nylon carry bag and kneeling pads.

Features:
- Longer torso for realistic abdominal thrusts
- Realistic head tilt and chin lift for opening airway
- Easy to manipulate and realistically simulate airway obstruction or choking situations
- User-friendly, low maintenance lung/airway design

65 x 38 x 22 cm; 5.4 kg
M-1005753

Replacement parts:
- Ribcage M-1013244
- 24 Adult Airway Systems M-1005740
- 10 Mouth/Nose Pieces M-1005741
Choking Manikins
Life-size torsos allow practice of abdominal/chest thrust back blow procedures (Heimlich manoeuvre) and mouth sweep for clearing a blocked airway. When correct procedures are performed, the manikins will expel the object causing the obstruction. Made of durable vinyl to create realistic feel. Include anatomical landmarks such as ribcage, xiphoid process and jugular notch. Supplied with choking objects, shirt and soft carrying bag.

CPR Manikin Adult Torso
This lightweight and easy to transport torso features:
• Airway ball valve which allows the lungs to inflate only if the head is extended and accurately positioned
• Life-like anatomical landmarks such as carotid pulse, sternum, ribcage and sub-sternal notch
• Easy to replace mouth/nose pieces
• Soft carrying case with knealing pads
M-1005725

Replacement parts:
10 Mouth/Nose Pieces M-1005741
10 Airway Systems M-1005742

Act+Fast Rescue Choking Vest
Invaluable tool for CPR instructors to easily and effectively teach students the correct way to perform the Abdominal Thrust Manoeuvre (Heimlich) without using a manikin. When performed correctly, a foam plug shoots into the air, making teaching easy and learning fun. 10 foam plugs included.

Act+Fast Blue
M-1017938

Act+Fast Red
Features a Back Blow Pad for practising ARC and ERC protocol.
M-1014589
Basic Buddy™ CPR Manikins
The one-piece, disposable lung/mouth protection system makes this manikin completely sanitary – there is no risk of cross contamination and no need to sanitise the manikins after use! Rugged carrying bags make transporting the lightweight Basic Buddy™ 5 and 10-Packs convenient (manikins fit into bags fully assembled).

Basic Buddy™
1 manikin, 10 lung/mouth protection bags, 1 insertion tool, instruction manual. 20 x 37 x 52 cm; 2.2 kg
M-1005637

Basic Buddy™ 5-Pack
5 manikins, 50 lung/mouth protection bags, 5 lung insertion tools, 1 carrying bag, instruction manual. 6 kg

Basic Buddy™ 10-Pack
10 manikins, 100 lung/mouth protection bags, 2 carrying bags, 10 lung insertion tools, 2 instruction manuals. 12 kg
M-1005635

Replacement parts:
100 ct Lung/Mouth Protection M-1005638
5 Torso Carrying Bag M-1005639

Optional equipment:
Life/form® AED Trainer with Basic Buddy™ CPR Manikin
Prepare students for emergency situations! Simply push a button to set the sequence of events that will help students learn the appropriate steps to follow in both “shock” and “no shock” situations. Instructors can select from four training scenarios for manual and hands-free training. Provides both audio and written prompts in English.
M-1018857

CPR Prompt® Training and Practice Manikins
Low cost, professional quality manikins ideal for group training! Comprehensive design allows for practice of Heimlich manoeuvre, CPR and mouth-to-mouth breathing. Realistic anatomical markings (Adam’s apple, carotid arteries, navel, rib cage, chest notch) make it easy to learn correct hand placement for checking pulse, performing chest compressions, and more.

Provides valuable student feedback and other important features:
• Head tilt/chin lift required to open airway
• Proper anatomical landmarks
• Audible compression “clicker” to ensure proper technique
• Age selector dial to adjust chest compression piston for learning adult or child techniques
Easy-to-clean heads are dishwasher safe and can easily be sanitised. Lung bags are replaceable. Includes a supply of face-shield lung bags, insertion tool, and assembly instructions.

Note: Only use AED pads designed for foam body manikins.

Adult/Child Manikin

M-1017942

TPAK 700 CPR Prompt® 7-Pack
Includes five adult/child manikins, two infant manikins, 50 adult/child face shield/lung bags, 20 infant face shield/lung bags and nylon carry case.
M-1017941
Realistic training of:
+ Oral, digital, and nasal intubation
+ Ventilation
+ Suction
+ CPR
+ Jaw thrust techniques
+ Defibrillation

**Advanced Child CPR/Airway Management Torso with Defibrillation**
This Life/form® advanced airway management trainer with tongue swelling and laryngospasm is perfect for practising skills on paediatric patients and represents the size of an 8-year-old patient:
- Realistic anatomy and landmarks include teeth, tongue, oral and nasal pharynx, larynx, epiglottis, arytenoids, false and true vocal cords, trachea, lungs, oesophagus, and inflatable stomach bladder to indicate oesophageal insufflation.
- Practise defibrillation using standard manual, automatic, or semi-automatic external monitor defibrillators. An internal load box absorbs the full strength of every shock to protect students and equipment.
- Monitor the manikin, just like a real patient.
Compatible with all standard brands and types of defibrillators, monitors, and patient simulators. Features 4 ECG sites and 2 defibrillation sites.
M-1018864

**Mike and Michelle CPR and Trauma Care Simulator (5 years)**
This anatomically accurate representation of a school age child is a perfect training tool for basic life support such as CPR and trauma care.

Some of the features:
- Fully articulating head and jaw with teeth and tongue
- Individual disposable airways to practise hygienic mouth-to-mouth ventilation
- Airway blocked when head is forward
- Easily accessible chest cavity with moulded rib cage, lungs, and heart
- Realistic chest rise during ventilation
- Carotid, femoral, and brachial arterial pulse sites
Comes with T-shirt and shorts, custom nylon carrying bag, and instruction manual.
M-1017539

**Child CPR Torso**
This economical CPR torso has a single-use airway/lung/face shield system so you will never have to clean, disinfect, or disassemble it.

Features include:
- Realistic chest rise
- Anatomical landmarks like sternum, ribcage and substernal notch
3 airway/lung/face shields included.
40 x 18 x 22 cm; 1.7 kg
M-1005752

Additional Items Required:
100 Airway/Lung/Face Shield Systems M-1005743
Carrying Bag M-1005744
Paediatric One Year CPR and Trauma Care Simulator
CPR and trauma care simulator with an automatically accurate representation of a one (1) year-old child. It is a superb training tool for paediatric basic life support. The upper torso of the simulator has life-size lungs, heart and ribcage, moulded in soft vinyl. The anatomy provides a realistic experience when practising cardiopulmonary resuscitation.

Features:
- Fully articulating head and jaw with teeth and tongue
- Individual disposable airways
- Airway blocked when head is forward
- Easily accessible chest cavity with molded ribcage, lungs and heart
- Realistic chest rise
- Four arterial pulse points
Comes with exercise suit, custom nylon carrying bag, and instruction manual.
M-1017541

CPR Simulator (Infant)
This infant manikin features a realistic look and feel (soft facial skin, jointed elbows and knees, realistic hands, feet, fingers and toes) and is an invaluable educational tool for paediatric basic life support as well as patient care:

Multipurpose training features:
- Bag valve mask ventilation
- Intubation
- Tracheotomy
- Ostomy care
- CPR feedback
- Injection and infusion
- Interchangeable genitalia (catheterisation exercises)
- Intravenous access
- Enema administration
- NG and otic exercises
- Whole set of patient care activities like bathing and bandaging
- Placement of rectal suppositories
M-1014623

Paediatric CPR Manikins
Economically priced manikins for teaching CPR. The lightweight, rugged, realistic manikin is foam-filled with no internal parts to break. Completely disposable airway system with a uni-directional valves. Life-like anatomical landmarks such as nipples, xiphoid process and sub-sternal notch.

PREMIE™ Blue Simulator with Smartskin™ Technology
28-week premature infant manikin that includes an injection arm as well as an intraosseous leg. Students can intubate and perform BVM and CPR exercises. The skin changes colour in direct response to the treatment, a great way of measuring training success. This is intensified by the possibility to track rates of improvement and deterioration on the monitor.

Realistic training of neonatal intensive care:
• Simulate “heelstick” manoeuvre for capillary blood sample
• Oral and nasal intubation and suction procedures
• Bilateral lung expansion with realistic chest rise
• Distinguishing peripheral and central cyanosis from healthy skin tone
• Feeling pulse umbilicus
• Practise placement of umbilical lines
• Simulate CPR with either two-thumb “encircling” technique or two finger alternate compression method
• Practise delicate intraosseous access
• Practise injection and intravenous techniques

Simulator components included:
• PREMIE™ Blue neonate
• Omni® Controller for managing cyanosis and monitoring CPR
• Omni® Code Blue® pack
• International power supply 100-240 VAC
• Connecting cables, instruction manual, carrying bag

M-1018862

Newborn CPR and Trauma Care Simulator with Code Blue® Monitor
This manikin is designed to teach the fundamentals of infant CPR and Trauma care. The Omni® Code Blue® pack monitors and logs the cadence and depth of cardiac compression and airway ventilation. Its features include a fully articulating head and jaw with tongue and SAFE CPR™ individual disposable airways. Comes with instruction manual and carrying bag.
M-1017560

Newborn CPR and Trauma Care Simulator with Code Blue® Monitor plus Intraosseous and Venous Access
With intraosseous access and femoral venous sites. Includes Omni® Code Blue® pack to monitor and log the cadence and depth of cardiac compression and airway ventilation. Instruction manual and carrying bag included.
M-1014570

Newborn CPR and Trauma Care Simulator with Intraosseous and Venous Access
With intraosseous access and femoral venous sites. No Omni® Code Blue® monitor. Instruction manual and carrying bag included.
M-1017561
The Susie® and Simon® Newborn CPR and Trauma Care Simulator
Life support training simulator featuring a fully articulating head and jaw with tongue, and SAFE CPR™ individual disposable airways. Its airway is blocked when the head is forward, and the chest cavity with moulded ribcage, lungs and heart is easily accessible. It has a realistic chest rise during ventilations and multiple arterial pulse points which enhance the effectiveness of the training. Comes with instruction manual and carrying bag.
M-1018866

CPR Cathy™ Infant Manikin with Electronics for Direct Feedback
The infant manikin can be filled with water to approximate the same weight and "feel" as a real child of corresponding size. Realistic chest rise, and other features like life-like ribcage, sternum, xiphoid process, and suprasternal notch help train effective compression techniques. The trouble-free electronics housed outside of the manikin can be used to monitor correct performance during CPR training. Sensors activate lights and/or an audio signal to indicate correct lung ventilation, depth of compression, and correct finger or hand placement. Includes carrying bag and 12 disposable lungs.
66 x 20 x 20 cm; 2.7 kg
M-1017247

Infant Choking Manikin
Train the challenges associated with foreign body obstruction in the young paediatric age group with this 9-month-old baby manikin. By placing the included obstruction in the pharyngeal cavity, you will occlude the throat and initialise the need for protocol manoeuvres to remove the object. When proper hand placement occurs with sufficient force, the object expels from the mouth.

SMART STAT Complete with iPad®
This high end patient simulator takes ALS training into the student’s environment. Instructors can evaluate student knowledge, skill levels, and critical thinking abilities by utilising the applications via the included iPad®: the new interface makes these tasks a lot easier. Responsive controls and dynamic scenarios are easy to manage with PDF formatted reports.
This simulator can function in the lab and in the field for ascertaining diagnostic ability. Student performance records can be transferred to a computer, and chronological scenario event logs can be printed. SMART STAT has an on-board air compressor, includes a free app on the iPhone Store®, and storage for students’ performances.

SMART STAT Complete comes with:
- Amputated bleeding leg
- Intraosseous leg
- Sim vitals 5-line hospital monitor (simply display all vital parameters on the iPad® or an external monitor)
Also comes with an iPad®, USB cable, blood pressure cuff, hard carry case, shorts, and a supply of replacement parts: 10 neck skins, 4 IM injection pads, 6 pneumothorax pads, 3 sets of teeth, and IV vein kit.
140 x 71 x 28 cm; 88 kg
M-1018473

SMART STAT Basic with iPad®
The basic version of SMART STAT comes without the Sim vitals 5-line hospital monitor, amputated bleeding leg, and I/O leg.
140 x 71 x 28 cm; 61 kg
M-1018472

Key training features:
- Advanced airway management
- ECG
- Pacing emergent lung sounds (anterior and posterior)
- Emergent heart sounds
- BP arm
- Pulse points
- Bilateral chest decompression
- Bilateral chest tube insertion
- Virtual capnography and oximetry
- Printable chronological student session reports and scenarios

**Adult ACLS Manikin with Interactive Arrhythmia Simulator**

This full body manikin offers a wide range of Advanced Cardiac Life Support training possibilities including arrhythmia recognition and confirmable defibrillation. The interactive ECG Simulator unit allows defibrillator and pacer training directly on the manikin (training without a manikin is also possible). Various ECG rhythms can be generated and displayed on an ECG-monitor (not included) for diagnostic and defibrillation training. All arrhythmias can be displayed in adult or paediatric mode so that a total of 34 rhythms are available.

- **CPR**: A printer unit allows CPR evaluation
- **Airway management**: I.V. and I.M. injection (at arm)
- **Defibrillation chest**: LED illuminates for pacer pulse detection, defibrillator discharge detection, adult mode, paediatric mode and low battery warning. Supplied with a storage case.

119 cm; 28 kg

M-1005649

---

**Deluxe CRISis™ Torso Manikin**

This easy to transport torso allows training of the following ACLS procedures:

- **CPR**: Palpable and visual landmarks, fully articulated head, neck and jaw
- **Airway Management**: Cricoid cartilage allows for practice of Sellick manoeuvre, separate left and right lungs for auscultation, suctioning capabilities, and oral, nasal and digital intubation capabilities
- **Defibrillation Chest**: Internal load box absorbs full strength of every shock, manual, semi-automatic, automatic defibrillation, monitor manikin like a real patient
- **Interactive ECG-Simulator**: The external unit allows defibrillator and pacer training directly on the manikin. All arrhythmias can be displayed in adult or paediatric mode so that a total of 34 rhythms are available. Battery saver feature powers-off simulator automatically when not in use.

10.5 kg

ECG Training Vest

The new ECG Training Vest offers an inexpensive way to communicate with a live patient while monitoring. Since the volunteer wears this vest there is no need to use a high fidelity simulator. Vest can be hooked up to the ECG Simulator. Includes the interactive ECG Simulator, contains no electrical energy and is not for defibrillation practice.

- Size: 30.5 x 30.5 x 22.9 cm; 2.25 kg

M-1017249

Life/form® Deluxe Child CRiSis® Manikin with ECG Simulator

This full body manikin of a 5-year old child offers a wide range of ACLS training, including:

- CPR
- Airway management
- I.V. injection (at arm)
- Blood pressure measurement
- Intravenous infusion
- Femoral access
- Defibrillation chest

The interactive ECG Simulator unit allows defibrillator and pacer training directly on the manikin. Various ECG rhythms can be generated and displayed on an ECG-monitor (not included) for diagnostic and defibrillation training. All arrhythmias can be displayed in adult or paediatric mode so that a total of 34 rhythms are available.

Life/form® 15-Lead ECG Placement Trainer

Teaches up to 15-lead ECG electrode placements anatomically and provides visual feedback on the accuracy of electrode placement. Anatomical landmarks include intercostal spaces, midclavicular line, anterior axillary, line, midaxillary line, and scapula. Features connection sites for four limb leads and V1 through V9, with the ability to attach right- or left-sided electrodes. Does not provide ECG output signals, but simulations of rhythms and hands-free defibrillation can be performed by adding any ECG arrhythmia simulator directly to your ECG monitor.

M-1018638

12-Lead Arrhythmia Simulator with Manikin Overlay – Zoll, Large

Use on any large-sized manikin to change it into a 12-lead trainer. Pace and defibrillate directly on the overlay system connected to the interactive 12-lead ECG simulator.

Training features:

- Four preset pacing capture levels: 70, 80, 90 or 100mA. Waveforms for pacing: Sinus Brady (two), 1st degree A-V block, 2nd degree type I A-V block, 2nd degree type II A-V block, 2nd degree type II A-V block with PVCs, and 3rd degree A-V block.
- Waveforms for defibrillator training: V. Fib, V. Tach (high rate), V. Tach (low rate), Torsade, A. Fib, A. Flutter, 2PSVT, Sinus Tach, Sinus rhythm, Sinus rhythm with PVCs, and Asystole.
- ST segments and T wave of abnormalities: Anterior MI, Inferior MI, Antero-Septal ST elevation, Anterior ST depression, Lateral ST elevation, and Inferior ST elevation.

M-1020845

Deluxe Life/form® Infant Crisis™ Manikin with Interactive ECG Simulators

Everything you need for PALS training in one manikin!
Allows practice of:
• 4-lead ECG monitoring
• IV therapy
• Umbilical catheterisation
• Infant airway management
• Intraosseous infusion
• CPR
Includes:
• 6 umbilical cords, 6 umbilical cord clamps, 1 IV bag with clamp, 1 quart artificial blood, lubricant and 8 towels. The basic version can be upgraded by adding the modular components available below.
M-1017248

Add these modules for advanced training features, or choose the advanced or deluxe version right away:

Advanced Life/form® Infant Crisis™ Manikin
Complete resuscitation system designed for teaching life-saving techniques for infants.
Allows practice of:
• 4-lead ECG monitoring
• IV therapy
• Umbilical catheterisation
• Infant airway management
• Intraosseous infusion
• CPR
Includes:
• IV bags with clamps, synthetic blood, winged infusion sets, syringes, 22-gauge needles, disposable umbilical cords and clamps, lubricant, intraosseous bone kit with needle, towels, instruction manual, and hard carry case.
M-1005658

Deluxe Life/form® Infant Crisis™ Manikin with Interactive ECG Simulators

Added realism with Interactive ECG Arrhythmia Simulator:
Simulates 17 adult heart rhythms and 17 pediatric rhythms. With an external pacer, you can also simulate electronic capture and cardioversion with manual, semiautomatic, or automatic defibrillation.
Includes:
• ECG Chest Skin, IV bags with clamps, synthetic blood, winged infusion sets, syringes, 22-gauge needles, disposable umbilical cords and clamps, lubricant, intraosseous bone kit with needle, towels, instruction manual, and hard carrying case.
65 x 44 x 14 cm
M-1018146
**PALS Manikin with ECG-Simulator**

This simulator model of a female infant allows practice of a wide range of paediatric ALS techniques. Soft carrying bag included. 57 cm; 3 kg

**Features of the PALS Manikin include:**
- Bag valve mask ventilation
- Oral and nasal intubation including Sellick’s manoeuvre
- Placing of NG tube
- Three lead ECG monitoring (16 different arrhythmias with adjustable heart rate)
- Palpation of brachial pulse
- External chest compressions
- Movable jaw
- IV sites in hand and arm for blood sampling or fluid injection
- Intraosseous needle insertion and aspiration of bone marrow in both legs
- Palpation of scalp vein, cranial sutures and fontanelles

M-1005759

---

**PEDI Blue Neonatal Simulator with SmartSkin Technology**

A spectacular newborn simulator which changes colour based upon an initial pre-selected condition and measures the effectiveness of airway ventilation and chest compression. In addition, the simulator has all the conventional features found in airway management trainers. Can be upgraded with an intraosseous leg and an injection training arm.

**Simulator components included:**
- PEDI Blue neonate
- Omni® Controller for managing cyanosis and monitoring CPR
- Omni® Code Blue® pack
- International power supply 100-240 VAC
- Connecting cables, instruction manual, carrying bag

M-1013066

---

**PEDI® Neonatal Simulator**

This anatomically accurate newborn simulator features a fully articulating head, neck, and jaw, permitting head tilt/chin lift, jaw thrust and neck extension. Realistic mouth, trachea, bronchi, lungs, and distensible stomach for practising gastric suctioning and feeding exercises. Airway with crico cartilage permits intubation, suctioning, and the Sellick manoeuvre. Realistic internal organs for unparalleled CPR performance. Includes carrying bag and Omni® Code Blue® Pack for CPR monitoring.

This simulator is ideal for training:
- Airway management
- Femoral IV
- Intravenous access
- Umbilical catheterisation
- IO access

STAT Baby – Training for Life

STAT Baby brings you an extremely life-like simulator for infant care by utilising new materials for tactile awareness during patient assessment. Developed in conjunction with leading paediatric physician involvement, this baby contains a wide range of skill sets in a simple format that is very affordable. The infant is sized to a 9-month-old.

Features:
• IO leg
• Peripheral IV (left hand and foot)
• IM left deltoid and thigh and SC injection sites
• PICC line
• ET tube insertion
• Laryngeal spasm
• Tongue edema
• LMA insertion
• Trachea care
• NG tube placement with fluid reservoir
• Feeding tube care
• Rectal medication
• Pulses (6 pulse locations – 2 brachial, 2 femoral, 2 carotid)
• Defib (shock level 2-4 joules per kg)
• Foley cath insertion (female manikin)
• Pneumothorax

Comes with IV vein kit (1 arm and 1 leg), leg skin (1), arm skin (1), IO leg bones (12), pneumothorax sites (4), injection site (2), Picc line site (1), reservoir bag (4), defibrillator adaptors, ECG interactive simulator, and simulated blood powder (1).

6.8 kg
M-1005779
STAT Baby Advanced

STAT Baby Advanced has all the features of a STAT Baby, but utilizes easy-to-use iPad® technology. It gives the instructor control of the physiological features of the baby to deliver challenging training to develop student assessment skills and easily tracks sessions for later review and debriefing. Key functions include managing student information, easily create alternate scenarios or use those already existing, and efficient records management of the training, all managed through an easy iPad® interface. It satisfies every training need for post-neonatal care of pediatric patients, from introducing students to basic concepts to challenging medical staff in advance medical procedures. This affordable trainer augments your training budget by utilizing low-cost replacement items in those areas where repetitive, perfect practice, makes perfect skill attainment.

Includes the following standard features of the STAT Baby:
- 7 pulse points
- I/O leg
- 3 IV sites
- PICC access site
- IM/SQ injection sites
- Advanced intubation head with tongue edema and laryngospasm
- Pneumothorax reduction bilaterally
- 4-lead monitoring

Also includes these additional features:
- Chest tube insertion (left side only)
- Defibrillation
- Rectal medication
- Urinary catheterisation
- Very lifelike new skin material
- Replacement parts
- Accepts LMA, ET, OPA, NPA, and LT airways

The STAT Baby Advanced comes with its own iPad®.
140 x 71 x 28 cm
M-1020195
LIFE-LIKE NEONATAL PATIENT CARE SIMULATION!

NENAsim was created to complement realistic multidisciplinary team or individual baby patient simulation training. NENAsim is a neonatal, high-end simulator with an unprecedented level of realism and offers an ideal training solution for a wide range of healthcare professionals including patient care, emergency medical intervention and resuscitation training.

The combination of the neonatal simulator and the software make for the perfect training combination. Experiencing the movements with realistic haptic feedback and being able to use varying scenarios with the software allow for a fast and lasting learning effect.

The software provides Wi-Fi communication between the baby and the monitor (not included). It has a user-friendly touchscreen interface, which allows control of the movements and shows its vital signs. Configurable parameters are displayed on the patient monitor for real-time training interaction.

Scenarios can be pre-programmed by the user or accessed from the extensive scenario library

The NENAsim patient software is a perfect tool for training neonatal examination. It has the following parameters for setting up various scenarios: blood pressure, heart-rate, ECGs, SpO₂, CO₂, ABP, CVP, PAP, PCWP, NIBP, TOF and many more. The trainer can choose from one of the 5 available standard scenarios or build their own. New parameters can be added at any time in order to alter the existing scenarios. Individual as well as team trainings with different language options are possible. Trainees learn from monitoring the displayed parameters – it enables them to deduct the correlation between the measured values and the clinical picture of the patient, thus helping in recognising and managing paediatric emergencies.

› Please scan the code to see the realism of NENAsim in a video demonstration.
Realistic Anatomy
NENAsim has a life-like appearance and movement of the eyes, head and neck. The silicone skin changes its temperature, whereas no visible artificial joints make its outer appearance even more realistic. Variable breathing patterns as well as torso motion can be controlled via provided software.

Airway Management
Paediatric airway management remains the most difficult task that many healthcare professionals need to face. Success of any technique or clinical performance depends on constant training which comes from understanding anatomical and paediatric airway facilities. NENAsim allows performing all aspects of neonatal airway management training and gives trainees the necessary confidence to deal with their little patients in the future.

New Airway features:
• ET Tube Insertion
• LMA Insertion
• Positive Pressure Ventilation
• Right Mainstream Intubation
• Gastric Tube insertion

Breathing
Newborns and infants might experience breathing difficulties resulting from several different illnesses. NENAsim offers a variety of difficult breathing patterns and complications to help learners tackle these difficult problems in the future. In addition, NENAsim makes the training even more realistic through its vocal sounds library.

Breathing Features:
• Spontaneous Breathing with variable rate
• Bilateral and Unilateral Chest rise and fall with Mechanical ventilation
• CO2 Exhalation

Breathing Complications:
• Pneumothorax
• Unilateral chest movement with Mechanical ventilation
• Unilateral Breath sounds
• Unilateral needle thoracentesis, Mid-axillary

Sounds
• Lung: Normal, stridor, pneumonia and others
• Heart: Normal, diastolic murmur, systolic murmur and others
• Possible for users to add more sounds of their choices

CPR
About one quarter of all neonatal deaths are caused by failing to initiate and sustain breathing at birth. Effective resuscitation can prevent a large proportion of these deaths – NENAsim has been designed to teach the fundamentals of infant CPR and trauma care. Open the airway by tilting NENAsim’s head and chin, and begin the resuscitation.

Blood circulation
Blood pressure, pulse rate and respiratory rate are the routine vital signs measured in neonatal care. NENAsim offers versatile BP and ECG features, all of which can be controlled and displayed on the monitor.
• Extensive ECG Library with rates form 10 – 300 bpm
• ECG Monitoring via 3-lead monitor

Additional Features
Wireless autonomous local network broadcast its own signal so the training can be organised anywhere or with any scenarios (outdoor, accident, emergency and not only in clinical setup).
55 x 61 x 23 cm; 10 kg
Light skin M-1020899
Dark skin M-1018876

Adult Airway and CPR Trainer
The perfect trainer for practising fundamental intubation and CPR skills. Features a life-like airway and a durable chest recoil system. It is OMNI and CPR compatible, thus capable of providing real-time CPR quality feedback and reporting.
- Nasal and oral Intubation: ETT, LMA, King LT®
- Gastric distension with oesophageal intubation
- Nasal passage permits placement of NP tube

**M-1019855**

Adult Multipurpose Airway and CPR Trainer
Train participants to recognise laryngospasm and if needed, perform an emergency tracheotomy or cricothyrotomy. To improve CPR training, add the OMNI® Code Blue® Pack option to view real-time CPR quality feedback via the handheld OMNI controller and PC link software.
- Laryngospasm
- Tracheostomy and cricothyrotomy
- Nasal and oral Intubation: ETT, LMA, King LT®
- Right mainstem intubation presents unilateral chest rise
- Gastric distension with oesophageal intubation

**M-1019856**

**Option:**
**Omni® Code Blue® Pack**
Monitors and logs the cadence and depth of cardiac compression and airway ventilation.

**M-1020211**

Adult Deluxe Airway Management Trainer
The life-like feel and an anatomy emphasising accurate visualisation features makes this trainer the choice for advanced airway management with the convenience of board mounting. Features include laryngospasm and tongue edema. Both air bags for lungs and stomach are visible for easy determination of successful intubation. All the anatomical landmarks are shown and the vocal cords are highlighted for easy viewing. The upper teeth break out if inappropriate technique is applied during intubations. Board is anchored to surfaces by suction cup feet. Delivery with soft carry bag, lubricant and instructions for use.

**M-1018851**
AirSim Advanced Model
The AirSim Advanced Model features the uniquely constructed AirSim airway designed to provide true, anatomically correct and visually accurate internal features. The addition of a "real-feel" skin covering provides a more realistic bag mask ventilation training experience.

**Features:**
- Improved neck design allowing for accurate articulation
- Anatomically accurate nasal passage
- Inflatable tongue to increase difficulty of airway
- Option to include “breakout teeth” to simulate the effects of bad practise in laryngoscopy

46 x 26 x 33 cm; 3.05 kg

AirSim Advanced Model with Bronchial Tree

With Bronchial Tree M-1015530

AirSim Bronchi Model with Nasal Passage
The AirSim Bronchi is the latest product addition to the AirSim family, providing anatomically correct detail down to the fourth generation bronchi. The AirSim Bronchi provides exceptional detail in both internal and external features; made possible through a combination of cutting edge moulding technology and carefully handcrafted processes.

The **AirSim Bronchi unit will provide a solution to your training needs in:**
- Diagnostic bronchoscopy
- Lung isolation techniques using left and right endobronchial tubes and bronchial blockers
- Lung suctioning techniques

46 x 26 x 33 cm; 3.05 kg
M-1015523

AirSim Multi Model with Nasal Passage
The AirSim Multi contains the key features of the AirSim Standard Model with the addition of a nasal passage and a chin. The AirSim Multi Model facilitates training on nasal procedures as well as bag and mask ventilation techniques. The nasal passage has been developed in a manner similar to the main airway. This gives the same anatomical realism and functionality, important landmarks such as the turbinates are clearly defined. In addition, the material used offers the same tactile feedback which is delivered with the main airway itself.

**M-1015519**
“Airway Larry” Torso with Defibrillation Features, ECG Simulation, and AED Training

The Life/form® Advanced “Airway Larry” Airway Management Trainer is now even better with chest skin that lets you practise defibrillation using standard manual, automatic, or semi-automatic external monitor defibrillators. An internal load box absorbs the full strength of every shock to protect students and equipment. The included interactive ECG simulator comes with 6 waveforms available for pacing and 17 Adult/Pediatric Rhythms. The included Life/form® Universal AED Trainer can be used to set the sequence of events that will help students learn the appropriate steps to follow in both “shock” and “no shock” situations.

M-1018868

Life/form® “Airway Larry” Adult Airway Management Trainer on Baseboard

This trainer simulates a non-anaesthetised patient and features anatomical landmarks such as: teeth, tongue, oral and nasal pharynx, larynx, epiglottis, arytenoids, false cords, true vocal cords, trachea, lungs, oesophagus, cricoid cartilage and stomach. Train the following procedures: Oral, digital, and nasal intubation E.T., E.O.A., P.T.L., L.M.A., E.G.T.A., and Combitube® insertion, Sellick manoeuvre, ventilation, CPR, suction techniques, and proper cuff inflation can all be practised and evaluated. Comes with a training stand to mount.

63 x 30.5 x 40.6 cm; 15.1 kg

Advanced Airway Larry Trainer

The Life/form® Advanced Airway Management Trainer Larry offers tongue swelling and laryngospasm in addition to all the features on the standard models. Your students can now be presented with the additional challenges they may face in the real world. The trainer simulates a non-anaesthetised patient for practising intubation, ventilation, and suction techniques. Realistic anatomy and landmarks include teeth, tongue, oral and nasal pharynx, larynx, epiglottis, arytenoids, false cords, true vocal cords, trachea, lungs, oesophagus, and stomach. The trainer allows you to practise oral, digital, and nasal intubation, as well as E.T., E.O.A., P.T.L., L.M.A., E.G.T.A., Combitube®, and KING Airway System™ insertion. Comes with a training stand for mounting.

M-1019249
Critical Airway Management Training
This advanced intubation head and coupled with the CPR torso supply the challenges for initiating respiratory care to the critical patient. By using the features of tongue swelling and laryngospasm the instructor creates a critical airway management problem that requires the student to perform cricothyrotomy. In addition, two external and one internal bleeding wounds demand attention with suctioning and bleeding control.

Adult Airway Management Trainer
The detailed anatomy provides a clear picture for intubation training: sculpted alveolar sac, bronchial tree, blood vessel structures of the cross-sectioned and exposed flexible lungs, interior main bronchus and oral/nasal pharyngeal spaces. Combine these with an airway complicated by breakout teeth, tongue edema, and laryngospasm, and this airway trainer really stands out. The stomach swells with oesophageal intubation, or excessive pressure with the BVM during rescue breathing, and it is also has the capability of vomiting. Comes complete with instructions for use, soft carry bag, lubricant, and replaceable lungs and stomach.
32 x 24 x 12 cm; 18.65 kg
M-1005774

Economy Adult Airway Management Trainer
The basic version for training of intubation procedures and skills, including anatomy knowledge and recognition, endotracheal intubation, nasotracheal intubation, use of field emergency airway adjunct tubes like LMA s and Combitube, securing, and suctioning, and maintenance of the installation can all be practised with this unit.
M-1005780
Life/form® Basic Child CPR/Airway Management Torso (not shown)
Ideal for practising intubation, ventilation, suctioning techniques, and CPR.
This torso is designed to be the foundation of the Child CRiSis™ system.
M-1018865

Optional equipment:
Defibrillation Chest Skin
M-1019789

Airway Trainer, 1 Year old Child
Skill training designed to present the same challenges experienced by paramedics and physicians in the real world with very young patients.

Full body manikin features:
- Realistic chest cavity containing realistic organs
- Fully articulating head, neck and jaw permitting head-tilt/chin lift, jaw thrust and neck extension into the sniffing position
- Anatomically accurate mouth, tongue, airway and oesophagus of a 1 year old
- Soft neck with cricocartilage permits classic Sellick manoeuvre
- Realistic chest rise during ventilation
- Realistic trachea, bronchi and lungs. Observable bilateral lung expansion under positive pressure ventilation
- Airway narrows below vocal cords (realistic with “fish-eye” appearance)
- Airway diameter
- Nasal passage permits placement of NP tube
Includes carrying bag and instruction manual.
M-1018863

Life/form® Advanced Child CPR/Airway Management Torso with Defibrillation Features
This advanced airway management trainer is perfect for practising skills on paediatric patients (5-year-old). Practise intubation, ventilation, suction, CPR, and jaw thrust techniques. Also offers tongue swelling and laryngospasm in addition to all the features on the standard models.

- Realistic anatomy and landmarks
- Oral, digital, and nasal intubation
- Separate lungs for auscultation
- Manual carotid pulse
- Inflatable stomach bladder indicates oesophageal insufflation
Practice defibrillation using standard manual, automatic, or semi-automatic external monitor defibrillators. An internal load box absorbs the full strength of every shock to protect students and equipment.
M-1018864

Life/form® Advanced Child CPR/Airway Management Torso

Child Airway Management Trainer Head with Lungs and Stomach
A simulated head of a 5-year-old child featuring realistic size and anatomy. Perfect for practising airway management skills on paediatric patients. Realistic anatomy, practise suctioning and oral, nasal, and intubation techniques. Separate lungs can be added for auscultation. Can be attached to any Life/form® Child Airway Management Trainer or Child CRiSis™ Manikin. Pump spray lubricant included.
Manual carotid pulse.
M-1019788

Advanced Child Airway Management Trainer, Head Only (not shown)
M-1019787

Airway Management | Child
AirSim Baby
Features realistic anatomy and a clinical functionality that enables basic and advanced paediatric airway management. AirSim Baby facilitates training in the use of bag/mask ventilation, supraglottic airway insertion and both naso and orotracheal intubation. In addition, it can be used with all current video laryngoscopes. Realistic airway allows for training in all aspects of infant airway management including positive pressure ventilation, insertion of laryngeal masks and endotracheal intubations (nasal and oral).

Infant Intubation Head
This trainer of an infant allows practice and training of nasal and oral intubation.

Features include:
- Inflatable lungs and stomach
- Vocal cords are highlighted in white for easy laryngoscope viewing
- Anatomical landmarks such as uvula, vocal cords, glottis, epiglottis, larynx, arytenoid cartilage, trachea, oesophagus

Supplied with carrying bag and lubricant.
30 x 20 x 13 cm; 0.8 kg
M-1017245

Intubation Head
For instruction and practice of endotracheal intubation. The accurately modelled life-size head allows the correct depth, angle, and pressure of insertion of a laryngoscope to be taught. Mounted on base. Delivered without laryngoscope.
21 x 16 x 17.5 cm; 0.6 kg
M-1005102

Infant Airway Trainer on Baseboard
The infant airway management trainer features realistic size and anatomy and is perfect for practising airway management skills on an infant. Comes with a training stand to mount.
M-1017954

Advanced Infant Intubation Head with Board
This station trainer incorporates new skin technology. The new material eliminates tearing of the airway, caused by beginning student intubation attempts. New tear-resistant material especially for beginners. Translucent property allows for life-like illumination of the airway and neck as the skill is attempted. Vocal cords are highlighted for easy viewing, the tongue swells, and all the anatomical landmarks are present.
38.1 x 25.4 x 20.3 cm; 4.08 kg
M-1017236

NG Tube Insertion Trainer
For nasogastric tube insertion and care practice. The oesophagus and stomach reside within the head for ease in storing and transporting to various classrooms or lab tables. The head comes mounted on a flat plate to hold it steady. No moving parts and simple construction assure longevity.
31 x 31 x 23 cm; 1.4 kg
M-1017250
ADVANCED TRAUMA LIFE SUPPORT

Truman Trauma System:
+ Chest tube insertion
+ Needle Decompression of tension pneumothorax
+ Cardio Pulmonary Resuscitation
+ Needle and Surgical Cricothyroidotomy
+ Airway Management Skills including OP and NP airway tube insertion, tracheal intubation, bag valve mask techniques, supraglottic airway insertion and ventilation
+ Percutaneous Tracheostomy
+ Identification of tracheal deviation and jugular vein distension

Cricotracheotomy Trainer
An extremely realistic alternative to using animal tissue or cadavers. The soft tissue has the feel of real skin and the unique trachea make it a very effective teaching and learning tool. Using a disposable trachea transforms the trainer into an effective low-cost system.

Key Skills:
• Palpation of anatomical landmarks and needle cricothyroidotomy
• Practise surgical cricothyroidotomy with scalpel
• Identification of cricothyroid and thyroid cartilage
• Practise insertion of mini trach devices
• Use Percutaneous Tracheostomy Kit or Seldinger approach
• Assess styled and obturator placement
45 x 15 x 36 cm
M-1005180

Truman Trauma
The Truman Trauma System offers an anatomically correct simulated human torso designed for practice of several surgical procedures together with the renowned AirSim head for training the full range of airway management and resuscitation skills. The Truman Trauma System also allows the use of replaceable tissue sets that allow each learner a life-like & unique surgical experience.
79 x 45 x 28 cm; 14 kg

Trauma Kit 2 Tracheas and 4 sheets of skin M-1005181
Cricotracheotomy Neck Muscle M-1005183
Cricothyrotomy Simulator
The newly designed Life/form® Cricothyrotomy Simulator has been developed for learning and practicing the techniques necessary to perform needle or surgical cricothyrotomy procedures. Paramedics, EMTs, combat medics, flight nurses, anesthesiologists, and other emergency medical personnel will have the opportunity to strengthen their ability and confidence to perform or assist in implementing surgical airways.

- Anatomically accurate landmarks aid in site training and allow for fast action.
- The hyperextended neck allows the user to determine the proper incision site. The trachea in the simulator is replaceable, as the airway passes completely through from top to bottom. This allows checking the stylet and obturator placement once the incision has been made.
- Complete with a chin and full-size neck, ties can be used to hold the obturator in a secure position. Inflation of the simulated lung verifies correct placement.

Includes the simulator with base, six replaceable neck skins, six adult trachea inserts (four rigid, two soft), six child trachea inserts (four rigid, two soft), two simulated lungs, instruction manual, and hard carry case.

M-1020255

Tracheostomy Care Simulator
The simulator replicates an adult male containing oral and nasal passages and all appropriate anatomy—pharynx, epiglottis, trachea, oesophagus, stoma, cricoid cartilage, and representative cervical vertebrae. The chest area contains left and right bronchi and the bronchial tree. The oesophagus “dead ends” 2” below the trachea opening. The side of the neck and chest area over the bronchial tree allow viewing of the suction and trachea tube. Viewing window at the bottom of the simulator to show the position of the suction catheter. Tracheostomy tube is not included.

53 x 28 x 53 cm; 11 kg

M-1005592

Mini Cricotracheotomy Trainer, Individual
Use of a non-biological disposable trachea transforms this trainer into a very effective low cost system.

18 x 16 x 10.5 cm; 0.56 kg

Cricothyrotomy Simulator

Advanced Trauma Life Support | MEDICAL SIMULATION

2023 3B INNOVATIONS INC. 141
Endotracheal Intubation Simulator
Endotracheal intubations require highest skills and are accompanied by risks. This intubation simulator provides exceptionally good and realistic intubation training.
• Acquire both the skill of oral and nasal tracheal intubation
• Acquire the skill of handling supraglottic airway devices
• Confirm left and right air sounds with a stethoscope
• Determine ventilation of one lung
75 x 45 x 24 cm; 14 kg
M-1005396

Chest Drain Simulator
This innovative design not only simulates realistic body tissue but provides an alternative to the use of animal tissue. The design is unique in having a replaceable chest wall with ribs that are encased into the realistic simulated flesh that forms the torso. This fleshy part is replaceable and can used for up to 25 incisions. It is housed in a white plastic torso-shaped box that is firmly secured and has strong suction feet to ensure non slip use on smooth table-top surfaces. The torso presents 3 patient positions: on the left side, on the back, and in upright sitting position.
57 x 37 x 43 cm
M-1005175

Pneumothorax Training Manikin
Designed for the practice of properly inserting a needle to permit built up air pressure to escape the thorax.
The torso accepts needle thoracotomy in the second intercostal space in the midclavicular line, or the fifth intercostal space in the midaxillary line. Comes complete with replaceable lungs, a rib cage, and a soft, life-like replaceable skin. Unit can be punctured approximately 75 to 100 times before replacement is necessary.

**Life/Form® Chest Tube Manikin**
Comprehensive manikin to teach the theoretical knowledge and the practical skills needed to manage pre-hospital chest trauma as well as ongoing chest tube maintenance: The right side of the manikin has **two cut-away viewing areas** to provide awareness of the anatomical relationships between the skin surface, musculature, ribs and lungs. The left side has a **pressurised tension pneumothorax** site to relieve air that has accumulated within the pleural space and is restricting lung inflation. There is also a site where chest tubes may be surgically placed to treat pleural effusion by draining fluids from the pleural space. The fluid colour, volume and viscosity is controlled by the instructor.

**Life/form® Pericardiocentesis Simulator**
Designed specifically for **skill training** in pericardiocentesis, chest tube maintenance and the management of prehospital chest trauma. The simulator has a pressurised tension pneumothorax site and a site for the surgical placement of a functional chest tube. Fluid colour, volume, and viscosity can be controlled by the instructor. Any commercially available closed water seal drainage unit can be used. Pericardiocentesis may be performed in the left subxiphoid space and in the left fifth intercostal space. Accurate placement of the needle will allow for the withdrawal of fluid from the simulated pericardium.
Includes fluid reservoir bag, foot pump, surgical skin pads, subcutaneous surgical pads, nurse training pads, pneumothorax pads, blood powder, methyl cellulose thickener, simulated pericardium, IV bag, and a hard carrying case.

Rescue Randy 9000
Designed to be customised by the user for optimal training use. The manikin is made from rugged polyethylene parts that allow for the addition of varying amounts of weight (maximum weight filled with water 77 kg or sand 113 kg) to each of the pieces. The empty manikin is easily moved and stored when training is completed.

Can be filled with water or sand to adjust the weight!

Train with Randy 9000 in any environment imaginable!
The range of motion of the joints, including bending at the waist, mimics real life. Randy 9000 is perfect for RIT (Rapid Intervention Team) trainings or Combat Challenges as well as shipboard, heavyweight, horizontal rescues or lightweight packaging exercises like spinal immobilisation. The joint design protects rescuers' fingers. May be used in all weather conditions. Each manikin component is easy to replace.
M-1017945

I.A.F.F. Rescue Randy
Strengthened for Extrication Training
Designed with the help of the International Association of Fire Fighters (I.A.F.F.). Developed for life-like adult or juvenile patient handling and transportation. Includes additionally reinforced frame to increase durability for the forces used in extrication training.

Features include:
• Fully articulated for positioning in widely diversified training environments
• Weight distribution according to human weight distribution chart
1.83 m tall, approx. 84 kg
Clothing not included.
M-1019955

Flexible Rescue Randy
Developed especially for the aerospace industry and wing tank fuel cell rescue training, this regular sized Rescue Randy unit can be utilised in any confined space rescue scenario. The waist and head are flexible allowing a wide range of movements. This allows positioning under dashboards and in other extremely tight spots.
M-1017944

TI Rescue Randy Trainer with Thermal Imaging Capabilities
The thermal imaging capability with TI Rescue Randy expands options for rescue training. Thermal imaging scanners are now able to see Randy at a distance of over 6 m. Special heaters in the face and hands operate off of standard 110V or 220V power outlets and reach the desired temperature in 15 minutes. You can set the temperature you want on TI Rescue Randy and he will be visible on a scanner for over 45 minutes unplugged. Ideal for rescue training in buildings or search and rescue in the field. Rescue Randy TI will stand out from the background thermal image.
Approx. weight 74 kg.
M-1019954

Bariatric Rescue Suit for use with Rescue Randy
Developed for training scenarios for the extrication of morbidly obese patients. The Bariatric Suit replicates the weight and the movement in body tissue associated with morbidly obese patients. The weight can be modified up to approx. 200 kg by adding water. When the exercise is complete, the water can be simply drained away, thus making the manikin more portable. In its dehydrated version, the manikin can be easily transported between locations. Suit is for manikin use only, fits the original Regular Rescue Randy manikin.
M-1017943

A simple way to upgrade your rescue manikins:
Weighted Vests (not shown)
Optimise training and increase the complexity of scenarios by adding a weighted vest to rescue manikins.
9 kg M-1005705
13,5 kg M-1005706
18 kg M-1005707
**Rescue Manikins**  
*Developed for life-like adult or juvenile patient handling, transportation, and extrication training!*

These manikins can be safely used in situations too hazardous or uncomfortable for human volunteers. Fully articulated for positioning in widely diversified training environments. The manikins can be seated in an automobile, positioned in a smoke-filled room for fire rescue training, and immobilized on a stretcher for mountain rescue instruction. They are also useful for simulating the removal of victims from utility poles, conduits, mine cave-ins, and tunnels as well as in limitless other training procedures. Made of tough cast vinyl with zinc-plated steel frame for longevity and rugged use. Not fire resistant, not for water rescue.

**CPR Water Rescue Manikins**  
Perfect for Coast Guards, Lifeguard Trainers, and Emergency Personnel to train water rescue and retrieval as well as CPR. The manikins have articulated joints and are made of durable plastic and rust-resistant steel. When filled with water the manikins will submerge to the neck, if an additional 2 or 4 kg, (a brick will do) is added, they will sink completely.

- **Adolescent, 1.22 m tall, 9 kg** M-1018325
  - Replacement Parts:  
    - 24 Airway Systems M-1005735
    - 10 Mouth/Nose Pieces M-1018326

  - Replacement Parts:  
    - 24 Airway Systems M-1005765
    - 10 Mouth/Nose Pieces M-1005741

**Pocket CPR**  
This FDA cleared device reminds the rescuer what to do before initiating CPR and coaches the rescuer with feedback during CPR.  
M-1018144

---

**Water Rescue Manikins**  
These manikins allow coast guards, lifeguard trainers, and emergency personnel to train water rescue and retrieval. When filled with water the manikins will sink to the bottom.

- **A. Child Water Rescue Manikin**  
  3 years old. Weight when filled with water: 9 kg  
  M-1005739
- **B. Infant Water Rescue Manikin**  
  6 – 9 month old. Weight when filled with water: 5.5 kg  
  M-1018327
- **C. Newborn Water Rescue Manikin**  
  Weight when filled with water: 3.2 kg  
  M-1005699
**Comprehensive set for advanced casualty simulation!**

**Casualty Simulation Kit IV**
This complex casualty simulation kit uses components applied to human and manikin patients for the widest variety of training situations possible. Wounds can be strapped on, stuck on, created from wax, and can bleed to challenge both the volunteer and the professional in areas of burns, lacerations, fractures of arms and legs, and amputations.

**Realistic tools for life-like emergency medical training!**

**Simulated wounds include:**

**Bleeding:**
- Jaw wound, abdominal wound with protruding intestines, sucking wound of chest, compound fractures of humerus, femur, and tibia, laceration of the forehead, open amputation, gunshot wound of palm

**Non-bleeding:**
- Assorted stick-on lacerations and open fracture wounds
- Phosphorous burn of the hand, face in shock
- 2nd & 3rd degree burn of the face, chest, back, hand, and forearm

Comes complete with extensive makeup accessories and reservoir bags with pump assembly. 61 x 23 x 46 cm; 14.6 kg

**M-1005711**

**Additional Stick-on Wounds (not shown)**
12, assorted

**M-1019676**

**Casualty Simulation Kit I**
The most economical way to get started in simulated injuries. Re-useable wounds and refilla-ble accessories let you practise bandaging and splinting techniques repeatedly.

**Includes:**

**Bleeding wounds:**
- 1 Compound fracture tibia

**Non-bleeding wounds:**
- 12 Assorted stick-on lacerations and open fractures

Comes complete with basic makeup accessories (including acrylic to simulate glass embedded wounds) for basic injury simulation and reservoir bags with pump assembly. 33 x 25.5 x 13 cm; 2.3 kg

**M-1005708**

**Casualty Simulation Kit II**
For more complex wounds to test higher levels of skill in bandaging and patient care while keeping initial expenditures low.

**Includes:**

**Bleeding wounds:**
- Open amputation, compound fracture of humerus, and compound fracture of tibia
- Sucking wound of chest, gunshot wound of palm

**Non-bleeding wounds:**
- 24 Assorted stick-on lacerations and open fractures

Comes complete with makeup accessories (including acrylic to simulate glass embedded wounds, blood powder for 13.5 litres) for complex injury simulation and reservoir bags with pump assembly. 25.5 x 23 x 46 cm; 4.1 kg

**M-1005709**
Neonatal Wound Kit
For use on newborn manikins. These wounds represent the major complications associated with critical neonates. Development of each wound coincides with the S.T.A.B.L.E. program, which consists of Sugar, Temperature, Airway, Blood pressure, Lab work, and Emotional Support.

**Included in the kit are the following anomalies:**
- Abdominal Distention, Gross
- Abdominal Distention, Moderate
- Gastrochisis
- Myelomeningocele
- Omphalocoele
- Slack Face
- Subgaleal Haemorrhage

Comes in a hard plastic carrying case
34 x 23 x 15 cm; 2.7 kg
M-1017261

Practise neonatal care with realistic wounds!

Casualty Simulation Kit III
Especially suitable for use in the creation of disaster scenarios where application of makeup on multiple casualties creates the widest range of wounds. Contains speciality wounds associated with gunshot, like perforations, major avulsions, and complex jaw wounds.

**Includes:**
- Bleeding wounds (complete with reservoir bags with pump assembly):
  - Compound fractures of humerus and tibia
- Non-bleeding wounds:
  - Assorted stick-on lacerations and open fractures

Comes complete with makeup accessories (including acrylic to simulate glass embedded wounds, blood powder for 13.5 litres, latex compound, and plastalene modeling paste) for advanced injury simulation and reservoir bags with pump assembly.
41 x 33 x 56 cm; 12.3 kg
M-1005710

**Simulated Burns, Set of 4 Degrees**
Used to identify burn severity and type to prepare a treatment plan and to measure performance of burn management. The burns are pliable and can easily be cut into any shape to fit any area on a human patient or patient simulator/trainer. Pieces are reusable and come ready to wear. Theatrical makeup and simulated blood may be applied to add colour for realism.
Includes four 18 x 25 cm rolls with the degrees listed below.
M-1018421

**Items also sold separately:**
- A. 1st degree
  M-1018422
- B. 2nd degree superficial
  M-1018424
- C. 2nd degree deep
  M-1018423
- D. 3rd degree
  M-1018425

**DVD: Moulage Instructions for Casualty Simulation Kits**
The moulage instructional DVD has been produced in conjunction with a leading artist using Hollywood-training techniques and years of military experience. Explains the use and application of the Casualty Simulation Kits.
M-1018145
3B Scientific® Patient Care Manikin PRO
Build and evaluate advanced patient care and nurse aid competencies with scenario based training!
The patient care manikin simulates an adult, life-size patient, with interchangeable genitals. It can be positioned like a real patient with natural movement of the arms, legs, and joints. It is made of durable, unbreakable, and water-resistant plastics for longevity in the everyday training use.
The PRO version includes removable organs for additional patient care training features like catheterisation, enema administration, ostomy care, irrigations and naso-gastric lavage and gavage.

Delivered with:
Organs (lungs, heart, stomach, bladder and intestinal section), injection pads (upper arm, thigh, and buttocks), intestine tube, catheter, duodenal probe, talcum powder, Vaseline, lubricant, amputation stump, inserts with wound depictions (upper arm and thigh), and tools for fitting.

Meets the OBRA requirements of Nurse Aide Training and Competency Evaluation Programs (NATCEP).
173 cm tall, delivered with assembly tools.

M-1018816

3B Scientific® Patient Care Manikin BASIC
The 3B Scientific® Patient Care Manikin is also available in a basic version, offering a variety of training possibilities for basic patient care and nurse aid competencies. It comes without organs but can be upgraded to include all training features of the PRO version using the Upgrade Kit available below.
174 cm; 14.4 kg

M-1018817

Upgrade Kit
You can easily upgrade the Basic Patient Care Manikin to the PRO version using this kit. It includes the inner organs and allows for training of catheterisation.

M-1000504
**PRACTISE BASIC AND ADVANCED NURSING, CLINICAL, AND EMERGENCY SKILLS!**

KERi™ and GERi™ Nursing Skill Manikins

These manikins feature a life-like range of motion and can be positioned just like a real patient. KERi™ is the age neutral version, while GERi™ simulates an elderly patient with skin wrinkles and folds.

Both manikins share the following features:
- Lightweight (13 kg) full-size adult at 146 cm tall
- Female appearance, easily converts to male with removal of wig and attachment of male genitals
- Allow practice of over 35 patient care procedures

Visual inspection features:
- Decubitus Sacral Ulcer – Stage 1
- Dilated and Constricted Pupil Comparison
- Cancerous Mole Comparison
- Reddened Skin Folds

Please see the feature differentiation on the next page.

I.M. injections | Cancerous mole comparison | Reddened skin folds
Clinical Chloe™ Advanced Patient Care Simulator

In addition to the basic version, the advanced version features:
• CPR monitored by included OMNI® Controller
• Injections (advanced training arm and hand for IV, IM, and subcutaneous techniques)

Carrying bag and instruction manual included. Detachable and removable internal tanks, latch provides secure seal between ostomies and internal tanks.

M-1017574

Clinical Chloe™ Patient Care Simulator with Sculpted Stomas

The basic version for nursing care training allows you to practise:
• General Patient Care
• Injections (IM injection sites in arm, thighs, and buttock)
• Breast Palpation
• Airway
• GYN Training (vaginal douching and pap smear exercises)

M-1017542

Code Blue® Multipurpose Patient Care and BLS Manikin Simulator with Non-intubatable Disposable Airway.

This adult manikin features training of:
• Oral and denture hygiene
• IM (arm and buttock), IV and subcutaneous injection
• Ostomy care
• Naso-gastric lavage and gavage
• Male and female catheterisation
• Enema administration
• Vaginal douching and pap smear exercises
• Palpable prostate and breast
• Amputation stump
• 2 decubitus ulcers
• Eyes open and close (one pupil is dilated)
• Regular or counter pulsation CPR
• Mouth to mouth resuscitation
• Palpable carotid pulse

CPR Monitor: Displays cadence and depth of compression and ventilation

Omni™ Code Blue® Pack included. Also supplied with ten disposable one-piece airways, neck brace, and carrying bag.

M-1005782

New Aged Simulation Suit

In order to better understand your patients, walk a mile in their shoes. There is no better way to create empathy than to actually experience the physical challenges aging patients face on a daily basis.

Easy to put on and adjust!
The body suit is worn like an overall, the different restrictions can easily be adjusted to change the range of motion, and even simulate hemiparesis.

Size S M-1020111
Size M M-1020112

Impacts vision, hearing, grip strength, and physical abilities.
Susie Simon® Patient Care Manikin with Ostomy
Full-size dual sex adult manikin with movable joints as well as soft fingers and toes for training of important basic nursing skills such as:
• Removable upper and lower dentures for oral hygiene
• Realistic eyes for ophthalmic exercises
• Ear canal or otic drops and irrigation
• Mouth, nose, and tracheotomy openings for nasogastric lavage and gavage
• Interchangeable genitalia
• Intramuscular injection site in right and left upper arm and buttock
• Enema administration capability
• Realistic urethral passage and bladder for catheterisation exercises
• Vaginal douching and pap smear exercises
• Stomas of a transverse colostomy, ileostomy, and suprapubic stoma
• Bathing and bandaging activity
162.6 x 45.7 cm; 16.5 kg
M-1005785

Simple Simon® and Simple Susie®
The full-size adult manikins with movable joints and soft fingers and toes are ideal for training of important basic nursing skills such as:
• Hair care and surgical draping
• Bathing and bandaging
• Oral and dental hygiene (movable jaw with removable dentures)
• Ophthalmic care
• Ear irrigation and application of otic drops
• IM injection (arm and buttock)
The legs can be removed for compact storage. Supplied with neck brace.
Simple Susie® M-1005803
Simple Simon® (not shown) M-1005807

Enema Administration Simulator
Each student can realistically practise administering an enema using this life-like model. The upper buttock is flexible so that the trainee must raise the buttock in order to locate and make insertion into the anus. The simulator features a one quart fluid reservoir that is adequate for most demonstration and practice purposes. For large groups, a drain tube is provided so that the fluid can be drained directly into a large container or sink for continuous use. Includes a hard carrying case, enema administration set, and teaching guide.

### Decubitus Simulator

With this very realistic and affordable decubitus trainer, nursing and medical students will learn about professional assessment (examination, measurement of wound length, undermining, and tunneling, as well as the proper classification), wound care, cleansing and bandaging techniques with multiple dressing methods of these 4 stages of decubitus:

- Decubitus grade 1 (greater trochanter)
- Decubitus grade 2 (buttocks)
- Decubitus grade 3 (buttocks)
- Decubitus grade 4 (greater trochanter)

The realistic texture and flexibility of the skin offer a realistic haptic and optic, and therefore promote effective training. Each wound has been coloured exactly as seen on a real patient.

Delivered with carrying case.

M-1019698

### Diabetes Foot Treatment Trainer

The after-effects of a diabetes mellitus can result in defects and pressure points in the area of the foot. In this skill trainer, a gangrenous alteration on the big toe of the right foot has already spread from the back of the foot to the metatarsal. A mal perforans (trophic ulcer) is visible on the sole of the foot (plantar). A grade 3 pressure-ulcer is depicted in the heel area. A complete skin layer is lost and the subcutaneous tissue is damaged up to necrosis. This is recognisable by black colouration in the wound area.

M-1018815

### Decubitus Treatment Simulator

The varying stages of pressure sores on this unique model can be washed, treated with antiseptics or most medicines, and dressed just like real flesh. Made from BIOLIKE™ synthetic tissue. Comes with carrying case and draping sheet.

24 x 37 x 9 cm

M-1005569

### Ostomy Care Simulator

Reproduction of an abdomen showing the anatomy of both a colostomy and ileostomy to provide life-like functions and appearance. Dilation of the stomas can be demonstrated and practised, along with application of postoperative and permanent ostomy bags. The colostomy can be irrigated. Drainage and excretion at the ileostomy (water) and colostomy (simulated stool) can be pumped by syringes. Delivered with simulated stool and carrying case.

45.5 x 45.5 x 30.5 cm; 11 kg

M-1005591

### Ostomy Care Model

This BIOLIKE™ life-size model contains four stomas that can be lubricated and dilated with an inserted finger. The model may be washed, taped, bandaged, and fitted with ostomy bags. Comes with lubricant, draping sheet, and carrying case.

33 x 46 cm

M-1005570
Multipurpose Patient/Emergency Paediatric Simulator
This manikin of a 5-year old is ideal for training paediatric patient and nursing care as well as CPR. Its realistic face skin and moulded hair, the articulating joints, and realistic hands and feet make for an impressive training experience.

Training Features:
• Ophthalmic procedures
• Realistic chest cavity, with realistic internal organs for unparalleled CPR performance
• Bathing and bandaging activity
• Place nasal and oral gastric tubes
• Lavage/gavage
• G-tube placement
• Stomas for ileostomy, colostomy, and suprapubic exercises
• Male and female catheterisation
• Enema administration
• Placement of rectal suppositories
• IM injection sites in deltoid and upper thigh

Emergency Care Features:
• Oral, nasal, and digital intubation
• Place OP/NP tubes
• Right/left mainstem bronchi
• Suctioning
• BVM
• Chest compression/rise
• Intraosseous infusion
• IV arm with variable, palpable pulses

Supplied with T-shirt and shorts, soft carrying bag, and instruction manual.
M-1017564

Mike & Michelle® Infant Patient Care Manikin
Features the same training possibilities as the Mike & Michelle® Child Patient Care Manikin, but simulating a 1-year old infant.
Supplied with T-shirt, shorts, neck brace and carrying bag.
89 x 38 x 22.5 cm
M-1005804

Optional Part:
IV Injection Arm M-1005795
Intraosseous Leg M-1018459

Mike & Michelle® Child Patient Care Manikin
This manikin simulates a five-year old child with rotatable arms and legs (jointed elbows and knees) and articulating head. Supplied with T-Shirt, shorts, neck brace and carrying bag. It allows training of basic and advanced paediatric patient care procedures such as:
• Bathing and bandaging
• Ophthalmic exercises
• Oral and dental hygiene (articulating jaw with teeth and tongue)
• Tube feeding and gastric suction
• IM injection (upper thigh and deltoid)
• Tracheotomy care
• Male and female catheterisation
• Enema administration

M-1005808
Paediatric Nurse Training Baby, Newborn
Practise paediatric nursing care on a realistic newborn manikin. This advanced and incredibly realistic manikin with male and female features includes internal organs (heart, lung, intestine system, stomach, and bladder), interchangeable genital organs and fully movable head, arms and legs. It allows the trainees to easily practise basic care like washing, dressing and umbilical care, as well as the following paediatric nursing care options:

- Suctioning of Nasopharynx
- Tube Insertion
- Insertion and Care of a Tracheal Cannula
- Intramuscular and Subcutaneous Injections
- Obtaining Urine Specimens with a Urine Collection Bag
- Bladder Catheterisation, male and female
- Taking a Rectal Temperature
- Enema insertion

52 cm; 2.3 kg
M-1000505

Consumables:
Injection Pads for Thigh and Buttocks
M-4000162

Life/form® Micro-Preemie Simulator
This 25-week ELBW (Extremely Low Birth Weight) neonate is the smallest and most realistic pre-term infant available. Delivery of an ELBW infant remains to be an extreme medical emergency, requiring specialized techniques that can be trained with this outstandingly realistic simulator. The baby can be ventilated and will accept a functional ET tube, NG tube, umbilical catheter, and IV line, as well as a non-functional chest tube and stomas.

Delivered with: diaper, hat (colour may vary), umbilicus, omphalocele, neural tube defect, bilateral chest block, unilateral chest block, airway, 3 cc syringe, 25-gauge butterfly needle, lubricant, blood powder, and bulb and tube assembly.

M-1020812
**Life/form® Special Needs Infant**
This newborn-size infant allows health care facilities and medical staff to teach procedures for special needs infants. The simulator was developed for a wide range of training, including for beginning nursing students. Procedures that can be practised include:

- Tracheostomy care (lavage and suctioning)
- Gastrostomy cares (lavage and gavage)
- Nasogastric care (placement, lavage, gavage, and suctioning)
- Urethra catheterisation (insertion, placement, and care)
- Colostomy stoma (basic care purposes only)

**Female** M-1018099  
**Male** M-1018198

---

**Susie® and Simon® Advanced Newborn Patient Care Baby**
This manikin simulates a 0-8 week old newborn with rotatable soft arms and legs. It allows training of basic and advanced paediatric patient care procedures such as:

- Bathing and bandaging
- Tube feeding and gastric suction (movable tongue)
- Heel stick and finger prick practice
- Male and female catheterisation
- Enema administration
Supplied with T-Shirt, diaper and carrying bag.  
M-1005802

**Optional Part:**  
**Intraosseous Leg**
The Intraosseous leg simulates that of a newborn. A replaceable tibial bone lies under a smooth outer skin. It includes anatomic landmarks for teaching intraosseous access and infusion. A femoral vein/artery pair is included.  
M-1018460

---

**Life/form® Infant Ostomy Trainer**
Created to educate caregivers and parents on how to give special care to an infant with a stoma. The anatomy of the colostomies were carefully reproduced to provide life-like appearance and functions. A soft, pliable material is used for the stomas in order to achieve the most realistic tactile sensation. The syringes included are used to inject simulated stool through ports to the colostomy sites. Consistency of the simulated stool can be thinned by adding water.  
M-1013059

---

**Male Baby-Care-Model**
Very useful for pre-birth courses! This true-to-life model of a newborn male baby is suitable for a variety of different training procedures:

- Changing the baby’s nappy
- Feeding and administration of medicine
- Obtaining urine specimens
- Dressing and undressing
- Picking up, carrying, and positioning of a baby (head tilts backwards if the baby is incorrectly held)
- Washing, cleaning of mouth, eyes, ear and nose
- Taking a rectal temperature
- Examination of fontanelles and testicles
52 cm; 2.3 kg  
M-1000506
EPIDURAL & SPINAL INJECTION

Epidural and Spinal Injection Trainer
Train the localisation of the epidural space without ultrasound to administer epidural and spinal injections. You can easily adjust the trainer to simulate different pathologies. The training with realistic haptic feedback and correct anatomical landmarks is the basis for a successful preparation for real-life cases. Delivered fully assembled. All usual materials can be used, including disinfectant, plasters and wound dressing. Includes 1 LOR kit and 1 skin pad.
45 x 35 x 24 cm; 3 kg
M-1017891

Training features:
• Realistic anatomical landmarks for assessing the correct insertion point
• Loss of resistance (LOR) syringe technique through realistic haptic feedback
• Hanging drop method: the negative pressure in the fluid filled spinal canal can easily be adjusted
• An epidural catheter can be inserted into the epidural space
• Spinal anaesthesia training with realistic resistance of the dura and arachnoid mater with or without a cannula

About the trainer:
• Developed in Germany in close co-operation with epidural anaesthesia specialists
• Simulates the anatomy of a standard patient (young adult between 20-30 years old)
• Intuitive to handle, continuously adjustable fluid pressure
• Easy to clean: filled with water (closed system) to simulate spinal fluid
• Sturdy construction, all parts are integrated and latched
• Can also be used in lateral position, suction cups ensure steady positioning on the table
Low operating costs:  
With the use of high-quality, hard-wearing materials, only a few parts need to be replaced periodically.

NEW!  
Geriatric Option for M-1017891: Simulates the spine of an elderly patient with typical deformations.

Geriatric LOR Kit set of 2 LOR inserts with 2 spinal tubes  
M-1020629

Single Geriatric Insert 1 LOR insert with 1 spinal tube (not shown)  
M-1020800
I.V. INJECTION

I.V. Injection Arm
This injection arm, made of 3B Scientific® SKINlike™ silicone allows realistic, hands-on training to develop competence in medical staff. The material used is of the highest quality, stain resistant and easy-to-clean. Changing the skin and tubing system is easy and only takes a few minutes.

The simulator is ideal for practising:
- Intravenous injections
- Correct puncture of peripheral veins for blood sampling (basilic vein, cephalic vein, median cubital vein, dorsal venous rete of hand)
- Positioning of a butterfly catheter
Delivered with stand, artificial blood, 2 replacement tubing systems, plastic bottle, syringe and deluxe storage carton.
74 x 19 x 14 cm; 2.8 kg
M-1000509

SMASH Advanced Patient Training Arm, Latex-free
The training arm features an extremely durable design and is made of high quality material. The skin can be pierced in excess of 200 times with a 20 or 22 gauge needle. A micropump has been embedded within the shoulder to generate variable heart rates and pulse strengths for a realistic training experience.

The following training possibilities are featured:
- Subcutaneous injection on volar forearm and lateral upper arm
- Intramuscular injection on upper arm
- Suture and incision on both upper arm and forearm
- Haemodialysis on the forearm
- IV and blood draw exercises, AV anastomosis, and placement of AV grafts
- Incision and suturing exercise on multilayered inserts (skin, subcutaneous tissue, muscle, radial artery, and radial vein)
- Surgical and arterial & venous stick exercises
- Collapsed or bulging vessels simulated by varying vessel palpability

Sclero Pad
The sclerotherapy pad is used to simulate the treatment of varicose veins and spider veins. It allows the user to practice their precision and needle position. Once hot water is injected into the vessel, it will lose its color and disappear and the injected water empties. The color will come back after approximately 30 seconds, allowing for multiple uses. Contains 6 vessels of different diameters (0.2 mm, 0.5 mm, 2 mm, 3 mm).
M-1019644

Tissue Trainer Arm
The skin of the training arm is very realistic and allows for a realistic training experience. A micropump generates the heart rate and pulse strength. The skin can be pierced with a 22 gauge needle in excess of 200 times.

Life/form® Adult Sternal Intraosseous Infusion Simulator
Designed to demonstrate, simulate, and prepare all levels of health care professionals for use of the sternal intraosseous approach. Incredible realism and accurate landmarks will allow students to simulate this new procedure with skill, confidence, and accuracy. This procedure is a time saving and simple alternative to conventional IV infusion. The simulator uses a replaceable bone that is designed to be rotated and punctured several times, extending the life of the simulator. The sternum may be filled with simulated blood to better visualise true flashback. Comes with 10 replaceable simulated bones, syringe with tubing, blood mixture and a hard carrying case.
49.5 x 45.7 x 26.7 cm

Geriatric IV Arm
Developed from a live cast, this arm is unique to the industry. Its properties include veins that roll away or disappear as you attempt to catheterise the vessel and the specially developed skin is exceptionally thin. If your students work with the aged, this adjunct to your teaching lab will enable them to better serve this group as they pursue their careers.
91 x 36 x 23 cm; 10 kg
M-1005777

Intravenous Training Arm
This training arm features a prominent venous network with simulated cephalic, basilic, antecubital, radial, and ulnar veins.
The following can be trained:
• Simulation of infusion technique
• Blood collection exercises with simulated blood
• Administration of medication by intravenous bolus
• Simulation of clenched fist or tourniquet position
• Simulation of collapsed veins
A realistic pop appears as the needle enters the vein. Manufactured with resealing veins and outer skin for repeated usage.
Delivery content includes soft carrying bag and set-up kit (simulated blood concentrate, pressure bulb, blood dispensing bag, spare arm skin, funnel, and talcum powder).
M-1018755

Injection Arm
This right arm combines all features required for I.V., I.M. and subcutaneous injection and infusion training as well as blood collection exercises:
• I.V. injection in subtle venous network of the arm and hand: cephalic, basilic, antecubital, radial, and ulnar veins. A pressure bulb increase or decrease enables venous pressure
• I.M. injection in deltoid area
• Subcutaneous injection on the volar side of the forearm and the lateral side of the arm
Supplied with artificial blood, blood dispensing bag, funnel, talcum powder, replacement skin and veins, base and carrying bag.

M-1013386

Life/form® Venatech IV Trainer
This IV trainer is easily attached to a person’s arm so the student can practise venipuncture techniques without the risks associated with puncturing living tissue. Includes the three main veins used in phlebotomy in correct anatomical position. The trainer also helps students learn basic communication skills such as explaining the procedure to the patient and asking them to close and release their fist.
M-1017966
Life/form® Portable IV Hand and Arm Trainer

The economical Life/form® Portable IV Trainer combines realism and lightweight convenience in a single device. Constructed of soft material with life-like veins that are visible and palpable. Venipuncture can be practised at any of the common sites (antecubital fossa, along the forearm, the back of the hand, and thumb) with the following features:

• Realistically rolls as you palpate the veins
• Characteristic pop can be felt as the needle penetrates the vein
• Realistic flashback can be observed

Ideal for teaching venipuncture techniques including starting IVs and introducing over the Needle IV catheters. Under normal use, hundreds of injections may be performed. The storage box can be converted into a workstation.

Includes: 2 IV bags, packet of blood powder, fluid supply stand, 2 pinch clamps, 3 cc syringe, 12 cc syringe, 12 gauge needle, a winged infusion set, and a plastic clamshell case for storage.

**I.V. Training Hand**

An economic and easy to transport model to train I.V. injection. Made of durable material for repeated use.

**Features:**

- Palpable life-like veins that roll-over
- Suitable for blood sampling or fluid injection
- Supplied with carrying tray and artificial blood 35 x 13 x 5 cm; 0.8 kg

M-1005754

**I.V. Injection Hand**

An incredibly realistic hand with extreme attention to detail, right down to the fingerprints. Students have the opportunity to not only practise injection but to develop important manipulation skills provided by the flexion of the wrist. Under normal use hundreds of injections can be performed before skin or veins need replacement.

- Includes injectable metacarpal, digital and thumb veins on dorsal surface
- Soft, flexible fingers are separately molded
- Flexible wrist
- Skin rolls when veins are palpated
- Perform hundreds of injections before replacing vein and skins
- Supplied in storage box

I.M. INJECTION

The perfect volunteers to practise I.M. injections

I.M. Injection Simulators
These high quality simulators are the ideal way to teach proper I.M. injection techniques. Strap it onto the upper leg, upper right arm or the buttocks to locate all necessary intra-muscular injection sites. Operates on AA batteries.

- Both audio and visual feedback
- Use for training and performance evaluation
- Includes all important anatomical palpable landmarks
- Life-like silicone skin is extremely durable, can quickly be exchanged
- Robust and easy to clean

A. Upper Arm  M-1009840
B. Upper Leg   M-1000511
C. Buttock     M-1000514

Intramuscular injection can be practised realistically without a real patient – with both audio and visual feedback!

A. Upper Arm  M-1009840
B. Upper Leg   M-1000511
C. Buttock     M-1000514
I.M. Injection Pad
A simple trainer that simulates muscle tissue for hands-on training.
• Injection made to a depth of 50 mm
• Life-like skin allows multiple punctures
• Will absorb fluid
M-1005190

I.M. Injection Simulator
Basic economical version for practising I.M. injections, perfect for clinical injection training in large class settings.
M-1010008

Buttockmate – I.M. Injection Simulator
This easy to handle simulator can be attached to a person or training manikin. It allows the practice of intra-muscular injections with fluid (water).

Audio-visual feedback:
If the injected part is incorrect, a buzzer, which works with a 9 volt battery and a red light, will give a warning sound. The durable, soft and very realistic skin shows no needle marks even after many exercises.
14 x 34.5 x 49.5 cm; 1.9 kg
M-1005395

Two-in-One I.M. Injection Model of Buttock
This unique model of a human buttock has a special two-in-one function with audio-visual feedback:
1. Study the anatomy on the right hand side (bones, ilium crista, greater trochanter, m. gluteus medius, nerves and veins) through the transparent outer structure.
2. Transfer this knowledge about the position of nerves, veins etc. to the left hand side to find the correct insertion point and practise I.M. injections with fluid (water).
Correct injections are confirmed by a green light, incorrect by a red light and a buzzer.
38 x 35 x 22 cm; 5 kg
M-1005394
I.M. Injection Simulator

The simulator offers both visual and tactile learning for three types of intramuscular injections:
- Identification of proper injection sites and visualisation of underlying structures
- Practise of dorsogluteal, ventrogluteal, and vastus lateralis injections

Comes complete with teaching guide, supply of syringes, and hard carrying case.
56 x 24 x 40.5 cm; 8.5 kg

Life/form® Intradermal Injection Simulator

Practise intradermal injections safely and conveniently!
- Life/form® vinyl skin ensures a realistic training experience
- Features eight sites for practising intracutaneous injections
- Natural cast from wrist to just below elbow
- Skin has realistic feel and appearance

Includes arm section with eight injection sites, sealant, syringe, teaching guide, and storage box.
33 x 28 x 13 cm; 0.9 kg

Two- and Four-Vein Venipuncture Training Aids™
Your patients don’t have one size of veins and these models were specifically designed to make accessing more challenging, as this is how technique and confidence are improved. Now made with latex-free Dermalike™ with 50% less needle drag when accessing the underlying veins and improved tear resistance to permit a greater number of needle sticks.

Two-Vein Option
Two barely discernable blue veins of different inside diameters, positioned at the same depth in a semi-transparent, soft tissue-like material.
- Light Skin  M-1017969
- Dark Skin  M-1017970

Four-Vein Option
Four barely discernable blue veins in three different sizes – with a fourth vein more deeply placed.
- Light Skin  M-1017971
- Dark Skin  M-1017972

Advanced Venipuncture and Injection Arm
This revolutionary training arm provides complete venous access for IV therapy and phlebotomy, plus sites for intramuscular and intradermal injections. An extensive 8-line vascular system allows students to practise venipuncture at all primary and secondary locations, including starting IVs and introducing Over the Needle IV Catheters.
- Realistic skin texture with wrinkles, pores, and visible fingerprints
- Soft and pliable for easy sewing, sutures will not pull out when tightened
- Supplied with three wounds that can be sutured repeatedly

Conservatively, hundreds of injections may be performed and over one hundred cuts can be made on the trainer before replacement is needed. Delivered with artificial blood, 3cc syringe, 12 cc syringe, needle, two fluid bags, instruction manual and carrying case.
- Light Skin  M-1005678
- Dark Skin  M-1005679

Arterial Puncture Arm
This easy to use training aid is ideal for training and demonstration of proper arterial blood drawing techniques and for monitoring blood gases.
- Puncture locations can be identified
- Life-like backflow of blood

Delivered with 2 syringes and tubules, artificial arterial blood, 2 replacement arterial sections and carrying case.
- 71 x 13 x 33 cm
- M-1005598

Advanced Four-Vein Venipuncture Training Aid™
In addition to the pop that is felt with the regular models as the needle enters the vein, the advanced version offers a realistic flashback of simulated blood, confirming the proper needle placement. The model permits the injection of fluids and withdrawal of simulated blood. Featuring four barely discernable blue veins in 3 different sizes – with the fourth vein deeply placed in a semi-transparent, tissue-like material.
- Light Skin  M-1017967
- Dark Skin  M-1017968
Deluxe Blood Pressure Arm with Speaker
This life-like simulator allows the presetting of values for both systolic and diastolic pressures. The instructor can unfailingly know whether the student has performed the procedure accurately. All electronically generated sounds are digitally recorded.
- The five Korotkoff phases can audibly be discerned
- Can easily be calibrated for use with any sphygmomanometer
Delivery content includes the Life/form® Arm Replica with embedded speaker, sphygmomanometer, electronic control unit, instruction booklet, and hard carrying case. Does not include a stethoscope.

Blood Pressure Training System with Omni®
The Blood Pressure Training System includes a full-size adult left arm that may also be attached to the Code Blue® I Multipurpose Patient Care and BLS Manikin (M-1005782) and Susie Simon® Patient Care Simulator with Ostomy (M-1005785). It is a versatile training tool developed to assist health professionals teach the processes and skills required to perform blood pressure auscultation procedures and techniques.
- Systolic and diastolic pressures, auscultation gap and pulse rate are adjustable
- Cuff pressure can be seen on a display
International power supply 100 to 240 VAC. Comes with one Omni® controller, soft carrying bag and instruction manual.
M-1018870
CENTRAL VENOUS CATHETERISATION

Chester Chest™ with New Advanced Arm
The new, more advanced arm can also be ordered separately to upgrade your Chester Chest™. This simulator makes it possible to learn how to use the following long term vascular accesses perfectly:
• Implanted Port
• Central Venous Catheter (CVC)
• Peripherally Inserted Central Catheter (PICC)

Peter PICC Lines Simulator
It has become critical in controlling costs to ensure that the competency of all IV staff is assessed, maintained, demonstrated, and improved continually. Vascular access simulators are acknowledged as the most efficient way to teach staff and assess competency. Validate and train the knowledge and skills needed for Peripherally Inserted Central Catheter (PICC) lines with this simulator:
• Model presented in supine position with arm at 90-degree angle to body
• Movable chin simulates occlusion of jugular
• Anatomically correct cephalic, basilic, and median basilic veins, jugular,subclavian, and superior vena cava
• Palpable ribs allow measurement of proper catheter length externally
• Replaceable arm skin allows visualisation of veins
• Standard IV catheter placement
• Distal tip of catheter viewable in the superior vena cava
• Infusible veins allow realistic blood return in flash-back chamber

Deluxe Venous Access Device Model
Reproduction of a male chest mounted on a collapsible easel designed for training in vascular access device maintenance and dressing central venous catheters. Made of skinned, lightweight urethane foam, this model may be washed with soap and water or with antiseptics.
- Bilateral subclavian venous catheter connections
- Implanted PORT-A-CATH
- Both catheters may be flushed with water
- Accepts betadine and most other antiseptics
- Replaceable chest module
53 x 38 cm; 4.5 kg
M-1005563

Heart Catheterisation Simulator
This simulator is ideal for practising central venous catheterisation. All appropriate landmarks are palpable for realistic identification of insertion sites. Remove skin to reveal location of veins, arteries, and other landmarks. Artificial blood flows from needle to provide confirmation of proper needle location. Venous catheters can be snaked into place once the introducer is properly inserted.
Includes fluid supply bags, replaceable skin, tubing sealant, needles, one quart of blood, and teaching guide in a hard carry case. Fluid supply stand not included.
71 x 43 x 25 cm

THE ULTRASOUND TRAINING SET FOR MEDICAL SIMULATION

The material of the SONOtrain™ trainer simulates the feel of real soft tissue for carrying out palpations and injections and shows realistic texture and echogenicity on ultrasound images. The SONOtrain™ trainer is an excellent teaching tool for basic training and for improving dexterity and hand-eye coordination skills.

- Each individual unit is completely self-contained and can be used out of the box
- Units are stackable to save space
- Replacement blocks and all accessories are available separately
- The 3B Scientific® SONOtrain™ series has been designed and developed in Germany

SONOtrain™ Ultrasound Trainer
+ Easy to use
+ Cost effective
+ Realistic echogenicity
+ Self-sealing for repeated use
A. SONOtrain™ Vein Model
Ultrasound block with three blood vessels with diameters of 4, 8 and 15 mm with adjustable fluid flow. Punctures and injections possible, and self-sealing injection channels.
M-1019637
Vein Replacement Block M-1019652

B. SONOtrain™ Foreign Body Model
Ultrasound block with 6 different foreign bodies for insertion: Pellets, shard of glass, nail, projectile, loose chippings and splinters of wood can be clearly detected and recognized.
M-1019636
Foreign Body Replacement Block M-1019651

C. SONOtrain™ Gallbladder Model
This Ultrasound block with three gallbladders, each with different pathologies: Gallstones (diameter: 8 and 10 mm), thickened gallbladder wall and biliary sludge deposit. The gallstones and the biliary sludge deposit move as the positioning of the block is changed like it would in a real patient.
M-1019638
Gallbladder Replacement Block M-1019653

D. SONOtrain™ Breast Model with Cysts
Realistic reproduction of a breast made from ultrasound material with two cysts for realistic punctures and aspirations.
M-1019634
Breast with Cysts Replacement Block M-1019649

E. SONOtrain™ Breast Model with Tumours
Realistic reproduction of a breast made from ultrasound material with three tumours for realistic punctures and biopsies.
M-1019635
Breast Tumours Replacement Block M-1019650
NEW and affordable skill trainer for realistic male and female urinary catheterisation!

Catheterisation Simulator
+ Magnetic easy-to-change genital inserts
+ Easy to clean and maintain
+ Transparent bladder so you can observe the procedure

For realistic training of male and female catheterisation:
- Life-like resistance
- 3 levels of adjustable narrowing of urethra
- Soft and movable foreskin and labia
- Liquid outflow if catheterisation is successfully carried out

Immediate learning effects:
- Check the positioning of the catheter through the transparent bladder

- Fluid will flow if the catheterisation has been carried out correctly
- In the PRO version, the abdominal wall can be removed so that the process can be viewed directly
With the catheterisation trainer, both male and female catheterisation can be demonstrated, practised and assessed. The interchangeable genitalia are anatomically correct and made from realistic material. The foreskin and labia are soft and pliable, so that all necessary steps (like disinfecting the area) can be practised.

Adjust the levels of difficulty:
On the male insert, three different levels of narrowing of urethra can be set. In the narrowest setting, catheterisation is not possible, leading to the conclusion that a suprapubic catheter is needed. A suprapubic catheter is already in place on which correct care and cleaning can be practised.

Additional benefits:
- Non-slip feet
- Easy to clean, all parts can be taken apart easily
- Magnetic connectors for quick and easy set-up and dismantling
Available in these versions:

**BASIC Catheterisation Set**
- Stand with magnetic connections for genital inserts
- Male and female catheterisation set with transparent bladder
- Bottle and tube connectors

- **BASIC Catheterisation Set** M-1020842
- **BASIC Catheterisation, male** M-1020232
- **BASIC Catheterisation, female** M-1020231

**PRO Catheterisation Set**
- Realistic lower abdominal model
- Male and female catheterisation set with transparent bladder
- Bottle and tube connectors
- Carrying case

- **PRO Catheterisation Set** M-1020843
- **PRO Catheterisation, male** M-1020230
- **PRO Catheterisation, female** M-1020229

Male & Female Catheterisation Trainers
Practise male and female urinary catheterisation on these newly designed anatomically correct models. Training is enhanced by a new material that has a realistic feel and flexibility. Both models utilise a 16 FR catheter and can be used to demonstrate balloon inflation procedures. A fluid reservoir allows for urine output upon successful completion of the insertion procedure. Instructors are able to teach sterile technique and insertion and removal of catheter, as well as practise preparing the patient for the procedure.

Set M-1017251
Male M-1017252
Female M-1017253
A. Life/form® Female Cath-Ed II Simulator
Provides practice in female catheterisation. Including most of the same features as the Male Cath Ed I Simulator except the vulva has been moulded intact to facilitate identifying the urethra and proper spreading of the labia.
Comes with a hard carrying case, lubricant, catheters, 50 cc bulb, syringe, and instruction manual.
38 x 36 x 20 cm
M-1017982

B. Life/form® Male Cath-Ed I Simulator
This unique Life/form® simulator combines visual and tactile learning sensations of catheterisation in one compact unit. The mid-sagittal dissections allow detailed study of the internal anatomy and provide students an opportunity to follow what happens when they catheterise a patient. The removable plastic cover identifies key anatomical structures.
• Normal restrictions at the bulbous urethra and bladder sphincter can be detected and identified
• A Foley catheter can be demonstrated and seen through the viewing port
Includes a hard carrying case, lubricant, one catheter, 50 cc bulb, syringe, and instruction manual. Does not have a functional bladder.
38 x 36 x 46 cm
M-1017983

Patient Care Catheterisation Simulators
Considered fundamental in all nursing studies, the delicacy and intricacy of catheterisation mandates training on a simulator to ensure patient comfort and student confidence.

Features:
• Normal size prostate gland for palpation during rectal examination
• Internal and external bladder reservoir for standard catheterisation exercises
• Functional suprapubic stoma to practise skin prep, stoma hygiene, and application of disposable and permanent ostomy bags
• Modular urethral valve prevents fluid leakage
Male  M-1017545
Female  M-1017544

Catheterisation Simulators
Use these simulators to train the procedure of catheterisation. Their realistic feel and resistance, and the high quality of the material make for a perfect teaching tool. For a better learning effect, artificial urine (water) will flow when the catheter enters the bladder.
Note: Improper use of a Foley can result in damage to the simulator, just as when using a Foley catheter with a real patient.
Male  M-1005587
Female  M-1005588

Consumables
Item No.
Foley Catheter Silicone (pack of 10)  M-1019720
Lubricant Kit (pack of 6)  M-1017903
Prostate Examination Simulator
This prostate examination simulator consists of a male abdomen body and 4 different interchangeable prostate glands which can be inserted to allow realistic practise in diagnosis of prostate cancer by rectal examination.

Stage A Gland: Benign, slightly enlarged, but otherwise normal prostate gland.

Stage B Gland: A discrete, hard nodule is palpable in the upper right quadrant, simulating a beginning stage of carcinoma.

Stage C Gland: The spread of carcinoma is demonstrated in this gland. The small nodule has increased in size and has become an external hard mass on the surface of the gland.

Stage D Gland: This gland is totally replaced with carcinoma. The entire gland will feel hard and irregular.

Comes complete with four glands, hard carrying case, lubricant, cleaner, and teaching guide.
54.5 x 38 x 30.5 cm, 11 kg
M-1005594

Advanced Patient Care Male Prostate Simulator
The simulator features four interchangeable modules, each individually mounted on clear plastic cards for easy placement and removal:
1. A moderately enlarged benign prostate
2. A prostate with two discreet nodules
3. A prostate with an easily palpable large mass
4. A prostate with malignant invasive cancer
Realistic anal opening permits insertion of a lubricated, gloved finger.
Includes instruction manual and soft carrying bag.
M-1020127

No Scalpel Vasectomy (NSV) Model
A compact simulator developed to assist in learning a new method of vas occlusion. To provide realism, the leg stumps are designed to get in the way of the student as the procedure is mastered. Includes two removable scrotal skins and two testicles, two long vas assemblies that can be advanced as needed for NSV exercises, and instructions for use.
30.5 x 30.5 x 32 cm, 2.25 kg

NEW and affordable DRE simulator for clinical skill training!

Prostate Examination Trainer, 4 Stages in 1 Trainer
Demonstrate and practice digital rectal examinations (DRE) with this affordable skill trainer. The trainer includes 4 different prostates to train professional palpation methods (side position or bent forward) and diagnostic skills associated with rectal examinations:
- Normal prostate
- Advanced prostate carcinoma
- Prostate carcinoma at an early stage
- Benign prostatic hyperplasia (BPH)

The shape, position and consistency of the prostate can be assessed, allowing irregularities, induration and nodes on the otherwise smooth surface of the prostate to be felt. For reference and self-control, the trainer also includes the corresponding transrectal sonographic imaging (transrectal ultrasound, TRUS) for each stage. While in use, the prostate and the sonographic images are hidden and cannot be seen by the trainee. The compact shape of the DRE Trainer makes it easy to store and the perfect skill trainer for every medical simulation lab.

M-1013116
Lap-X Series
Lap-X laparoscopic surgical simulators provide easily accessible minimally invasive surgery simulation training for medical professionals. They are designed for surgical residents, physicians and operating room assistants to train laparoscopic skills in medical schools, universities, hospitals and skills centres.

Lap-X models deliver simulation training for hand-eye coordination skills in various surgical specialties such as general surgery, gynaecology, urology, paediatric surgery and gastrointestinal surgery, and offer the following advantages:

• Intuitive to use: software and hardware are self-explanatory and do not need third-party guidance
• Use real surgical instruments to narrow the gap to reality
• Update their new virtual reality exercises and modules free within license period
• Offer solutions for a wide range of healthcare professionals, from basic to advanced laparoscopic training

▶ Excellent training aids to standardise, structure and complement hands-on skills training in surgical residency programs!
Lap-X Expert is the solution for highly realistic and sophisticated simulation of endosurgical interventions, providing realistic training for surgeons and surgical teams. The simulator offers an opportunity to learn and understand basic aspects of working with laparoscopic instruments and trocars as well as develop advanced tactile skills. It helps to maintain and consolidate already existing theoretical knowledge with regard to endosurgical interventions and technologies via a variety of different modules.

**Training Features:**
- Simulator for all minimally invasive disciplines, including but not limited to general surgery, gynaecology, urology, gastro-intestinal surgery and paediatric surgery
- Offers an extensive training curriculum with increasing levels of difficulty within each module, allowing the learner to acquire basic laparoscopic skills to advanced laparoscopic procedure proficiency
- Uses unique haptic feedback technology with wireless extractable instruments and a laparoscope, which are interchangeable between three universal trocars
- Offers individual and team training possibilities as well as customisable training courses and real-life procedure videos

**Laparoscopic training modules:**
- Basic skills
- Suturing and knotting
- Salpingo oophorectomy
- Gynecology surgery
- Prophylactic oophorectomy
- Hysterectomy
- Cholecystectomy
- Sigmoid colon resection
- Appendectomy
- Hernioplasty
- Splenectomy
- Small bowel acute adhesive obstruction
- Diagnosis of abdominal cavity

**Delivery content:**
- Lap-X Expert simulator with adjustable display and working height, comes with wheel cart for mobility
- 2 screens mounted on the simulator
- 2 extractable, wireless laparoscopic instrument imitators*
- 1 extractable endovideocamera imitator*
- 1 footpedal with 2 switches for coagulation and cauterisation
- 1 software package
- 1 instrument holder
- Administrator mode
- Hardware support and guarantee (1 year)
- Software license and support (1 year)

M-1020118

* insertable through any trocar

**HIGHLY ACCURATE MOTION DETECTION**

**Instrument tracking system**
Instruments can be inserted and used simultaneously during endosurgical interventions. The simulator's tracking system has been developed in regards to this important feature.

**Motion tracking of endosurgical instruments imitators**
- Simultaneous
- Longitudinal
- Rotation

**Endosurgical instruments**
All endosurgical instruments required for different endosurgical intervention performance are featured in the simulator's software. You can choose from:
- Variety of forceps and scissors
- Clip applicators
- Dissectors
- Bipolar and monopolar instruments
Lap-X Hybrid
Lap-X Hybrid is a unique laparoscopic simulator that combines the functionality of a virtual reality trainer and a box trainer, providing an innovative and powerful tool for all minimally invasive surgeries.

Users can practise with virtual reality mode at different curriculum modules: basic, novice, intermediate and advance, as well as train with procedural modules such as appendectomy, cholecystectomy, nephrectomy and many others.

The trainee can switch from virtual reality to box trainer mode any-time. As a box trainer, the Lap-X Hybrid has the possibility of metrics measurement and performance recording. All validated box exercises are compatible with the Lap-X Hybrid, providing the user with haptic feedback training. The instructor has the ability to pre-record the example exercises. Trainees can also record their own performance and submit it to the instructor for online assessment.

Training benefits:
• Using more than 40 different exercises divided into 6 modules with increasing difficulty
• Monitoring trainees’ progress via online assessment
• Hybrid function: combining virtual reality and box training for better results
• Receiving instant feedback with values such as duration, path lengths or performance report

Virtual Reality:
Free software updates during licensed period

System specifications:
Two controllers (22 x 15 x 32 cm, 1.6 kg each)
HD camera, red light, footpedals
Exercise platform (35 x 30 x 5 cm)

Delivery content:
• 2 controllers (left and right)
• 1 endovideocamera imitator
• 1 foot pedal with 3 switches for cauterisation, coagulation, zoom in, zoom out, change of camera angle and start of an exercise recording
• Exercise platform (35 x 30 x 5 cm)
• 1 carrying case
• 1 software package
• Administrator mode
• Hardware support and guarantee (1 year)
• Software license and support (1 year), free software updates during licensed period

M-1020117

Lap-X Hybrid combines the functionality of a virtual reality trainer and a box trainer!

Simulator benefits:
• Ability to use simulator as a box trainer and as a virtual reality trainer
• Exercises with increasing difficulty within the modules
• Instant feedback and scoring evaluation of different parameters
• Possibility to submit video recordings and scores to instructors via internet
• Possibility to review, approve and comment on trainee’s video recording via provided website
• Possible to use animal organs

In the administrator mode, instructors can:
• Review scores
• Review curricula completion progress of all students
• Review user training information (i.e. total training hours)
• Customise a new curriculum
• Create an exam, a new box trainer exercise, record a standard performance and settle nominal scores for the exercise
• Export data and add E-learning URL
• Set mandatory training for learners
Lap-X Box

Lap-X Box is the basic version (a traditional box trainer) within the Lap-X simulator series and comes with the hardware needed to perform the following training:

• Moving objects bimanually from one instrument to the other
• Performing tasks under different camera angles via different endoscope insertion points
• Navigating with a 0°, 30° or 60° scope
• Mastering the fulcrum effect
• Completing tasks with one hand while keeping the instrument in the other hand steady

The hardware comes complete with the recording software package necessary to train various training skills. Includes an administration tool to monitor training progress of trainees: instructors can create different exercises and the students performance can be video recorded and evaluated with the following parameters: time, left path length, right path length.

Delivery content:
• 2 controllers (left and right)
• 1 foot pedal with 3 switches for cauterisation, coagulation, zoom in, zoom out, change of camera angle and start of an exercise recording
• 1 HD camera (1920x1080) with auto focus and low light support, powered by USB (2.0, 3.0)
• 1 tray unit to place different tasks and skill sets for training
• B. Braun Aesculap laparoscopic instruments (these instruments can be replaced by any 5 mm or 10 mm instruments)
• 1 carrying case (60 x 55 x 18cm)
• 1 software package
• Administrator mode
• Hardware support and guarantee (1 year)
• Software license and support (1 year)

M-1020116

The most affordable solution for basic laparoscopy skill training!

Options to train hand-eye coordination

| A. Skill Set #1: Loops and wire | M-1019681 |
| B. Skill Set #2: Pea on a Peg | M-1019682 |
| C. Skill Set #3: Wire Chaser | M-1019683 |
| D. Skill Set #4: Post and Sleeve | M-1019684 |
| Complete Skill Set #1 – #4 | M-1019685 |

Hard carrying case for Lap-X Hybrid (M-1020117) and Lap-X Box (M-1020116)
T9 Abdominal and Laparoscopic Ultrasound Trainer
Designed for Abdominal Intraoperative and Laparoscopic Ultrasound training. The extra large pelvic box has a slideout drawer that houses the Abdominal Intraoperative and Laparoscopic Ultrasound Phantom “IOUSFAN”. The pelvic box has 7 laparoscopic ports that provide training and demonstration flexibility. The ports are fitted with grommets designed to hold the ultrasound wand (not included). The slide-out drawer provides easy access for inserting the organs (not included).
M-1018120

T5 Pelvic Box Series for Laparoscopic Skill Training
The large pelvic box is the most versatile system that is used from basic skill development to advanced procedure training. It is torso-like in size with 14 ports that are fitted with grommets designed to hold an instrument or trocar.
The T5 Series is a complete portable system that does not require video tower equipment and is easy to set up.

Skill training:
• Basic laparoscopic skills
• Laparoscopic suturing
• Advanced laparoscopic procedures
• FLS® Skills practise
• Individual or team training
• Laparoscopic camera navigation (LCN)
• Hands-on skills training
• Psychomotor skills
• Hand-eye coordination
• Depth perception
• Timed activities

Includes large pelvic box with 14 laparoscopic ports with fitted interchangeable 5 and 10 mm grommets and interior lighting. The SimScope™ simulates a real laparoscope and can be inserted into any of the 14 laparoscopic ports. It zooms and rotates, has a realistic handle and is available in 0° and 30°.

Available in two configurations:

T5 Large Pelvic Box with Removable Monitor
Designed to remove the monitor from the trainer and attach it to the included stand, giving the user the ability to rotate and drape the box for a more realistic training experience.
M-1020092

T5 Large Pelvic Box with Attached Flip-up Monitor
M-1020091

► Reliable technology housed in a durable construction!

M-1018120
183

**T12 Laparoscopic Trainer with Belly**
The belly has nine laparoscopic ports that are fitted with grommets designed to hold an instrument or trocar. It has a slide-out drawer with interior lighting for easy access to the organ tray. Both versions are delivered with an insufflated belly, Monitor Stand (monitor not included), Advanced 0° SimScope™ (camera is a NTSC signal), and Scope Holder. The Advanced 0° SimScope™ has an excellent resolution. The easy-to-adjust focus is located at the end of the shaft. Diameter measures 9.5 mm, length 220 mm.

**T12** M-1018121

**T12 Soft Belly** M-1020093

---

**T3 Plus: Portable Laparoscopic Skill Training Box**
The NEW T3 PLUS is a complete minimally invasive training system that does not require video equipment, is portable and easy to set up. It has a joystick camera that zooms and rotates. The expanded front provides room for a wider selection of skill inserts. The T3 PLUS includes the redesigned pelvic box, SimScope™ (camera) and 10" monitor. The T3 PLUS provides a versatile one-person laparoscopic skill training workstation.

---

**Portable LT Lab Tab Trainer™**
Technology meets simplicity with the fold-up Lab Tab Trainer™ that works with your tablet or smartphone. No electricity required making it easy to practise or demonstrate laparoscopic skills anywhere! Developed in collaboration with Mr. Ali N. Bahsoun from Guy’s and St. Thomas’ Hospital, London, UK. The Lab Tab Trainer™ is ideal for residents to take home and practise. The trainer folds up, is small enough to fit into a backpack and simple to set up.

**Trainer with Side Ports** M-1018108
**Trainer with Side Ports Package** M-1018113
Includes: Lap Tab Trainer™ with side ports, Soft Tissue, Suture Pad, Pair of Needle Drivers, 2/0 Sutures
**Trainer Messenger Bag** M-1018114
Surgery and Laparoscopy Training Torso
This trainer is aimed at all levels of surgeons in training. Once set up, the torso can be used to self-educate using the preferred surgical laparoscopic instrumentation for a variety of techniques. The torso has the following features:

• Can insufflate and maintain air tight pressure
• Supports usage of wet tissue or prepared artificial materials
• Can be used for surgical diathermy. There is a fixed metal plate in the base of the unit with a connection on the outside to enable earthing
• Can be easily cleaned by flushing out through a large airtight drain plug
• Is lightweight and has a carrying handle
75 x 55 x 25.5 cm
M-1005135

Laparoscopic Trainer
The Portable Laparoscopic Trainer is designed to provide low cost assistance in laparoscopic training:

• Supplied with 4mm black Neoprene skin
• Easily assembled and ready for use in seconds
• Works with wet tissue (eg. Pig liver) or dry (eg. foam)

SUTURING

3B Scientific® Suture Training Arm
The realistic anatomy of the 3B Scientific® Suture Training Arm offers the possibility for suture training that is a lot more complex than with regular suture pads. Given its movable hand and fingers, even challenging sutures in hard to reach places like between the fingers can be practiced. Both the skin and the subcutaneous tissue are represented for a life-like suturing experience. The instructor can inflict wounds independently wherever needed on the arm. Their size and form can be customised, leaving room for a large variety of training possibilities. Additionally, each wound can be sutured several times, making this trainer very economic and suitable even for larger skill training classes.
- Movable fingers for suture training of challenging wounds between fingers
- Skin and subcutaneous tissue differentiated for realistic suture experience
- Wounds can be inflicted by instructor anywhere on the training arm
- Each cut can be sutured several times
M-1020904

Life/form® Interactive Suture Trainer
The trainer attaches easily to an arm, leg, or hip, allowing practice of suturing techniques in addition to essential communication and patient interaction skills. This convenient, cost-effective kit offers practice at all skill levels, including tying knots, placement of staples, and suturing both superficial and deep wounds. Wounds automatically open when cut. Includes suture pad, attachable pad base with straps, needle holder, suture scissors, tissue forceps, scalpel, soft carrying case, nylon suture, instrument case and instruction manual.
M-1018196

Life/form® Suture Kit
Train incisions and determining the depth of suturing and the technique to be used. Practice and demonstrate tying knots, stapling and placement of staples, use of surgical glue, suturing deep tissue, and suturing subcutaneous tissue.
- Movable fingers for suture training of challenging wounds between fingers
- Skin and subcutaneous tissue differentiated for realistic suture experience
- Wounds can be inflicted by instructor anywhere on the training arm
- Each cut can be sutured several times
M-1017981

Suture and Stapling Practise Trainers – Leg
Made with a soft vinyl skin over a core of stitchable foam to provide a life-like suturing experience. Soft and pliable for easy sewing, the skin is tough enough that sutures will not pull out when tightened. The unit is provided with three wounds. Conservatively, more than one hundred cuts can be made on the trainer and each of these cuts can be sutured several times.
- Realistic skin texture with wrinkles, pores, and visible fingerprints
- Disposable limbs provide hundreds of suturing experiences before wearing out
- Trainer comes complete with a starter package of sutures, instruction booklet
M-1005683
**Surgery Skill Trainer**
The Surgery Trainer allows open surgery practise and offers an advanced skills capability for cut and suture practise. The single sided skin pad and a piece of abdominal bowel (which can be anastomosed) are replaceable.

- Portable with rubber suction feet to secure the base providing easy working conditions
- Washable, durable and all parts are replaceable
- Sutures and string not provided.

25 x 23 x 9 cm

**Skin Suture Trainer**
A great low cost way to practise surgical opening and closing techniques.

- Economical reversible pad
- Designed to make complex incisions such as flap and dog turn suturing more realistic
- A sub-dermal layer is present to make secure intradermal sutures

Base has suction feet to enable slip free use.

11 x 14 cm

**Lumps and Bumps Box**
Effective tactile trainer is ideal for juniors getting to grips with their sense of touch and to understand the basic art of description about the feeling through gentle palpation. The trainer can be lab held and placed on a smooth surface where strong sucker feet provide stability while in use. Contains 2 skins and 2 layers of foam and an assortment of shapes compatible with modern teaching for Clinical Skills Centres.

Can be varied and customised to suit individual needs.

M-1005164

**Suture Pads**
Realistic skin for basic suture training with epidermis, dermis and subcutaneous layer and behaves as real skin when cut and sutured.

**A. Flat Pad:**
15.2 x 15.2 cm
M-1019623

**B. Garcia Pad:**
The Garcia Pad simulates the thickness of facial skin, approximately 2-3 mm thick throughout the pad.

M-1018124

**C. Dali Pad:**
The Dali Pad is half-face and half-abdomen. The skin on the face portion is 2-3 mm thick and the skin on the abdomen portion is 3-4 mm thick.

M-1019656

**Sutures and String**
Sutures and string not provided.

Head Suture Models
The Cosmo and Il Duomo models are ideal for practising advanced flaps and grafts in addition to basic suturing procedures. Additional procedures that can be performed with Il Duomo with Tumours and Advanced Il Duomo are: Tumour excision and scar revision, wedge resection of ear, pentagonal wedge eyelid and Estlander lip switch flap.

A. Cosmo M-1018126
B. Il Duomo M-1018127
C. Advanced Il Duomo M-1019654
D. Il Duomo with Tumours M-1018128

Cosmetic Filler Models
The skin on the Zsa Zsa model is specially made to allow injections to be performed. Basic to advanced suturing procedures can also be performed on this model. The Diaphanous Zsa Zsa has specially crafted translucent skin which allows for the checking of filler placement.

E. ZSA M-1018130
F. Diaphanous ZSA Zsa Model M-1018131

Breast-Torso Model
The Breast-Torso Model is designed for body marking and plotting of breast procedures. It can be sutured and includes an epidermis, dermis, and subcutaneous layer. Both basic and advanced suturing procedures and planning of breast surgeries can be performed on this model.
5.9 kg M-1018132
WOUND CARE & BANDAGING

REALISTIC PRACTICE OF THE WOUND CARE!

Trainer for Wound Care and Bandaging Techniques

Using this high quality simulator, students learn how to care correctly for their patients’ wounds and can practice a wide range of dressing and bandaging techniques. The life-like skin reacts realistically to adhesives and bandages, so students can practice in conditions as close to reality as possible. Given the flexible structure of the material, students can practice putting on and changing bandages and dressings in realistic conditions.

The following 13 wounds and drain systems resulting from surgical procedures and injuries are represented realistically on the torso with already applied wound closures (staples and sutures):

- Wound after a thyroidectomy
- Wound after a sternotomy (with drain)
- Wound after a mastectomy (with drain)
- Wound after a spleenectomy (with drain)
- Wound after a thoracotomy (pneumonectomy)
- Wound after a median laparotomy (e.g. cystectomy)
- Wound after an appendectomy
- Wound after a Pfannenstiel incision (e.g. C-section or abdominal hysterectomy)
- Wound after a laminectomy
- Wound after a nephrectomy (side incision)
- Wound after an amputation (leg stump)
- Colostomy
- Decubitus (grade 2)

Easy to clean and store, includes carrying case. Multilingual manual available online.

M-1020592
Stump Bandaging Simulators
Practise and demonstrate standard bandaging procedures as well as the attachment of prosthetic devices. Instruction booklet included.

Upper Stump Bandaging Simulator
The upper torso has two arms – one amputated above the elbow, the other above the wrist. Both arms are slightly extended to facilitate bandaging.
M-1005680

Set of Upper and Lower Stump Bandaging Simulators
Includes upper and lower stump.
M-1005682

Lower Stump Bandaging Simulator
One leg is amputated below the knee, the other at mid-thigh. The torso is long enough to allow bandaging around the body over the uninvolved hip at the level of iliac crest.
M-1005681

Life/form® First Aid Arm
Students will need to react just as in an actual emergency and select the appropriate method to control bleeding and treat the wound. Synthetic blood can be made to flow from either the cut on the forearm or from the severed thumb, or from both at the same time. The severed thumb allows training in proper care and handling of separated body members.
• Regulate rate of bleeding and create venous or arterial flow
• Blood returns to collection tray for reuse
• Pressure points function realistically at wrist and upper arm
Includes vinyl arm with wound, severed thumb, collection tray, arterial pulse bulb, venous supply bag, one quart of Life/form® blood, teaching guide, and hard carrying case.

› Skill training to identify adult heart, lung, and bowel sounds.

**SAM Basic™**

The SAM Basic™ trainer engages the technology of the SimScope™ stethoscope to simulate adult heart, lung, and bowel sounds utilising a large sounds library. Using the provided SimScope™ stethoscope, users are able to access a large variety of pathological conditions in order to customise scenarios. By placing the SimScope™ over the anatomically correct locations of SAM Basic™, the programmed sounds will be played through the scope, allowing for students to employ and enhance their diagnostic skills.

Delivery includes a male manikin, a SimScope™, the SimScope™ software and site license, a USB cable, 1 SAM t-shirt and a user’s manual.

M-1020097

**SAM Basic™ with WiFi (not shown)**

Enables wireless communication between the SimScope™ and SAM Basic™ manikin, allowing users to change sounds remotely or to use in conjunction with a scenario-based simulation.

M-1020099

**SAM II, the Student Auscultation Manikin**

This Student Auscultation Manikin is a new innovation in teaching and learning heart, breath & bowel sounds. Containing the largest sound library available, SAM II is a portable and easy to use manikin. While SAM II is used in many simulation centers, it is also easily moved into a classroom or auditorium for group instruction. The computer software interface is easily projected into any smart classroom. The software includes phonocardiograms, correct anatomical locations, and written lessons for each sound.

Delivery includes a male manikin, a new DELL laptop computer with SAM II software installed, a digital copy of SAM II’s Lesson Guide, and an Operator’s Manual. The lesson guide is currently available in English.

M-1020095

**SAM Storage and Carry Case with wheels and handle (not shown)**

M-1020109
**Skill Training for paediatric heart, lung, and bowel sounds.**

**PAT Basic™**
The PAT Basic™ trainer engages the technology of the SimScope™ stethoscope to simulate paediatric heart, lung, and bowel sounds utilising a large sounds library. Using the provided SimScope™ stethoscope, users are able to access a large variety of pathological conditions in order to customise scenarios. By placing the SimScope™ over the anatomically correct locations of PAT Basic™, the programmed sounds will be played through the scope, allowing for students to employ and enhance their diagnostic skills.

- Utilises an extensive heart, lung, bowel and bruit sounds library
- Listen at anatomically correct auscultation sites
- Customised library available to fit specific scenarios and programs
- Portable and lightweight
- Easy to use
- WiFi upgrade allows for remote selection of sound scenarios

Delivery includes a male manikin, a SimScope™, the SimScope™ software and site license, a USB cable, 1 PAT t-shirt and a user’s manual.

M-1020098

**PAT Basic™ with WiFi (not shown)**
Enables wireless communication between the Simscope™ and PAT Basic™ manikin, allowing users to change sounds remotely or to use in conjunction with a scenario-based simulation.

M-1020110

---

**SimScope WiFi™ The Hybrid Simulator**
The new SimScope WiFi™ enables wireless communication between the Simscope™ and the computer, allowing a seamless selection and change of pathological sounds and conditions of any standardised patient, O.S.C.E. or low-fidelity manikin.

- SimScope Patches™ are customisable and easily programmable for specific diagnostic case studies
- SimScope™ plays the programmed heart, breath and bowel sounds specific to each correct anatomical location enabling a realistic standardised patient encounter. Up to 20 patches may be programmed and simultaneously activated to simulate real time auscultation during a physical exam

Delivery includes: SimScope™, SimScope Patches™, SimScope Software™, and USB cable.

M-1020104

Optional Extras:
Additional SimScope WiFi™ stethoscopes
M-1020105
SimScope Patch™ Kit (15)
M-1020103

---

**CardioSim® VII, portable version**
*Develop your own pre-programmed lectures!*

The CardioSim® VII is the only system available that allows an instructor to create custom simulated heart sounds: Editing of S1, S2, murmurs, clicks, third and fourth heart sounds, heart rate, etc. allows the instructor to accentuate the particular aspects of the sound that is being studied. CardioSim® VII comes with hundreds of simulated and live recorded sounds, built-in heart animations, ultrasound live video images, and dissection slides provide an extensive library of information.

- **Animations** – There are over 125 animations on the CardioSim® VII. For example, in studying mitral stenosis the student can view a calcified mitral valve or watch an animation of mitral stenosis in a beating heart.
- **Images** – The CardioSim® VII includes many images. Instructors can add their own slides and images, if desired.
- **Expanded Real Heart Sound Library** – The real heart sounds library has been expanded to approximately 200 real heart sounds.
- **Preprogrammed Lectures** – To present a lecture, sounds (both simulated or real) can be preprogrammed. Each may have as many as eight lectures.
- **New simulated sounds** – The library of simulated sounds has been expanded to provide a variety of comparisons such as the difference between a split S2, OS, and S3.

M-1020108
Adult Heart and Lung Sounds Torso
Utilising this torso, students will learn to find the correct location where a specific sound can be heard. They will use the anatomical landmarks to orientate themselves, and once the location is found, they will hear the appropriate sound through the stethoscope and/or external speakers.

Features:
- Full size adult torso with palpable anatomic landmarks
- Sensor network hidden beneath the skin
- Hear the appropriate heart or lung sound as bell of stethoscope is moved across the front and back of the torso
- Includes Virtual Stethoscope® with multiple heart and lung sounds
- An external speaker plugs into the Virtual Stethoscope® so a classroom can hear what the student hears
Includes instruction manual and carrying bag.

M-1019857

➤ Train the orientation with anatomical landmarks to find correct auscultation locations.

Auscultation Trainer and SmartScope™
The torso manikin presents itself as a real patient without visible auscultation sites. The student must palpate to identify correct auscultation locations, and will hear different heart and lung sounds as the SmartScope™ is moved to different locations on the manikin.
The instructor selects from a menu of heart and lung conditions by wireless remote control. A diagnosis of the selected condition can be made by comparing the variations in sounds occurring at different sites. Lung sounds can be detected at 5 anterior, 10 posterior, and two midaxillary locations. Students can practise auscultation at six anterior heart sites.
- Invisible auscultation sites
- No internal speakers
- Completely wireless
- Palpable landmarks
- Remote controlled
- Heart and lung sounds vary at different sites
- Hard storage case included

Listen to the sounds either using headphones or the SmartScope™ or by connecting to an amplifier (optional) or speaker (not included).
Range on the unit is up to 100 feet of remote access.
69 x 43 x 28 cm; 12 kg

Trainer M-1005642
Trainer with Amplifier M-1018149
Additional Body M-1005644
Adult Deluxe Plus CRiSis™ Auscultation Manikin with ECG Simulator, SmartScope™ and Printer

The manikin presents itself as a real patient without visible auscultation sites. The student must palpate to identify correct auscultation locations, and will hear different heart and lung sounds as the SmartScope™ is moved to different locations on the manikin. A diagnosis of the condition selected by the instructor can be made by comparing the variations in sounds occurring at different sites – just like in a real patient! Lung sounds can be detected at seven anterior locations and students can practise auscultation at six anterior heart sites.

Delivery includes Complete CRiSis™ Manikin with auscultation sites, one remote control with LCD display, one SmartScope™ with single- and dual-user headpieces, hard storage case, ECG Simulator, and electronic monitoring, memory, and printer unit light controller which displays running averages and provides hard copy printout. Requires two AA batteries (included).

M-1015577

CRiSis™ Manikin Auscultation Kit

Do you already own a CRiSis™ Manikin? Upgrade it with heart and lung sounds now! Provides everything needed to add heart and lung sounds to an existing CRiSis™ Manikin. Includes upper torso, chest skin, remote, and SmartScope™.

M-1019786
Arrhythmia, Heart & Breath Sounds TUTOR
Two-in-one TUTOR reproduces digitally stored heart and breath sounds or arrhythmias. This unique TUTOR allows instructors the flexibility to change menus by using plug-in modules. There is a volume control and two LEDs that illuminate during systole as well as an illuminated display showing the example currently playing. Sound Menu items are selected from the 16-panel keypad. Rhythms may also be viewed on any monitor or by connection to the Arrhythmia Display Interface.
Includes 2 stethoscopes from Sounders. Up to 50 Sounders can be connected at the rear panel jacks.
Sound menus sold separately, see table: Sounds libraries.

This set includes 4 ears which allow observation of chronic otitis media with large perforation, attic cholesteatoma, attic cholesteatoma, and atelectatic middle ear otitis and tympanosclerosis.
M-1005646

Life/form® Diagnostic and Procedural Ear Trainer
Life-like right and left ears teach diagnostic and procedural techniques and are removable for easy maintenance and storage. For the ultimate in realism, the middle ear can be filled with various fluids. Trainer comes complete with two ears, approximately 100 pre-cut eardrums, specially formulated ear wax, one standard middle ear cartridge with syringe, adjustable stand, and a hard carry case. Otoscope, ventilation tubes, and surgical instruments are not provided. See online for additional product features.
45.7 x 27.9 x 25.4 cm; 5.44 kg
M-1017258

Option:
Life/form® Pneumatic Otoscopy Kit
This exciting Pneumatic Otoscopy trainer offers an exciting additional feature for the Life/form® Diagnostic and Procedural Ear Trainer (M-1017245 shown above). While pneumatic otoscopy is indispensable for examination of the ear, studies have shown that most are performed incorrectly! Now with the valuable feedback offered by this kit, students, residents, and practising physicians can learn how to generate the correct amount of air pressure needed to perform accurate pneumatic otoscopy to test for tympanic membrane mobility. Kit includes a pneumatic pressure gauge, two pneumatic ears with pressure tubing, and a package of approximately 100 eardrums.
30.5 x 27.9 x 12.7 cm; 1.13 kg
M-1017259
Train key skills specific to paediatric lumbar puncture procedures

Life/form® Paediatric Lumbar Puncture Simulator
The Life/form® Paediatric Lumbar Puncture Simulator represents a 10-12 month old infant placed in a left lateral decubitus position with the neck and knees flexed, approximating the necessary foetal position. The embedded iliac crest offers exceptional realism, while the removable spine, spinal canal and skin pad make training simple and hassle free.

- Perform lumbar puncture in the L3-L4, L4-L5, or L5-S1 spaces
- Palpate iliac crest and spine to find correct locations
- Fluid flows when needle is inserted correctly
- 9 kg
M-1017244

Injection Training Arm, Five Year Old
The Mike® and Michelle® Injection Arm with hand simulate that of a 5 year old, with life-like venous structure. The dorsum of the hand has two veins for additional intravenous set-up. Two interchangeable hands are supplied with the simulator.

Features:
- Intravenous injections, infusion, and blood collection
- Subcutaneous injections in both flexor and lateral sides of forearm
- Intramuscular injections in deltoid area
- Squeeze bulb simulating either collapsed or distended veins
Mounted on smoked Lucite® base and supplied with blood bag and stand, synthetic blood concentrate, squeeze bulb, and spare arm skin. Soft carrying bag and instruction manual included.
M-1018860
This arm trainer is a valuable tool for practising injections on paediatric patients

Injection Training Arm, One Year Old

*Simulates the arm of a one year old and features:*
- Medial venous structure
- Two veins in dorsum of hand
- Radial and brachial arteries
- Squeeze bulb simulating either collapsed or normal veins
- Easily replaceable skin and veins that withstand multiple needle sticks

Mounted on smoked Lucite® base and supplied with blood bag and stand, synthetic blood concentrate, squeeze bulb, and spare arm skin. Soft carrying bag and instruction manual included.

M-1018861

Life/form® Paediatric Arm

Providing realistic sensation and response, the life-like vinyl skin rolls when palpated to allow location of the vein. A soft foam is used to simulate the deltoid muscle and allows the student to get the feel of administering intramuscular injections to children. Simulated bone in the shoulder defines and limits the injection area. Water may be used as an injection fluid in the shoulder area.

Includes a Life/form® arm with white skin, fluid supply bag, 3 cc syringe, one pint Life/form® blood, teaching guide, and hard carrying case.

56 x 28 x 15 cm

Life/form® Difficult Access Infant Skin for IV & IO – Package of 3

The Life/form® Difficult Access Infant IV & IO skin sleeves have been developed to fit over the arms and legs of most infant training products. This soft, life-like skin is meant to represent a chubbier infant and may be used to prepare for intravenous and intraosseous insertions where the vascular system may be difficult to access.

M-1017974
Infant Venous Access Simulator
Now 100% latex-free with redesigned umbilicus and umbilical valve allowing repeated catheterisation with a 5 FR umbilical catheter!

A unique, anatomically correct female baby developed to teach and practise the vascular accessing of newborns and infants. Barely discernable blue Dermalike™ veins are under the replaceable translucent skin on the head, arms and the right leg. Veins give a realistic pop and flashback when needle is properly placed. The veins presented include the temporal, external jugular, postauricular, basilic, cephalic, saphenous and popliteal. Practise accessing, securing, site care, and maintenance for standard IVs and PICC (Peripherally Inserted Central Catheter). Nasal and oral openings allow placement of nasal cannulas, as well as nasogastric and feeding tubes to teach suctioning, securing, dressing, cleansing, and maintenance.

M-1009799

Life/form® Paediatric Head
An invaluable tool for demonstrating and practising infusions and injections in the temporal and jugular veins of a newborn to a twelve-month-old infant. Provides realistic sensation and response. The life-like vinyl skin actually rolls as you palpate to allow location of the vein. The synthetic rubber tubing for the veins was carefully selected to provide a life-like simulation of vein size, and feeling of puncture and palpation for practising venipuncture. The temporal vein of the Life/form® Paediatric Head is easily accessible for IV infusions. Practise in the jugular vein is equally realistic. The neck is made of soft, flexible foam to provide a realistic feel of palpation and puncture. Supplied with realistically modelled head with skin and veins, fluid supply bag, 2 different gauge winged infusion needles, artificial blood and hard carrying case.

Simulates a twelve month-old infant for realistic training
Anatomically realistic for both male and female paediatric catheterisation training

**Life/form® Infant Male and Female Catheterisation Trainer**

The Infant Male and Female Catheterisation Trainer is an inexpensive 2-in-1 trainer that provides realistic practice of this difficult skills procedure.

- Practise insertion, position, catheter balloon inflation and deflation
- Feel resistance and pressure as with a real patient
- Urine flows when catheter is in proper position
- Practise both male and female infant catheterisation training
- Anatomically realistic with both male and female genitals
- Genitals made of soft, life-like material
- Replaceable male and female genitals
- Lower half of infant only
- Design for use with a standard 8 French latex or silicone intermittent catheter

Includes: infant manikin, one male and one female genital insert, 2 oz. lubricant, infant Foley catheter, and instruction manual.

**Infant Circumcision Training Kit**

Made with soft, life-like material. The trainers include the foreskin, glans penis, frenulum, meatus, and coronal groove. Practise separating foreskin from the glans, removal of the foreskin, and suturing techniques. The trainers have been designed for clamp methods, dorsal slit, and sleeve circumcisions. The trainer may also be used to demonstrate the procedure and practice aftercare skills to family members. Since there are different methods of circumcision, the Circumcision Trainer has been designed for Mogen clamp method, Guillotine clamp method, Gomco clamp method, Plastibell method, dorsal slit method, forceps guided method, and sleeve circumcision. The Infant Circumcision Training Kit is a complete kit for all circumcision training needs.

Includes one infant torso, six glans with attached foreskins, instruments (scalpel, 11.5 cm micro-forceps, 15.25 cm precision probe, Iris research scissors, 12.7 cm straight Halstead mosquito forceps, 12.7 cm curved Halstead mosquito forceps, Ethicon suture thread with needle), instrument case, instructions, and soft nylon carrying case.

M-1005642
Life/form® Infant Auscultation Trainer

The Life/form® Infant Auscultation Trainer simulates heart, bowel, and lung conditions selected by the instructor via wireless remote control. The student must palpate to identify the correct auscultation sites and will hear different heart, bowel, and lung sounds as the SmartScope® is moved from site to site. The instructor can program the remote control, selecting from two dozen conditions and even switch conditions so students can compare and make a diagnosis. Includes Infant Auscultation Trainer, SmartScope® remote, and hard carry case.

Note:
Infant remote and SmartScope® are not compatible with Adult Auscultation Trainer.

Use any stethoscope in the normal auscultation site for paediatric assessment

Child Heart & Lungs Sound Trainer
This self-contained heart and lung sound generator delivers site-specific heart and lung sounds typical of a four-year old child. Use any stethoscope in the normal auscultation site for paediatric assessment to listen as ten lung speakers and a heart speaker mimic actual sounds. The unit can be run from either a conventional PC using your mouse and monitor, or through the special handheld remote. An external speaker jack allows you to broadcast sounds to the entire classroom, or you can use it for audible testing of more than one student at a time. Classroom broadcasts of speakers/sounds in specific locations allow students to hear precise sound anomalies encountered when they auscultate the manikin. No programming required. Simply plug in, attach your USB mouse and monitor cable, and point and click your way to student excellence in lung and heart sound knowledge.

The simulator comes with a power cord, user reference, and carry case. No assembly of manikin or installation of programming is required.

Heart and Lungs Sounds Manikin, 1 Year Old
Learn where the base heart sound may be best heard or where the bell should be placed to hear stress or wheezing in a young child. Site specificity is obtained through an exciting new wireless technique in which anatomical landmarks on the manikin are used to locate the site where a specific sound should be heard. If correct, the appropriate sound can be heard through the stethoscope and/or external speakers.

Features:
- Fully articulating head, neck and jaw permitting head-tilt/chin lift, jaw thrust and neck extension into the sniffing position
- Anatomically accurate mouth, tongue, airway and oesophagus designed to illustrate the profound differences between intubating an infant, a child or an adult
- Realistic trachea, bronchi and lungs. Observable bilateral lung expansion under positive pressure ventilation

M-1013899

Heart and Lung Sounds Simulator, 5-Year Old (not shown)
Students must learn where the base heart sound may be best heard or where the bell should be placed to hear stress or wheezing in a young child. Site specificity is obtained through an exciting new “wireless” technique in which the student uses anatomic landmarks on the manikin to locate the site where a specific sound should be heard. If correct, they will hear the appropriate sound through the stethoscope and/or external speakers.

M-1020853

Additionally needed:
Heart and Lung Sounds Auscultation Training Kit (not shown)
Convenient torso overlay with sensor network hidden beneath the skin. Includes Virtual Stethoscope with multiple heart and lung sounds, carrying bag and instruction manual. An external speaker can be plugged into the Virtual Stethoscope.

M-1020929
Simulate high-stress birthing scenarios with the award-winning SIMone™!

**SIMone™**

Birthing Simulator for advanced training, now with 14 cases

**Train realistic and interactive high-stress scenarios for vacuum and forceps delivery:**
- Haptic response technology
- Visual and audio interface
- Full debrief for optimal learning effect

Multi-dimensional learning techniques are combined to assure a maximum effect! The haptic response technology assures realistic training of motoric skills by combining the simulated scenario with high tech sensors: any movement or force that is being used throughout the procedure is measured and direct feedback tells the student the impact it has on the baby.

**With SIMone™, your medical staff can be trained in:**
- Correct use of instruments in assisted vaginal delivery
- Defining the position of the foetal head in relation to the maternal pelvis
- Management of birth complications by means of anamnesis, findings and interventions

**DESIGNED AND MANUFACTURED IN GERMANY**
Effective Training with SiMone™
SiMone™ has a patented force feedback mechanism that allows the trainee to confidently learn and develop the skills necessary for performing complicated procedures. SiMone™ gives the opportunity to practise an instrumental delivery in a realistic manner – over and over again with little or no setup time! In less than 60 seconds, a new birthing scenario can be initiated.

SiMone™ also trains students in:
- Recognising the right moment to select a vaginal assisted delivery
- Correct handling of medical instruments for delivery
- Assessing position of foetal head in relation to the maternal pelvis
- Labour management using a partogram
- Medication administration to achieve progress during delivery
- Interpreting foetal heartbeat and uterine contraction through a CTG
- Interpreting respiratory sounds
- Interpreting the sounds of pain experienced by the mother

Accessories included with the simulator:
- 1 Vacuum extractor Menox 60 mm
- 1 Vacuum hand pump
- 1 Naegle forceps
- 200 ml lubricant
- Latex-free disposable gloves, size M/L
- 2 replacement genital inserts
- Assembly tools
- Extensive operating Manual

M-1019599

Consumables Item No.
Spare genital inserts M-1008555
Spare foam core M-1009486
Forceps M-1012769
Lubricant, 200 ml M-1009867

Train the diagnosis, management and medical interventions for these 14 realistic birthing scenarios:
- Multipara (normal birth)
- Nullipara (normal birth)
- Hyperactive labor
- Labor dystocia
- Intrauterine asphyxia
- Fever complications
- Infection complications
- Heavy infection complications
- Mild Preeclampsia
- Severe Preeclampsia
- HELLP syndrome
- Overdue birth: mother refuses the labor induction procedure
- Overdue birth: mother accepts the labor induction procedure
- Overdue birth: post cesarean section, mother refuses a new caesar-ean section and the labor is induced

Examples of new Interventions and Findings

[Diagram of interventions and findings]

[Table of medicinal options]

Obstetrics & Gynaecology | MEDICAL SIMULATION

203
SMART MOM Birthing Simulator

Obstetric simulators focused on the two primary challenges in OB deliveries:

- Postpartum Haemorrhage (PPH)
- Shoulder Dystocia

Also exhibit a wide range of other birthing irregularities. Extensive Fœtal Heart Rate (FHR) programming ensures a broad exposure to variations in waveforms to test your knowledge and team leadership skills in handling patient treatment modalities. The tablet controls the birthing position and rotation of the fœtus, descent speed, vaginal bleeding, amniotic fluid, meconium, and the mother’s physiological condition in an easy-to-use application. Scenarios are included with the packages and an available library of scenarios makes physiological changes to treatments simple and quick.

Easy-to-use tablet controls ALS features:

- Bilateral IV and BP arms
- 5-lead ECG monitoring
- Intubation
- Papillary responses
- 10 active pulse points

Obstetrics features:

- Choice of delivery system: basic version with manual delivery or advanced version with auto delivery
- Baby, placenta, and umbilical cord
- 6 vaginal fluids for discharge
- Palpation of fœtus and delivery at same time
- 10 scenarios (made up of 36 vignettes)
- Flat-screen monitor
- Laptop monitor
- FHR chart program

Both versions come complete with adjunct baby for Leopold manoeuvres and birthing baby with placenta, umbilical cord, and first breath action. Accessories included: BP cuff, flat-screen monitor for FHR, tablet and laptop for mother’s monitor, pulse oximeter, replacement skin and veins, replacement vagina and cervix, wheeled carrying case.

SMART MOM Basic Birthing Simulator

The basic version comes with a manual delivery system.
M-1018474

SMART MOM Advanced Birthing Simulator

The advanced version comes with an automated delivery system saving time and resources.
M-1020765
NOELLE® Birthing Simulator with PEDI® Blue Neonate
This comprehensive teaching system combines a patient care simulators and an advanced childbirth simulator. The complete birthing experience before, during and after delivery includes:
• Practise of Leopold Manoeuvres
• Automatic birthing system
• Measure head descent and cervical dilation
• Practise of postpartum suturing on vulval inserts
• Replaceable dilating cervices
• New postpartum haemorrhage and palpation module
• Multiple fetal heart sounds heard through conventional stethoscope
• Practise of Shoulder Dystocia interventions
Monitor and log ventilations and chest compressions with the included Omni™ Code Blue® Pack.
Includes:
• One articulating birthing baby with placenta
• One resuscitation baby with intubatable airway and umbilical catheter site
Comes with four umbilical cords, four dilating cervices, two umbilical clamps, talcum powder, water-soluble silicone lubricant, instruction manual and carrying bag. Omni™ Controller, Code Blue® pack: CPR Link software, CPR Link connection cable, CPR module pre-installed in simulator.
Light Skin M-1012732
Dark Skin M-1017865

NOELLE® is available in these additional configurations:

NOELLE® Birthing Simulator with Birthing Baby
Includes one articulating birthing baby with placenta. M-1005815

NOELLE® Birthing Simulator with Birthing and Resuscitation Baby
Includes:
• One articulating birthing baby with placenta
• One resuscitation baby with intubatable airway and umbilical catheter site
Light Skin M-1012417
Dark Skin M-1017860

NOELLE® Birthing Torso with Birthing Baby
This comprehensive teaching system represents a full upper and lower female torso and provides a complete birthing experience before, during and after delivery:
• Removable stomach cover
• One articulating birthing baby with umbilical cord and placenta
• Automatic birthing system that rotates the baby as it moves through the birth canal
• Measure head descent and cervical dilation
• Multiple placenta positions
• Replaceable dilating cervices
• Practise postpartum suturing on vulval inserts
• Practise Leopold Manoeuvres
M-1015567

NOELLE® Simulation System Training Guide
Authors Zerbe and Gamblian condense their combined 50 years of practical perinatal experience into an easy-to-read guide for obstetrics and neonatal care. Includes detailed information about basic and advanced interactive scenarios including normal labor and delivery, variations on normal labor, shoulder dystocia, preterm breech delivery, PIH labor and delivery, C/S for active Herpes, ruptured membranes with cord prolapse, and hemorrhage.
• What “you really need to know”
• Discussion questions quizzes and puzzles
• Student readings
M-1017563
The new birthing simulator offers extremely realistic training features. It was developed specifically for the skill training in normal and complicated deliveries as well as for obstetric emergency training.

Assessment and manipulation of fetal positions:
Using the simulator, trainees will learn how to detect abnormal positions and presentations, and how to use manual techniques to assist the birthing process. Training of manual birthing maneuvers (like Leopold or Pinard’s) can be trained so that correct measures will be applied during complicated deliveries. Furthermore, the trainee will learn when to apply obstetric emergency interventions (like a cesarean section).

Train the following delivery skills and techniques:
- Normal vaginal delivery
- Normal delivery of umbilical cord and placenta
- Palpation and assessment of fetal position and presentation
- Demonstration of all normal and abnormal fetal positions and presentations (like face, neck, or brow) to represent routine and difficult deliveries
- Intrauterine manipulation of fetus
- Shoulder dystocia (adaptive birth canal and pelvic bones) demonstration and management
- Breech deliveries (including complete, footling or incomplete, and frank breech presentation)
- Palpation of fetal fontanelles features
- Complete and incomplete placenta birth

NEW!
- Demonstration of placenta previa: total, partial, and marginal
- Prolapse of umbilical cord
- Nuchal umbilical cord
- Cesarean delivery
- Artificial rupture of membranes
- Clamping and cutting of umbilical cord
- Demonstrate suctioning of baby’s mouth and nose
- Manual maneuvers (such as Leopold, Pinard’s, Mauriceau, Prague, Woods and Rubin maneuver)

Delivery content:
- 3B Scientific® Birthing Simulator P90 PRO
- Detachable, padded stomach cover with advanced insert for cesarian section
- Inflatable uterus insert for Leopold Maneuver including cover that can be cut for cesarian section
- Realistic birth canal (portio, cervix, vulva)
- Fastening belt
- Lubricant
- Amniotic fluid and 100 inserts
- Assembly kit
- Fully articulating fetal baby
- Umbilical cord and placenta

3B Scientific® Birthing Simulator P90 Basic
The basic version of the 3B Scientific® Birthing Simulator offers all features of the PRO version but comes with a pre-cut cesarean insert and a basic birth canal. It does not include an amniotomy insert nor an inflatable uterus.

Delivery content:
- 3B Scientific® Birthing Simulator P90 BASIC
- Detachable, padded stomach cover with basic insert with pre-cut cesarian section
- Basic birth canal
- Lubricant
- Assembly kit
- Fully articulating fetal baby
- Umbilical cord and placenta

The 3B Scientific® Birthing Simulator P90 BASIC can be upgraded to the PRO version with the Upgrade Kit M-1020337.

M-1020332

Birthing Simulator P90 Basic

M-1020333

Birthing Simulator P90 PRO
Upgrade Kit for 3B Scientific® Birthing Simulator P90 Basic
With this upgrade kit, the BASIC version of the Birthing Simulator will include all features of the PRO version.

**Delivery content:**
- Abdominal wall with Cesarean insert made of cuttable silicone
- Inflatable uterus insert (Leopold Manœuvre) with cuttable and exchangeable upper uterine wall
- Anatomically shaped cervix and modeled vulva with vagina (birth canal)
- Safety strap for securing the simulator to a table or bed
- Amnion inserts and fluid for artificial rupture of membranes
- Lubricant Gel (2x)

3B Scientific® Birthing Stages Trainer
Add the Birthing Stages Trainer to practice the correct assessment of the labor progress by palpation. Includes 6 birthing stations, all carefully and realistically represent the internal anatomy, texture and density of the represented stage. See more information on page 210.

M-1020628
**Birthing Simulator**
This life-like birthing simulator gives your trainees practice in normal vaginal delivery as well as birthing procedures for breech and vertex presentation of the foetus. This birthing simulator contains two interchangeable abdominal overlays – one containing an additional foetus in a simulated amniotic fluid sac for practising Leopold’s manoeuvre, the other being transparent to allow viewing of the foetal position during labour.
Anatomically correct female pelvis with representation of internal landmarks such as spinal column, angled birth canal, ileum, ischium, sacrum, sacro spinous ligaments and greater sciatic notch. Includes full-term foetus with fontanelles and cranial sutures and placenta with six disposable umbilical cords and clamps.

**Training features:**
- Vertex or breech deliveries
- Vacuum augmentation or forceps assisted deliveries
- Replaceable vulval inserts and highly distensible cervices
- Removable abdominal and opaque covers

**Susie® Advanced OB Simulator**
This battery powered birthing simulator uses very durable materials and elements for years of usage. It comes with a birthing baby and a newborn.

**Training features:**
- Audible maternal heart sounds from 0 to 200 bpm
- Audible newborn heart sounds from 0 to 220 bpm
- Audible newborn cries, grunting, and stridor
- Foetus with elevating pillow for practising Leopold manoeuvres
- Rectum allows medication

**Replacement parts**

Fœtus Model
This model simulates an average full-term foetus. The human foetus is made of a soft and durable cloth. The body of the foetus model is flexible to show all presentations and positions possible during birth. The amniotic membrane allows you to show the foetal model inside the sack. The snap-on umbilical cord clearly shows the vein and arteries and a convenient drawstring closes the sack. Both amniotic and chorionic membranes are detailed accurately in two colours.

Fœtus M-1005791
Placenta & Umbilical Cord M-1005573

Birthing Simulator
Features the pelvic cavity with major anatomical landmarks and painted outline of bony pelvis. The birthing simulator allows intra-uterine manipulation and various training possibilities for prenatal, intrapartum, and postpartum skills.

Supplied with 2 stomach covers (skintone/transparent), 1 male and 1 female foetus with placenta, 5 umbilical cords, 2 umbilical clamps, talcum powder and carrying bag.

M-1005790

Other available add-ons for M-1005790:
Fœtus for vacuum delivery
M-1005791
Palpation Module for Leopold’s Manœuvres
M-1005823

Birthing System for M-1005790:
• Removable end-plate for insertion of birthing mechanism
• Removable cervixes automatically dilate as labour progresses
• Advance and rotation of foetus through birth canal
• Crowning of foetal head
• Manipulation of the vulva to pass the forehead, nose, and ears
• Syringe mouth and nose
• Foetal rotation to enable shoulder presentation

Birthing stations insert for M-1005790:
Includes:
Station -5: Prior to onset of labour
Station -4: Cervix partially effaced
Station -3: Cervix fully effaced
Station 0: Foetal head at plane of ischial spine
Station +2: Cervix nearing full dilation
Station +5: Crowning of foetal head
Supplied with carrying case.

M-1005824

Suzie® Articulating Foetus for M-1005790:
Representation of a 42 cm foetus with articulating head and neck, shoulders, elbows, hips and knees for more realistic practise of difficult delivery exercises such as Leopold’s or Ritgen’s manoeuvres.

Features:
• Realistic mouth and nostrils for simulated suctioning
• Palpable fontanelles, spine, shoulders, buttocks, elbows, and knees
• Supplied with carrying bag

M-1005814
NEW!

3B Scientific Birthing Stages Simulator
Practice realistic prenatal cervical examinations: determine the labor progress using 6 inserts with various levels of cervical dilation and effacing.

The trainer consists of a set of 6 different inserts with very realistic anatomical details. The inserts can be used both as stand-alone trainers and as an extension module for the Birthing Simulator P90. The inserts look the same from the outside, only indicating the birthing station represented inside by a number code on the back.

The following levels and birthing stages are represented:
1. Cervix closed (0.5 cm), level -2
2. Cervix open 2 cm, level -2
3. Cervix open 3 cm, half effaced, level -2
4. Cervix open 5 cm, effaced, level -1
5. Cervix open 7 cm, effaced, level -1
6. Cervix open 10 cm, effaced, level 0

Delivery content:
• 6 birth stage inserts
• Safety plate with 4 screws (for the optional insert in birth simulator P90, see page 206)
• Lubricant gel
• Carry bag

M-1020628
Lubricant (2 x 250 ml)
can also be ordered individually
M-1020608

Cervix closed (0.5 cm), level -2
Cervix open 2 cm, level -2
Cervix open 3 cm, half effaced, level -2
Cervix open 5 cm, effaced, level -1
Cervix open 7 cm, effaced, level -1
Cervix open 10 cm, effaced, level 0
Birthing Station Simulator
Demonstrate and practise the palpation of the birth canal. It shows the relationship between foetal head and ischial spines of the pelvic bone during birth. A simulated foetal head of the birth simulator can be locked in three different stations to demonstrate its position above, between and below the ischial spines. Delivered with storage case.
M-1005589

Foetal Monitoring and Labour Progress Model Set
This versatile model provides a life-like simulation for performance of vaginal examinations, application of the foetal spiral electrode and intrauterine pressure catheter, assessing dilation, palpating foetal fontanelles and suture lines, and assessing position of the vertex. Foetal head, lower uterine segment, and cervix are made from life-like materials. The foetal model is encased in a durable plastic case which allows for easy visualisation of parts. It can also be removed to practise foetal spiral electrode application while visualising the procedure. Comes with carrying case.

Internal Foetal Monitor Trainer
This life-like 3D trainer provides realistic simulation for proper insertion of an internal electrode for foetal heart monitoring. Includes the foetal head, lower uterine segment, and cervix made from life-like materials. The foetal model is encased in a durable plastic case which allows for easy visualisation of parts. The foetal head can also be removed to practise foetal spiral electrode application while visualising the procedure. Also includes one model of cervical dilatation depicting 4 cm of dilatation. All parts are easily removed for washing. Includes lubricant, instructions, and nylon carry case.
14 x 12.7 x 21.6 cm; 3.63 kg
M-1017263

Birthing Station Simulator – Cervical Examination
Includes 6 anatomical pelvic blocks to teach, demonstrate and practise cervical examination prior to birth. Internal texture, tissue density and correct anatomical size are carefully represented to provide the most realistic female genital condition possible. The following stages of the cervix during birth are represented:

M-1019859

Internal Fœtal Monitor Trainer
This life-like 3D trainer provides realistic simulation for proper insertion of an internal electrode for foetal heart monitoring. Includes the foetal head, lower uterine segment, and cervix made from life-like materials. The foetal model is encased in a durable plastic case which allows for easy visualisation of parts. The foetal head can also be removed to practise foetal spiral electrode application while visualising the procedure. Also includes one model of cervical dilatation depicting 4 cm of dilatation. All parts are easily removed for washing. Includes lubricant, instructions, and nylon carry case.
14 x 12.7 x 21.6 cm; 3.63 kg
M-1017263
NEW!

3B Scientific Episiotomy and Suturing Simulator
Life-like texture and separate skin and muscle layers for very realistic training of suturing techniques for episiotomies as well as vaginal and labial tears. Each cut can be sutured several times. The trainee will gain experience in instrument handling as well as suture techniques and tying knots.

With this trainer, taking care of the following birth injuries can be practised and demonstrated:
• Episiotomy, for example: Median episiotomy, Mediolateral episiotomy, Lateral episiotomy
• Vaginal tears
• Labial tears

To make caring for and closing these birth wounds as realistic as possible, the following muscle structures can be palpated and sutured in the perineal area:
• M. sphincter ani externus (outer anal sphincter muscle)
• M. transversus perinei superficialis (superficial transverse perineal muscle)
• M. bulbospongiosus (bulbospongiosus muscle)
• Muscle and skin layers can be sutured separately.

The adjustable holder for the simulated tissue stands firmly on the table without slipping. The insert can be taken out of the holder and then worked on while it is lying on the table. This value-for-money tissue insert can be bought individually or in packs of 5 in our shop.

Delivery content:
• Silicone insert
• Base
• Stand
Made of latex-free, silicone-based material.

ZOE Gynaecological Simulator
This simulator represents a female adult lower body with relevant internal anatomical landmarks and anatomically accurate fimbriae and ovaries. It combines and delivers the ability to demonstrate multiple gynaecological procedures, practise laparoscopic examination and minilaparotomy, recognition of pathologies and placement of contraceptive devices.

Training features:
- Vaginal speculum and bimanual pelvic examination
- Uterine sounding
- Insertion and removal of contraceptive devices such as IUD, 75mm diaphragm or female condom
- Laparoscopic visualisation and occlusion of fallopian tubes
- Minilaparotomy
Includes talcum powder, lubricant and soft nylon carrying bag.
51 x 46 x 25.5 cm; 8.5 kg
M-1005797

Gynaecological Simulator for Pelvic Examination
A life-like female pelvis for developing diagnostic skills in gynaecological procedures, anatomical instruction, abdominal palpation, and speculum instruction. The trainer allows the comprehensive, stress-free introduction of gynaecological examinations or more advanced tactile comparisons of pelvic pathologic conditions in a classroom setting, easing the way into clinical experience. Constructed of soft, easily cleaned, vinyl materials that approximate skin texture, provides detailed, life-like anatomical features and references.
- Normal cervix and uterus for IUD insertion and removal
- Normal parous cervix
- Cervix with endocervical polyp
- Cervix with ectropion characteristics
- Cervix with neoplasia (carcinoma)
- Pregnant 10 week uterus
- 2 adnexal masses
Manikin comes with instruction sheet and soft nylon bag.
30.5 x 33 x 33 cm; 4 kg
M-1005723
Cervical Exam and Pap Smear Test Simulator

The Pap test is the most frequently performed cancer screening test in the world. It is essential for women's healthcare practitioners to achieve competence in this vital but highly sensitive procedure. With the Life/form® Cervical Exam and Pap Test Trainer, students can practice external and internal examinations, speculum insertion, and cytological sampling techniques on a simulator that is incredibly realistic and easy to use. This simulator allows you the flexibility of customizing your scenarios with an included makeup, blood, and thickener. Additional specialized modules are also available (STD, post-menopause, S.A.N.E., and pre-puberty).

Starter unit includes:

- Torso
- Normal genital pad
- Normal pelvic organ block with vagina and rectum
- Abdominal gel pad
- Fabric abdominal pad
- Abdominal overlay skin
- Seven uterus/cervix pieces (normal, normal with discharge option, retroverted/cervicitis, cancer/cancer, transparent IUD, trainer, post-menopause/herpes, fibroids/polyp, early pregnancy)
- Five detachable ovaries (normal, polycystic, small cyst, large adnexal mass)
- Bladder insert
- Pelvic organ prolapse insert
- Baby powder
- Injury Shades Makeup Wheel
- Primary Colours Makeup Wheel
- Blood mix
- Methyl cellulose thickener
- Syringe
- Lubricant
- Instruction manual
- Hard carrying case

M-1018643

Advanced Pelvic Examination and Gynaecological Simulator

Now in one completely redesigned unit, the Advanced Pelvic Examination and Gynaecological Simulator is ideal for all aspects of gynaecological education, training, and competency evaluation, including the bimanual exam, speculum exam, and cytology sampling. Students will appreciate the unprecedented realism of its internal and external features; while instructors will love the interchangeable components that make up its unique modular system. You choose the scenarios you want to teach! Components can be combined in a multitude of ways. This simulator allows you the flexibility of customising your scenarios with an included makeup, blood, and thickener. Additional specialized modules are also available (STD, post-menopause, S.A.N.E., and pre-puberty).

Starter unit includes:

- Torso
- Normal genital pad
- Normal pelvic organ block with vagina and rectum
- Abdominal gel pad
- Fabric abdominal pad
- Abdominal overlay skin
- Seven uterus/cervix pieces (normal, normal with discharge option, retroverted/cervicitis, cancer/cancer, transparent IUD, trainer, post-menopause/herpes, fibroids/polyp, early pregnancy)
- Five detachable ovaries (normal, polycystic, small cyst, large adnexal mass)
- Bladder insert
- Pelvic organ prolapse insert
- Baby powder
- Injury Shades Makeup Wheel
- Primary Colours Makeup Wheel
- Blood mix
- Methyl cellulose thickener
- Syringe
- Lubricant
- Instruction manual
- Hard carrying case

M-1019960
**Gynaecological Simulator**
This simulator represents a female adult’s lower body with soft outer skin as well as anatomically accurate fimbriae and ovaries. Various pelvic examinations including recognition of pathologies and placing of contraceptive devices can be trained.

**Features:**
- Vaginal speculum and bimanual pelvic examination
- Uterine sounding
- Insertion and removal of contraceptive devices such as IUD, diaphragm, cervical cap, contraceptive sponge or female condom
The simulator is supplied with normal and abnormal cervices and uteri which can be easily changed.

HEALTH EDUCATION

High quality and functional products to educate about common health risks and diseases. Ideal for educating patients and for student training.

Please see page 218 to find out more about the product featured in the image: Model for Gynaecological Patient Education M-1013705
WOMEN’S HEALTH

Wearable Breast Self Examination Model
Demonstrate realistic self-examination with this natural casting of a female upper body with C-cup breasts. It can easily be worn, in order to better train and practise breast self-examination.

- Made of 3B Scientific SKINlike™ high-quality silicone for a realistic feel
- Breast examination is possible in both upright and lying positions
- Benign and malignant tumours in different stages of development create an understanding of what to feel for

Includes: Multilingual product manual, “Female Breast” chart M-1001576, talcum powder, harness and stand.

Model with Aluminium Carrying Case M-1000342
Model without Case M-1000343

Model of Female Breast
This model is an extremely valuable tool to demonstrate the differences between healthy and unhealthy breast tissue. Shown are a lactating right breast and a non-lactating left breast. Both parts of the model have a sagittal cut showing the tissue of the breast gland as well as the deeper-lying anatomical structures such as the muscles, ribs, costal pleura, pulmonary pleura and lungs. A breast gland inflammation (mastitis) is represented on the right breast and various other diseases on the left breast including a benign tumour, two malignant tumours, and two cysts.

The models are fixed together via magnets for easy demonstrations.
36.5 x 23 x 20 cm; 1.4 kg
M-1008497

Breast Self Examination Model, 3 Single Breasts on Base
Very realistic natural casting of three different female breasts in C and D cups, to train and practise breast examination. Supplied with base and talcum powder.

- Made of 3B SKINlike™ high-quality silicone for a realistic feel
- Benign and malignant tumours in different stages of development are featured in two breasts
- The third breast is healthy for comparison

A. Set of Three
52 x 24.5 x 9.5 cm; 2.3 kg
M-1000344

B. Single Breast with Benign Tumour
M-1000345
**Model for Gynaecological Patient Education**

Ideal for demonstration purposes and for practising insertion of female barrier contraceptive devices, including the femidom, cervical cap, vaginal ring, diaphragm and IUD. It is possible to insert various types of pessaries such as ring, bowl or cube which are used in the event of a prolapse or incontinence. Transparent part allows for clear inside view.

26 x 19 x 22 cm; 1.5 kg
M-1013705

**Optional Kits:**
- Contraception Kit M-1017130
- Pessary Kit M-1017131

---

**Family Planning Educator**

Desktop simulator for training and demonstration of proper introduction and removal of a diaphragm, IUD or sponge contraception devices. This trainer demonstrates both normal and abnormal uterine positions and is ideal for training Bi-manual examination techniques.

**The family planning educator is supplied with:**
- One antverted uterus with clear upper half to illustrate correct position of IUD
- One uterus to illustrate normal antversion and retroversion
- Cervix with patent os attaches to uterus suspended within pelvic cavity
- Soft plastic stomach cover
- Carrying bag included

25.4 x 25.4 x 25.4 cm; 2.3 kg
M-1005784

---

**I.U.D. Trainer**

The hand-held trainer is a suitable aid for understanding correct positioning of I.U.D. (Intrauterine Device) in the uterus. Made of durable plastic, a transparent cover for easy visualisation. I.U.D. not included.

6 x 40 x 45 cm
M-1005766

---

**Why PAP Tests Can Save Your Life, Easel Display**

Easy-to-understand text combined with six handpainted, realistic cervix models make teaching the importance of regular PAP tests easy. This 3D display is perfect for one-on-one presentations. Comes with a protective felt cover.

23 x 30.5 cm
M-1018296

---

**Understanding Birth Control**

A great tool for healthcare providers or educators, this flip chart discusses male and female reproductive anatomy, menstruation, conception, and the most current methods of contraception. Provides student information on one side and a teaching script on the other. 21 panels.

35.5 x 30.5 cm
M-1018279

---

**Woman’s Monthly Carousel Chart**

Ideal visual aid for a complex process, this chart explains a 28-day menstrual cycle. Discusses function of hormones, changes in the uterine lining, the development and release of the ovum, body temperature, and much more.

## PREGNANCY & BIRTH

**Embryonic Development Model in 12 Stages**
Represents development of the human germ cells from fertilisation until the end of the 2nd month of pregnancy in 12 stages. Each stage can be removed from the base individually:
1. Ovum at time of fertilisation (conception) with male gamete (sperm)
2. Zygote at 2-cell stage, approx. 30 hours after fertilisation
3. Zygote at 4-cell stage, after around 40 – 50 hours
4. Zygote at 8-cell stage, after around 55 hours
5. Morula
6. Blastocyst after around 4 days
7. Blastocyst after around 5 days
8. Blastocyst after around 8-9 days
9. Germ cells at approx. 11th day
10. Germ cells at approx. 20th day
11. Embryo at around the end of the 1st month of pregnancy
12. Embryo at around the end of the 2nd month of pregnancy
M-1001257

**Reproductive System Model Sets**
Set of all 9 Activity Sets
Full-color models clarify the functions of male and female reproductive systems. This master set includes all nine Human Reproductive System Model Activity Sets. Each model activity set consists of a markable model of durable vinyl and an activity guide which includes background information, basic understandings, activities, a glossary, and a key to model structures. Also included are color transparencies and a black line master in a three ring binder. In English.
M-1005480

- **Available Activity Sets:**
  - Menstrual Cycle M-1005481
  - Birth M-1018406
  - Meiosis M-1005485
  - Mitosis M-1005484
  - Cell to Embryo M-1018403
  - Four Month Foetus M-1018404
  - Full Term Foetus M-1018405
  - Female Reproductive System M-1005483
  - Male Reproductive System M-1005482

**Stages of Fertilisation of the Embryo – 2 times Life-Size**
This model illustrates schematically how the ovum matures, how ovulation and fertilisation occur and how the fertilised ovum develops to the stage where it embeds itself in the womb wall to begin the growth into an embryo. The various stages are shown in larger-than-life model form in an ovary, fallopian tube and womb. An even more enlarged illustration of each is also printed on the base.
35 x 21 x 20 cm; 1.20 kg
M-1000320

**Foetal Development & Presentation of Twins Chart**
English, laminated. 89 x 58.5 cm.
M-1018282
Deluxe Pregnancy Series, 8 Models
Study human development from the 4th week through the 7th month. Our most popular series includes eight models to show the complete stages of development. All embryo or foetus models are shown in different typical positions in the uterus and each is mounted separately on an individual stand. The five later stages of development allow the foetus to be removed.
M-1018627

Deluxe Pregnancy Series + Embryo Model
Includes all models above plus the model of an embryo of approx. 4 weeks old, at 25 times life-size.
M-1018628

The Complete Deluxe Pregnancy Series includes:
1st Month Embryo M-1000322
2nd Month Embryo M-1000323
3rd Month Embryo M-1000324
4th Month Foetus (Transverse Lie) M-1000325
5th Month Foetus (Breech Position) M-1000326
5th Month Foetus (Transverse Lie) M-1000327
5th Month Twin Foetuses (Normal Position) M-1000328
7th Month Foetus M-1000329

Basic Pregnancy Series – 5 Models
This series consists of five models mounted on one base to show the most important stages of development: 1st month, 2nd month, 3rd month, 5th month, 7th month. The 5th and 7th month stages have detachable foetuses.
13 x 41 x 31 cm; 2.10 kg
M-1000331

REALISTIC AND HIGH QUALITY

Pregnancy Pelvis, 3-part
This anatomy model is a representation of a median section through the female pelvis at 40 weeks pregnant with a removable foetus. Study or demonstrate the normal position of baby before birth with this model plus the human reproductive and urinary systems. A uterus with embryo in 3rd month of pregnancy is mounted on base for added detail and comparison. The realistic and high quality female pelvis includes the female genital organs and other important anatomical details.
38 x 25 x 40 cm; 3.80 kg
M-1000333

Human Embryo Model – 25 times Life-Size
This human embryo model shows the anatomy of an embryo at approximately 4 weeks old and includes numbered details.
12 x 12 x 23 cm; 0.30 kg
M-1014207

Models are also sold individually!
Labour Stages Model
At ½ the size of M-1001258, these models are an anatomically detailed representation of human birth. The birth models are supplied on one baseboard, included stages:
- Foetus in womb, cervix closed
- Foetus in womb, cervix open
- Foetus in womb, start of head passage
- Foetus in womb and pelvis, finish of head passage
- Placenta in the womb
40 x 31 x 13 cm; 1.36 kg
M-1001259

Childbirth Demonstration Pelvis
This model demonstrates the progress of a full-term foetal head through the pelvis during birth. The simulator consists of a female pelvic skeleton with a movable symphysis, hip bone, sacrum, coccyx, and 2 lumbar vertebrae. It is articulated to accommodate passage of a foetal skull which is mounted on an omni-positioning flexible gooseneck support. Delivered on baseboard.
33 x 26 x 18 cm; 1.81 kg
M-1000334

Childbirth Chart
The stages of childbirth are discussed as well as the anatomical details of human labour. 51 x 66 cm; printed on premium glossy paper. Different languages are available online.
M-4006704

More charts for patient education also online at 3bscientific.com

“With Child” Display
This life-size, standing childbirth display with overlapping images shows the childbearing cycle from preconception planning through six-weeks postpartum. In English.
45.5 x 61 cm
M-1018275

Birthing Process, 5 Stages
Anatomical representation of human birth. 5 stages of the birthing process, mounted individually on bases.
- Foetus in womb, cervix closed, 2-part
- Foetus in womb, cervix open
- Foetus in womb, start of head passage
- Foetus in womb and pelvis, finish of head passage
- Placenta in womb
17 x 28 x 46 cm; 8.62 kg
M-1001258
Parent Education | HEALTH EDUCATION

PARENT EDUCATION

Ready-or-Not Tot® Manikins
The perfect tool to educate soon-to-be parents and to demonstrate the reality of parenthood. Ready-or-Not Tot® manikins use set programs, and the response can easily be tracked using the template provided.
- Three different tending programs typical of most babies
- Tots cry, coo, and burp in response to appropriate care
- Programs are 48 hours in length and run continuously with 25-27 tending occurrences

Comes complete with one set of student keys, one set of teacher keys, reproducible parental consent form/permission slip, reproducible student response sheet, teacher correction template, nappy, and instructions. Anatomically correct newborn-size, representing a baby of a teen mum – 2.49 kg, 51 cm long.

Teen BSE/TSE Training Set

REALISTIC REPLICA!

Male Pelvis Section, 1/2 Life-Size
This cross section of the male genital organs shows all structures in detail. It is a great replica of the anatomy of the male pelvis.
13.5 x 10 x 14 cm; 0.24 kg
M-1000283
Self-examination of the testicles is just as important as self-examination of the female breasts for early detection of tumours. Providing exceptional realism, this simulator features soft, thin outer skin with delicate underlying structures and four embedded, simulated tumours. Ideal for teaching proper palpation techniques. To maintain the life-like feeling of the skin, baby powder (included) should be applied from time to time.

M-1005640

Facts About Testicular and Prostate Cancer Display

This folding display explores testicular and prostate cancer by identifying the risk factors, symptoms, and treatment of each condition. Emphasises the importance of testicular self-examination and prostate cancer screening.

M-1018413

Testicular Health Tabletop Display

Offering detailed information in an easy-to-follow format, this two-panel display is ideal for teaching young men about a variety of testicular conditions. Covers noncancerous conditions, possible warning signs of testicular cancer, and instructions for self-examination.

30.5 x 43 cm

M-1018412

Why Prostate Exams Can Save Your Life, Easel Display

Handpainted to simulate the appearance of actual tissue, these five 3D prostate models represent a normal prostate, benign prostatic hyperplasia, early cancer, cancer in a hyperplastic prostate, and late invasive cancer. Comes with protective felt cover.

23 x 30.5 cm

NUTRITION

Visualize Your Portion Size Display
For dinner last night, I had a deck of cards, two light bulbs, and a tennis ball! Featuring clever mash-ups of common foods and household objects, this display trains viewers’ eyes to recognize portion sizes by relating them to everyday things. For example: a CD/pancake representing 1 oz of grains, a deck of cards/steak representing 3 oz of meat, and a tennis ball/orange representing a medium fruit. Carrying case measures. ca. 50.8 x 35.6 x 8.9 cm
M-1020781

Fat Chance: A Closer Look at Fast Food Display
A combination of ten tempting food models and corresponding fat-filled test tubes provides a graphic representation of the saturated and unsaturated fat content of common fast foods. Also includes ten food cards with nutritional information, carrying case, and reproducible handout.
M-1020785

Fat Chunks and Mighty Muscles Set
Start a spirited debate with your students: the sleek-shaped muscles quickly remind everyone that their “chunky” counterparts take up twice the space even though they weigh the same. Set comes with tent cards and carrying cases.
M-1020782

Blood Glucose and A1C Levels Model
One half represents healthy blood glucose and A1C levels. In contrast, the model’s other half shows a red blood cell containing excess glucose particles which floats through simulated plasma full of glucose particles, representing high A1C and blood glucose levels. Includes informative, bilingual (English/Spanish) tear pad with 100 sheets. 29.21 x 6.35 cm.
M-1020784

Vat of Fat
Explaining how calorie intake translates into weight gain is simplified with this graphic and informative display. The plastic jar contains approx. 0.45 kg of gooey simulated fat, which represents the amount of weight a person could gain in one week by consuming extra 500 calories each day. 12.5 x 16.5 cm
M-1018309

Healthy Eating Out Flip Chart
By outlining ways to make healthy choices from restaurant menus, this flip chart helps to solve the “eating-out dilemma”. Features presenter’s notes on reverse panels. 6 panels. 30.5 x 43.5 cm
M-1018408
Complete MyPlate Kit
This kit combines five plates, the display rack, and the food kit for your complete MyPlate educational teaching kit. The 42-piece food kit includes grains, protein, fruit and vegetables Life/form® food replicas. With the included durable plastic plates featuring the USDA healthy eating graphic, you can easily explain the principles of well balanced meals. Your students and patients can fill the plate and learn what to do differently.
M-1018318

More MyPlate products for healthy eating featuring the USDA healthy eating graphic:

MyPlate Cling Place Mats
These plastic place mats, which are also food clings, are an engaging nutrition teaching tool. Participants can easily create many suggested meals using these guidelines. Set of five place mats with easy cling and peel material.
48.5 x 28 cm
M-1018317

MyPlate Plate
Also available individually! Made of FDA approved ABS plastic safe for food use. Dishwasher safe, not recommended for microwave oven. Outside diameter 27.5 cm.
M-1018316

MyPlate CD-ROM PowerPoint®
Viewers learn an easy way to eat healthily at every meal and the answer is right on their plate. Includes one 30 slide express presentation, one more in depth 50 slide full presentation and printable speaker’s notes and handouts.
M-1018320

MyPlate Poster with Key Phrases
Unique MyPlate poster shows 13 key phrases providing clear messages about what to eat and how using the MyPlate technique will make you healthier.
45.72 x 60.96 cm. Laminated.
M-1018319

MyPlate Tear Pad with Food Group Tips, Small
The tear pad front shows the MyPlate image while the back gives tips for eating wisely in all five food groups. A simple concise tool to use in nutrition education and send home with each participant. Pad of 50 sheets, each 21.5 x 28 cm.
M-1018321

MyPlate Tear Pads, Large
The tear pad front shows the MyPlate image with appropriate food choices in each spot on the plate, while the back has simple fill-in-the-blank questions to use as a study guide or reminder for those learning good nutrition. Pad of 50 sheets, each 43 x 28 cm, can be used as place mats as well.
M-1018322
Death of An Artery Easel Display
These handpainted, cross-sectional, 3D models of arteries show patients and students the various stages of plaque build up. The interior size of each vessel diminishes, making it easy to explain a process that can eventually result in death. Comes with protective felt cover. 23 x 30.5 cm

Why Blood Pressure Checks Can Save Your Life Easel Display
Patients and students learn the importance of blood pressure checks when they see these handpainted, 3D models of arteries and this cross section of the brain. Demonstrates the way high blood pressure can silently lead to heart attacks or strokes. Comes with protective felt cover. 23 x 30.5 cm

Occluded Artery Model
The potentially deadly effects of high cholesterol are demonstrated with this persuasive model. The tube represents an artery constricted by plaque, which forms on artery walls when there is excess cholesterol in the blood. When the model is turned over, the blood in the artery slows or stops completely. 7 x 17.5 cm

Cholesterol Flip Chart
Many people do not know what steps they can take to maintain healthy cholesterol levels. This flip chart explains the facts about “good” and “bad” cholesterol and the health risks associated with high cholesterol levels. Features presenter’s notes on reverse panels. Flip chart is 6 panels. 30.5 x 43.5 cm

Blood Cholesterol & Triglycerides Packet
The need for a healthy diet is emphasised by the four blood viscosity samples in this pack. The samples show the exaggerated differences seen when analysing blood serum for lipid and glucose concentrations. M-1018315

Consequences of High Blood Pressure, 3D Display
Life-size, 3D, hand-painted models illustrate the various organs that
can be affected by high blood pressure. Great for health fairs and
health education promotions. Contained in a convenient, sturdy
wooden carrying case.
71 x 68.5 cm (opened).
M-1018277

Benefits of Physical Activity, 3D Display
The four swiveling panels show rewards of an active lifestyle on one
side (strong muscles, healthy arteries, healthy joints, and reduced
body fat) contrasted with consequences of a sedentary lifestyle on
the other side (muscle loss, diseased arteries, osteoarthritis, and in-
creased body fat). Can be mounted on a wall.
67.5 x 33 x 13.5 cm
M-1018301

Consequences of An Inactive Lifestyle, 3D Display
This 3D display graphically shows many of the negative health con-
sequences of an inactive lifestyle. Each permanently mounted, hand-
painted model has a brief description of the consequences it repre-
sents. Display is contained within its own sturdy carrying case.
71 x 68.5 cm (opened).
M-1018300

Preventing Cardiovascular Disease, Folding Display
With practical information and vivid illustrations, this display explains
cardiovascular disease and identifies risk factors, including those that
can be controlled through lifestyle changes and medication.
147.5 x 57 cm (opened).
M-1018305

Exercise Facts, Folding Display
A combination of colourful art and clear explanations about the ad-
vantages of aerobic exercise and strength training make this folding
display an ideal teaching tool. Also included are ways to work exer-
cise into daily life, a discussion of exercise benefits for all ages, and
information on exercise safety.
147.5 x 57 cm (opened).
M-1018299
**Diabetic Injection Pad**
Made from realistic BIOLIKE® material, these teaching models facilitate technique practice on both an injection skin and a finger stick apparatus. The skin model may be strapped to the user’s arm or leg to simulate a needle injection site and the finger stick model may be held by the attached grip for lancet practice. Both can be punctured repeatedly. Comes with powder and carrying case. Skin model is 15.5 x 11.5 x 4 cm; and finger stick model is 2.5 x 11.5 x 2.5 cm.

**Injection Belly**
This soft stomach replica is an invaluable tool for teaching patients how to properly insert and rotate the infusion set for insulin pumps, as well as giving self-injections. The trainer has life-like skin with what feels like real stomach tissue underneath. There is a soft plastic backing to keep needles from going through and holes to allow the material to breathe and dry, should you choose to inject water. 25 x 15 x 3 cm

**Diabetic Injection Practice Kit**
Made from realistic BIOLIKE® material, these teaching models facilitate technique practice on both an injection skin and a finger stick apparatus. The skin model may be strapped to the user’s arm or leg to simulate a needle injection site and the finger stick model may be held by the attached grip for lancet practice. Both can be punctured repeatedly. Comes with powder and carrying case. Skin model is 15.5 x 11.5 x 4 cm; and finger stick model is 2.5 x 11.5 x 2.5 cm.

**Consequences of Diabetes Display**
Handpainted, 3D models and straightforward text explain the negative effects diabetes can have on the body. A great tool for promoting awareness of this potentially devastating disease. Contained within its own sturdy carrying case. 71.1 x 68.6 cm when opened. English. M-1020794

**Diabetes mellitus Chart**
51 x 66 cm; printed on premium glossy paper. Different languages are available online. M-1001554

*More charts for patient education also online at 3bscientific.com*
Diabetic Foot Model
This life-size diabetic foot model can be used for both patient education and student training. Made from life-like BIOLIKE® material, the model contains three ulcers in various stages of development as well as the features commonly associated with diabetes. Comes with carrying case and instruction card.
9 x 24 x 10 cm
M-1017936

Severe Diabetic Foot Model
This life-size, BIOLIKE® replica complements the original Diabetic Foot Model by showing additional, more severe consequences of diabetes, including an amputated toe, Charcot foot deformity, and severe infection and gangrene. Comes with a carrying case and instruction card.
9.5 x 23 x 11.5 cm
M-1017937

Diabetes Flip Chart
Explains type 1, type 2, and gestational diabetes as well as the risk factors and warning signs of each one. Information on pre-diabetes, testing, complications resulting from diabetes, and managing diabetes is also included. Features presenter’s notes on reverse panels.
Flip Chart is 6 panels.
30.5 x 43 cm
M-1018307

Diabetes Nutrition Kit
This teaching kit explains the different types of diabetes. The 30-page resource book (English) defines diabetes mellitus and provides menu guides, exercise suggestions, and seven blackline masters. The 11 Life/form® replicas include: Skim milk, brownie, salmon, French dressing, whole wheat bread, sirloin steak, cheese cubes, bacon, apple, chicken breast, margarine.
M-1020779

What You Need to Know About Diabetes, Folding Display
With information about risk factors, symptoms, and complications of diabetes, this folding display is a valuable resource for health educators. Explains the different types of diabetes and describes how the disease can be treated.
147.3 x 57.2 cm (opened).
M-1018308
DRUGS & SUBSTANCE ABUSE

Goggles for Simulating Drunk Driving
The state of being drunk and how that affects vision and co-ordination can be extremely effectively, realistically and intensely simulated by wearing these goggles. Young people in particular will unavoidably become aware of the danger that comes from drinking and driving. Supplied with case.
M-1005576

▷ NOW AVAILABLE IN DIFFERENT LANGUAGES!

Consequences of Alcoholism, 3D Display
Detailed boards with hand-painted models clearly showing the consequences of alcohol abuse on our organs. The brief explanations are ideal for lessons. In carrying case.
Dimensions when opened: approx. 71 x 68 cm

Wheel of Misfortune
Start the discussions on drug abuse: the game includes questions about the identification and effects of various substances. Multiple-choice questions that call for value judgements are also included. A reproducible teacher’s text (English) contains questions designed for use with grades 1 – 5 and grades 6 – 12.

Smokey Sue Smokes For Two
As Smokey Sue smokes a cigarette, tar collects around the lifelike model of a 7-month-old fetus, graphically showing the pollutants that can reach a developing baby. Jar and fetus are easy to clean. 15 x 35.5 x 16.5 cm
M-1020793

A Year’s Worth of Tar
This graphic, sealed exhibit, containing a pack of cigarettes and cigarette butts submerged in gooey tar, represents the amount of carcinogenic liquid a one-pack-a-day smoker puts into his/her lungs over the course of a year.

Consequences of Drug Abuse, 3D Display
Detailed boards with hand-painted models clearly showing the consequences of drug abuse on the organs. The brief explanations in English are ideal for lessons. In carry-case, dimensions when opened approx. 71 x 68 cm.
M-1005583

Tobacco Ingredients Display
The toxic chemicals found in tobacco smoke are more easily remembered by associating them with common – and grossly unappealing – substances. This eye-catching, plexiglas, 3D display resembles a cigarette yet allows viewers to see what is really inside tobacco smoke. Comes with a two-sided tent card in English.
62.9 x 8.9 cm
M-1020791

Clem’s Phlegm Display
Graphically demonstrating one of the nasty consequences of smoking, this attention-getting sealed jar contains about 2 weeks of the phlegm that would be coughed up by a smoker with COPD. Great discussion starter for any anti-smoking lesson or program.
9.5 x 15.2 cm
M-1020792

Lou-Wheeze
Students get a shocking picture of smoking-related lung damage with this interactive display. Lou-Wheeze has two flexible latex lung models. One representing a healthy lung, the other showing the damage done by emphysema and cancer. Students quickly get a sense of the smothering feeling victims of emphysema experience being unable to inhale fresh air because their lungs are over-inflated. Comes with bellows pump and instructions.
M-1020790

Smokey Sue Smokes For Two
As Smokey Sue smokes a cigarette, tar collects around the lifelike model of a 7-month-old fetus, graphically showing the pollutants that can reach a developing baby. Jar and fetus are easy to clean. 15 x 35.5 x 16.5 cm
M-1020793
MEDICAL CHARTS

Anatomical wall charts and posters from 3B Scientific are ideal for teaching human anatomy and for patient education.
Wall Charts Guide
Wall charts are bigger in size, and are available mounted on wooden rods, or unmounted. They are printed on tear-resistant, waterproof paper and measure 84 x 200 cm.

MEDICAL EDUCATION
Anatomical models are an essential teaching tool in medical education both for students and patients. They make a visual and hands-on demonstration possible that effectively supports the comprehension of the human anatomy. Most of our key products have been cast from actual specimens. This is why 3B Scientific® models come as close to reality as possible, are made of highest quality material and their durability is industry leading.

SIMULATORS
In medical training, simulators are used to teach students the skills they need to be prepared for real cases. These simulators must be as close to the reality as possible, be of great quality, hygienic and also economical in long-term use. You will find simulators for all your training needs manufactured to meet all your standards at 3bscientific.com.

THERAPY & FITNESS
Top quality equipment for practices makes the everyday working life of therapy professionals easier and more economic. Finding the right products is now faster than it has ever been. Visit 3bscientific.com to see the full range therapy and fitness equipment and accessories.

ACUPUNCTURE
Traditional Chinese Medicine (TCM) treats the body as a whole. Today, the integration of eastern and western medicine is growing at a fast pace and clinics and hospitals are providing acupuncture treatments. The quality of the tools and needles used during the treatments is of highest importance for the comfort of the patients. 3B Scientific® offers high quality acupuncture needles and tools at a low cost.

BIOLOGY
Engaging Biology classes are the most effective way to create a long-lasting learning experience. 3B Scientific® models are the perfect tool for fascinating, hands-on education, being cast from actual specimens and made of highest quality material.

PHYSICS
Hands-on, inquiry-based education lies at the heart of teaching physics. At 3B Scientific®, you will find exciting, simple and thought provoking products to actively engage your students.

NEW!

3B Scientific® Birthing Simulator

The new birthing simulator offers extremely realistic training features. It was developed specifically for the skill training in normal and complicated deliveries as well as for obstetric emergency training. For more information look at Page 206.
